

INSPECTION CERTIFICATION for Saint Paul Public Schools -- Hubbs Lifelong Learning

STATEMENT OF BUILDING ACCESS

On behalf of Saint Paul Public Schools for Hubbs Lifelong Learning, I certify that I have provided access to all areas within the building to IEA's inspector identified below for the purpose of inspecting for asbestos-containing building materials (ACBM) as mandated by 40 CFR 763.85, "Inspections and Reinspections."

Additionally, I have discussed any concerns I have regarding identified or non-identified ACBM within this building.

Chart A - Immediate Response Situations

The following is a list of those events that contain damaged asbestos material and should be considered to be potential hazards. It is imperative that the following immediate response situations are corrected as soon as possible but no later than six months from the date of this inspection to avoid increased risk of exposure to airborne asbestos fibers. The District should take extra precaution to ensure that properly trained personnel use appropriate techniques to implement these responses.

Following is an explanation of the Immediate Response Action Codes identified in this report.

EPA ASSESSMENT CATEGORY	RESPONSE ACTION
1 = Damaged or significantly damaged TSI ACM. 2 = Damaged friable surfacing ACM. 3 = Significantly damaged friable surfacing ACM. 4 = Damaged or significantly damaged friable miscellaneous ACM. 5 = ACBM w/potential for damage. 6 = ACBM w/potential for significant damage. 7 = Any remaining friable ACBM or friable suspected ACBM.	A = Clean-up ACM debris. B = Encapsulate slight damage on TSI (i.e. puncture hole or exposed ends of pipe cover). C = Patch TSI and/or repair ACM cover. D = Enclose or protect accessible sections w/protective barrier. E = Remove section of damaged ACM. F = Remove ACM and replace with non-ACM. G = Isolate area until repaired/removed. H = Encapsulate slight damage. I = Remove and replace damaged or loose tile section (s). J = Monitor condition of material(s).
