

EARTH DAY SUSTAINABILITY TIPS

Keep your neighborhood clean

Nature is an important resource that we want to preserve in Saint Paul – especially right now. Next time you go on a walk consider bringing a bag to collect trash and help keep Saint Paul beautiful. Don't forget to wash your hands when you get back home!

Spread messages with sidewalk art

We love sidewalk art! Create your own sidewalk masterpieces with chalk to share the messages of Earth Day and spread cheer and community. If you are caring for little ones, this is a great activity for them.

Change your behavior

Small changes result in big energy savings! Turn off the lights when you leave the room, and don't forget to turn off your TV or computer when you aren't using it. Save water and energy by turning off the faucet when brushing your teeth.
