CLIENT: Park Ridge School District Project Number 21-413  
PROJECT: Lead (Pb) in Water Sampling West Ridge Elementary School  
ADDRESS: 18 S. First Street, Park Ridge NJ 07656  
FIELD TECHNICIANS: Jordan Pryske REPORT DATE: November 4, 2021

As per your request, EnviroVision Consultants, Inc. was contracted by Park Ridge School District to conduct Lead (Pb) in water sampling at the West Ridge Elementary School on November 4, 2021. The sample locations, in addition to a unique sample location code was determined/assigned by school district personnel. The school district performed the proper flushing of outlets prior to sampling and EnviroVision was instructed to collect only first draw samples for this sampling event. The school district's corresponding flushing logs should be attached to this report.

The facility was closed at the time of sampling in order to prevent occupants from utilizing any water outlets. After flushing, the water in the facility must remain motionless in the plumbing fixtures for a minimum of 8 hours, but no more than 48 hours. Cold water samples were collected in pre-cleaned high-density polyethylene (HDPE) 250mL wide mouth bottles.

Samples were analyzed at Aqua Pro-Tech Laboratories in Fairfield, New Jersey \*(NJDEP# 07010), accredited in accordance with NELAC (National Environmental Laboratory Accreditation Conference). The analytical method utilized was inductively coupled plasma mass spectrometry ICP-MS (EPA 200.8).

Six of the nine initially requested samples were taken collected from the West Ridge Elementary School. The remaining water outlets were either permanently out of service or disabled due to Covid-19 restrictions. An additional blank sample was collected as required.

Results: All of the samples analyzed were either "None Detected" or less than the EPA established threshold for lead in drinking water of 15 parts per billion (ppb). When a water outlet/faucet meets or exceeds the USEPA threshold, EnviroVision recommends that the outlet/faucet be immediately put out of service until the system can be further evaluated and proper remedial action is achieved.

**FootNotes**

RL - Reporting limit  
 MDL - Minimum detection limit  
 ND, U - Indicates compound analyzed for but not detected  
 J - Indicates estimated value

B - Indicates compound found in associated blank  
 E - Concentration exceeds highest calibration standard  
 D - Indicates result is based on a dilution  
 P - Greater than 25% diff. between 2 GC columns.  
 H - Indicates a Hold Time violation
