

INSPECTION CERTIFICATION for Saint Paul Public Schools -- AGAPE High School

STATEMENT OF BUILDING ACCESS

On behalf of Saint Paul Public Schools for AGAPE High School, I certify that I have provided access to all areas within the building to IEA's inspector identified below for the purpose of inspecting for asbestos-containing building materials (ACBM) as mandated by 40 CFR 763.85, "Inspections and Reinspections."

Additionally, I have discussed any concerns I have regarding identified or non-identified ACBM within this building.

INSPECTOR

As mandated by 40 CFR 763.85, "Inspections and Reinspections," I certify that I have inspected all accessible areas in AGAPE High School for the purpose of identifying and assessing asbestos-containing building materials. I have completed an EPA-approved course and all appropriate refresher courses and am an accredited AHERA Inspector. A copy of my certification/accreditation is attached.

Chart A - Immediate Response Situations

The following is a list of those events that contain damaged asbestos material and should be considered to be potential hazards. It is imperative that the following immediate response situations are corrected as soon as possible but no later than six months from the date of this inspection to avoid increased risk of exposure to airborne asbestos fibers. The District should take extra precaution to ensure that properly trained personnel use appropriate techniques to implement these responses.

Following is an explanation of the Immediate Response Action Codes identified in this report.

EPA ASSESSMENT CATEGORY	RESPONSE ACTION
1 = Damaged or significantly damaged TSI ACM.	A = Clean-up ACM debris.
2 = Damaged friable surfacing ACM.	B = Encapsulate slight damage on TSI (i.e. puncture hole or exposed ends of pipe cover).
3 = Significantly damaged friable surfacing ACM.	C = Patch TSI and/or repair ACM cover.
4 = Damaged or significantly damaged friable miscellaneous ACM.	D = Enclose or protect accessible sections w/protective barrier.
5 = ACBM w/potential for damage.	E = Remove section of damaged ACM.
6 = ACBM w/potential for significant damage.	F = Remove ACM and replace with non-ACM.
7 = Any remaining friable ACBM or friable suspected ACBM.	G = Isolate area until repaired/removed.
	H = Encapsulate slight damage.
	I = Remove and replace damaged or loose tile section (s).
	J = Monitor condition of material(s).
