# Saint Paul Public Schools Four Seasons A+ Elementary School

Assessment Date: Monday, April 17, 2023

## **Project Description**

IEA conducted a ventilation inspection in Four Seasons A+ Elementary School by IEA representative, Jack Skluzacek, with the intent of gathering visual observations and overall ventilation information which will assist the District in making informed and proactive decisions to improve and maintain acceptable air quality in the building. This inspection is based upon the Environmental Protection Agency's (EPA's) Tools for Schools IAQ guidelines and the recommended Minnesota Department of Education (MDE) portion of a school district's IAQ management plan. Ventilation verification is also recommended by American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE).

Some observations gathered during the inspection may identify issues which may require additional testing, evaluation, further investigation, or maintenance on the ventilation systems.

The findings, conclusions and recommendations presented herein are believed to be accurate and representative of the building on the date and time of the inspection.

#### **GENERAL COMMENTS**

The analysis and opinions expressed in this report are based upon data obtained from Saint Paul Public Schools at the indicated locations. This report does not reflect variations in conditions that may occur across the site, property, or facility. Actual conditions may vary and may not become evident without further assessment.

The report is prepared for the exclusive use of our client for specific application to the project discussed and has been prepared in accordance with generally accepted indoor air quality practices. Other than as provided in the preceding sentence, no warranties are extended or made.

## **Building Information**

General information regarding the building was collected by IEA during an interview with building maintenance staff. The information gathered during this process is a vital component, as it is helpful in determining how these items may play a role in possible IAQ related issues.

## Below is a summary of the information gathered during the interview:

- Automation controls are managed internally.
- A Building Automation System is present. The automation control software program is Tridium and controls can not be accessed remotely.
- Schedules:

Ventilation operation:

Day:	Occupied?	Start Time:	End Time:
		Tillie.	Tillie.
Monday- Friday	Yes	5:30 AM	8:00 PM
Monday- Friday	Yes	6:00 AM	5:00 PM

Typical occupancy:

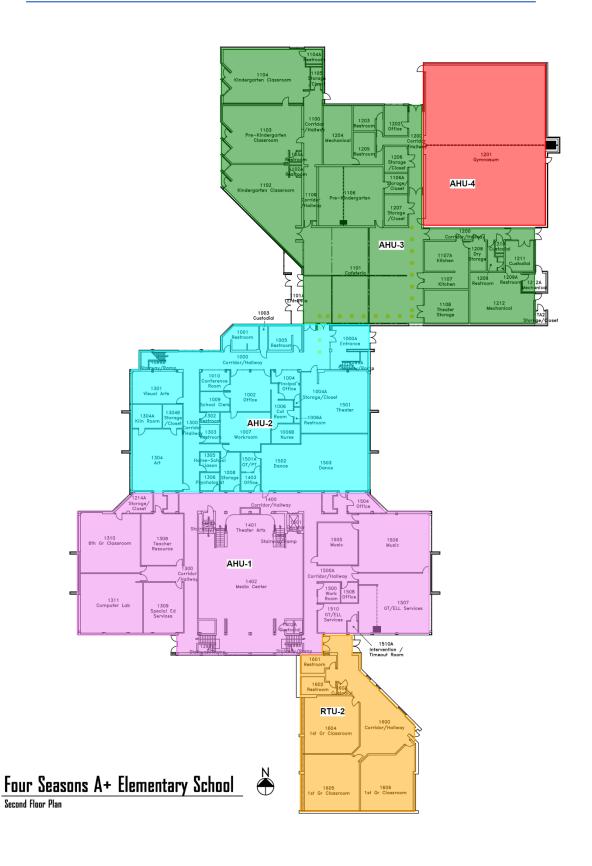

Day:	Occupied?	Start Time:	End Time:
Monday- Friday	Yes	6:30 AM	5:00 PM
Saturday	No		
Sunday	No		
Holiday	No		

- CO2 sensors are not associated with the ventilation system.
- VAVs are present. They are not fan powered.
- Building has variable frequency drives (VFD).
- The heating system is a hot water boiler.
- A cooling system is not present.
- Filters used are:

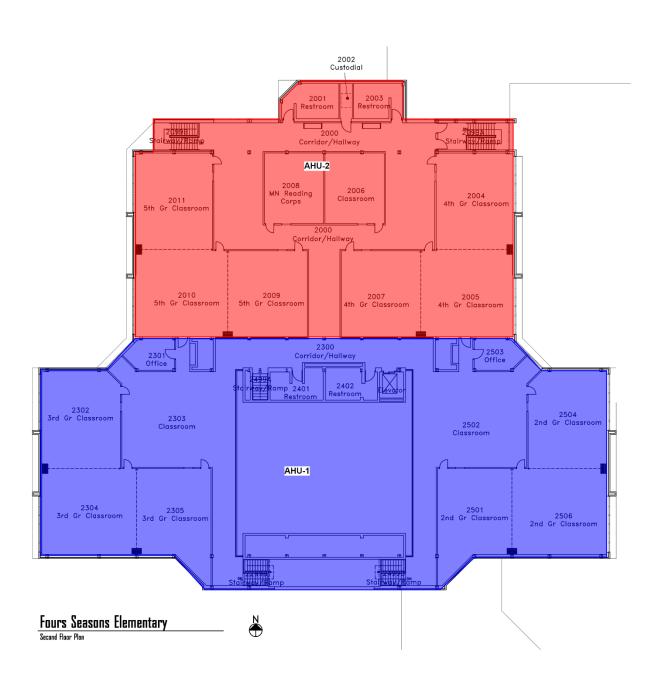

i iicci o doca ai ci		
Filter Type	MERV Rating	
Pleated	MERV 11	

- Filters are changed quarterly.
- Energy Recovery Units are not present.
- Units do not contain system Enhancements.
- Personal air purifiers are supplied for individual rooms. They are 3M.
  - o Location: Nurse's office and classrooms. Unable to verify make and model due to school wide testing
- It is not known whether or not the building was commissioned during the original construction.

## **Air Handling Unit Designations & Service Zones:**1st Floor

## Air Handling Unit Designations & Service Zones: 2nd Floor

## **Assessment**

## **Ventilation System**

The following information was gathered by IEA on Monday, April 17, 2023 with support from the district building representative during the on-site interview. The type of heating, ventilating and air-conditioning (HVAC) system and its assessment is included for each unit below:

	Ssessment is included	Tor each affic below.
Unit Designation:	AHU-01	
Location of Unit:	Mechanical Room	
Areas Served:	See attached map	
	1st and 2nd Floor So	uth
System Enhancements:	None	
Supply System	Outdoor Air	Cleanliness and Observations
<u>Type</u>	Outdoor air intake is	Outdoor air filters are not present.
