 REVISED ESC of CC Inter-district Agreement.msg

K. REPORTS FROM THE CENTRAL OFFICE TEAM

Director of Student Services

Director of Curriculum and Instruction

L. INFORMATIONAL ITEMS

There will be a Work Session on November 8, 2016 at 5:30 p.m. in the Administration Building.

There will be a Regular Meeting November 22, 2016 at 6:30 p.m. in the RHS Library.

M. CONCERNS OF THE PUBLIC AND COMMUNITY ANNOUNCEMENTS

The Board values and encourage public comment on educational issues. Meetings of the Board of Education are for the purpose of conducting Board business in a public setting, with the exception of Executive Sessions for specific purposes defined by law. Board of Education meetings, while held primarily in a public setting, are not designed for extensive public input. Per Board Policy, each participant is limited to five (5) minutes of speaking time.

Anyone having an interest in the actions of the Board may participate during the open forum portion of the meeting. Please identify yourself to

the Board President or the Superintendent prior to the start of the meeting. Should your comments include a request for information or extended dialogue, it may be necessary and more appropriate that a subsequent meeting with the Board and/or Administrative representative be scheduled to fully discuss issues.

The public may offer objective criticism of school operations and programs, but the Board will not hear complaints about school personnel or other persons at a public session. The Superintendent will advise speakers about other channels provided for Board consideration of complaints involving individuals.

N. EXECUTIVE SESSION

Personnel: To consider the evaluation, employment and compensation of a public employee.

O. ADJOURNMENT

Respectfully submitted: Matthew L. Montgomery, Superintendent

FINANCIAL REPORTS - Index

For Month of SEPTEMBER 2016

Schedule

Cash Reconciliation Report	A
• Presents ending cash position for the District for all funds combined, investments and other required reconciliation transactions needed to balance monthly financial activity.	
Financial Report by Fund	B
• A report listing all individual funds established by the District. Information summarized includes receipts, expenditures, and ending cash balances on a month to date and fiscal year to date basis for each fund.	
SM-2	C
• Financial summary of the General Fund comparing budgeted revenues and expenditures to actual.	
Permanent Improvement Fund Report	D
• Financial summary by month of all activity on the PI Fund.	
Food Service Report	E
• Consolidated summary by month of the food service operation for all four school buildings.

Attachment T-4

Adjustments Permanent Appropriations October 18, 2016

The Treasurer recommends that the Board approve the appropriation adjustments in the stated amounts listed below, that these be established at fund level, and authorize the District's participation in any new Grants/Funds if applicable. It is further moved that all expenditures for grants be based upon the budgets submitted to and approved by the funding agencies or the applicable Activity/Purpose Statement.

Subject: Books for Disposal/Resale

Importance: High

Hi Jackie,

Please find below the list of Textbooks for Disposal from Hillcrest Elementary School (we will be selling these). I would like for these to be included on the next board agenda. Please let me know if you need any additional information. Once approved, I can contact our book buyer to come and evaluate for the books that have that value.

QTY: 196

Envisions Math Volume One Workbook Kindergarten

Executive Summary of Forecast

Real estate taxes are the primary revenue source for the District and as documented below, tax values turned down and then flattened over the last six years. Tax revenue represents 89% of our General Fund revenue when including the Homestead and Rollback payments. Based upon historical trends in this revenue category, there is no major change anticipated over the prior years.

The other largest category of revenue is State Foundation Funding. This represents what the lay person considers the payment per pupil to Ohio's public schools. Fiscal 15-16 was the first year of the Governor's biennium budget, which became effective July 1, 2015. This forecast reflects the full implementation of the Governor's budget which will result in a loss of \$413,000 in tangible reimbursement revenue effective in FY17. However, this reduction in revenue continues to be a topic of discussion in the state capital.

The final revenue related factor which is important to the reader of this report is the upcoming ballot initiatives for operating funds. An existing operating levy first approved in 2011 will be up for renewal during this forecast and the need for new, additional operating funds will be on the ballot during the term of this forecast. Both ballot issues will take place sometime between FY 19 and FY 21. The District also had a renewal levy in November of 2015 which was supported by the community, with no new taxes being requested as part of that tax initiative. Neither of the future levies noted above are tied to or needed because of the proposed bond issue which will be before the community in November of 2016. The district's plan for the new and upgraded facilities does not require an increase in staffing and the buildings will follow a building design model that will contain energy utilization.

On the expenditure side the teacher's contract and the classified staff's contract have both been finalized and will be in place for 3 years starting with FY 16. The reader of the forecast will see salary costs trending up over the term of the forecast because of the new contract agreements. In the preceding fiscal years, a salary freeze was negotiated along with an incentivized employee reduction plan which explains the minimal salary increases in these prior years. Increased salaries directly impact payroll taxes which along with medical benefits, which when combined make up 75% of the general fund budget.

The district remains financially stable, operating in the black by utilizing reserves, through Fiscal Year 2020 and is working very diligently to minimize the spending of reserves. Further, the goal of operating within a balanced budget has been accomplished without deficit spending for five consecutive fiscal years, FY 11, FY 12, FY 13, FY14, FY15 and FY 16 (only a \$4,939 deficit), through strategies which contained the escalation of staffing costs; both salaries and health care.

As identified above, the District is facing the challenge of having two levies in close proximity to each other within the term of this forecast. In contrast to this challenge and as a credit to the oversight of the Board of Education, the Revere Schools has had two historical levy cycles in excess of 8 years which is virtually unheard of based on Ohio's funding model. The levy cycle is the time between when a tax levy for new revenue is approved by the community and the point in time when the next levy for new operational money is required and follows.

What is the Five-Year Forecast?

The five-year forecast was created in 1978 through H.B. 412. The purpose of the forecast was three fold:

1. To provide schools with a long range financial planning tool.
2. Create a standard method by which a school's financial condition could be readily assessed by the legislature, the Ohio Department of Education, and the State Auditor's Office.
3. Determine a school district's financial ability to enter into and fulfill contracts with vendors, unions and other parties with whom the school conducts business.

The forecast is required to be updated two times per year which takes place in October and then in May of each year. However, there is no restriction as to the number of times or required time intervals under which updated forecasts can be submitted by a district. The five-year forecast consists of a two page financial statement that provides revenue and expenditure data to the user of the report. The financial report presents three years of historical data and five years of

projected data which includes the current year of operation. Enrollment data is also part of the two page financial statement. Finally, written assumptions, in the form of a narrative, must also be included in the forecast to help the reader understand how the financial data was arrived at.

General Approach to Preparation of Forecast And Related Assumptions

The forecast is developed through a comprehensive process involving the district's management team. They assess instructional needs, facility issues, incorporate identified goals, revisit the strategic plan which is in place and focus on staffing related impacts over this forecasted five year period. Underlying assumptions are also made relative to financial markets, national and state wide economic trends, as well as current and pending legislation. The financial assumptions relied upon in this forecast regarding market conditions were influenced in part, by information from the Federal Reserve Bank, Economic and Market Commentary from the United States Banking System and Economic Strategists such as the Stifel Alpha Advisor. Additional external sources are heavily relied upon in developing the forecast which would include data from the Ohio Department of Taxation, the Ohio Department of Education, the Federal Reserve Bank of Cleveland, trade associations such as the Ohio School Board Association, Summit County Fiscal Officer, investment publications such as the Wall Street Journal and peer review protocols. Critical to this process is the recognition of the fact that every decision made by the District has an impact not only in the current school year but also those years which follow. It is prudent in developing the forecast, that the management team and Board of Education not be risk takers but be diligent in focusing on probable outcomes with both the revenues and expenditures.

Accounting Protocols

The five-year forecast is prepared on a cash basis and not on an accrual basis for both revenue and expenditures. Cash basis accounting recognizes revenue when received not earned and recognizes expenditures as paid rather than incurred. During the active fiscal year, all public schools operate on a cash basis but are required to provide accrual based financial statements for fiscal year end.

All budgets are developed under governmental accounting standards which rely upon the identification of function and object. Function is a term that pertains to the responsibilities for which a department is charged such as instruction of students or maintenance of facilities, to contrast two different areas of responsibility. The object further defines the purpose of the budget underneath the function. For example, salaries and supplies are two distinct objects under the function of pupil transportation. Budgets are developed at the department level so that the unique operating requirements of each area can be better managed and controlled. Finally, the District isolates various activities for reporting purposes by using fund accounting. The five-year forecast reflects only activity for the "general" fund of the District which is the primary operating account. There are many other types of funds under the responsibility of the Board of

Education. A representative list would include a health care fund, a debt retirement fund, a food service fund, athletics, Federal funds and student activity funds such as student council.

Overview of the District

The Revere Local School District has four primary instructional buildings consisting of a high school, middle school, 4th -5th grade elementary building and a kindergarten through 3rd grade elementary building. In addition to the instructional buildings, the district operates a State required pre-school program housed at the 4th/5th grade elementary building, an athletic field house, bus garage and administrative building. Geographically, the district serves a 51 square mile area consisting primarily of residential neighborhoods of a more rural setting without a consistent network of sidewalks. District boundaries fall within Richfield Township, Richfield Village, Bath Township, and small parts of Copley Township and the City of Akron.

Governance of the Revere Local School District is overseen by an elected five member Board of Education and is a separate & distinct unit of government apart from the municipalities which make-up the District. Public schools in Ohio, as is the case with other forms of government, have the power to act as a taxing authority subject to voter approval with the exception of inside millage and an un-voted debt limit of 1/10th of 1% of the District's tax valuation.

The District employs on a contracted basis approximately 335 staff members. The majority of the staff are made up of licensed, instructionally based employees but this number also includes secretaries, administrative personnel, cooks, custodians, drivers and other support staff. The majority of these employees are represented by one of two local unions; the Ohio Education Association or The Ohio Association of Public School Employees.

School Funding

Schools in Ohio had been funded on a similar formula from the mid 1970's until July of 2009 at which time then Governor Strickland introduced a new funding model. This model was never fully perfected nor was it fully implemented. School funding is subject to the biennium budget that is approved every two years as submitted by the current governor and then approved by the legislature. Accordingly, the funding model is a political formula that is dependent upon posturing and compromise and is not fully predictable.

The Ohio school funding model remains and has always been linked to property values. Within that formula there was a penalty calculation called the Charge Off. Under the Charge Off calculation the Revere LSD lost all funding with the exception of a floor (guarantee) that preserved a minimal payment to the District. There was a proposal that the floor be eliminated as part of Governor Strickland's funding proposal and since that time has been a subject of concern in that it would represent a significant loss of revenue to public schools including Revere.

Under Governor Kasich, Governor Strickland's model was abandoned and a new model is being developed and evaluated. To date no significant changes have been introduced with the exception of the elimination of the hold harmless payments for lost tangible taxes. Accordingly,

for all practical purposes, there is no predictable funding model currently in place that can be utilized in predicting future state revenues under this forecast which would address funding gaps.

A brief history of Ohio's school funding formula, expanding on the above information, is covered below.

Ohio's School Funding Formula (Prior to the Adoption of HB 1 Which Became Effective 7/1/09)

Property taxes are a root component of the school funding formula in Ohio. The Revere Local School District has historically been defined as a "Guarantee" district and is a "Zero" state share district. These descriptors are given to the District since the local property values, when compared to other schools, are well above the state average and categorize the system as a high wealth district.

The reader of this forecast should understand that a key component of the State's funding formula is tied directly to wealth.

Consequently, the Revere Local School District as a zero share, guarantee district is impacted in the following ways in relation to funding from the State of Ohio:

1. The District's State Funding was capped and has been placed on a guarantee which means that the funding received from the State of Ohio is frozen, with some minor exceptions.
2. Funding paid to the Revere Schools is not tied to enrollment. The District does not receive the per pupil funding amount as provided for by the State's funding formula and consequently when a student moves into the District no additional funding is received from the State for that pupil
3. The majority of the supplemental programs in the State's funding formula, such as those for special needs students, are tied to the state share percentage. As a zero state share district we do not receive the supplemental funding so badly needed by those students. The programs are still funded by the District but through local tax dollars

The end result is that based upon the wealth of the district as defined by property value we are almost entirely reliant on local property taxes to fund the school system.

The funding model used in Ohio was changed in July of 2009 but these changes are being phased in and contingent upon both the economic outcomes of the State as well as the ever changing political landscape. Accordingly, the reader of these notes should understand some of the funding concepts are under further analysis and in flux.

Ohio's School Funding Formula – Under Governor Strickland Referred to as the Evidence Based Model (HB 1, Effective 7/1/09 to 7/1/11)

HB 1 would have negatively impacted the Revere LSD with a projected reduction of School Foundation funding estimated, when fully phased in over multiple biennium budgets, in the amount of \$1,266,900.

The previous and new funding models have a multiplier that is used to re-distribute the finite State resources to poorer school districts which at the same time penalizes districts such as Revere. That multiplier in this model was called the Educational Challenge Factor which was comprised of economic data pertaining to property value, the community's federally adjusted income, the number of residents with higher education degrees and the level of poverty in the community.

Of critical importance under the prior funding model, a guarantee existed under which schools like Revere LSD were protected from a further erosion of State support. That guarantee was eliminated under this funding bill.

The reader of this report must understand that the Board of Education, Superintendent and CFO/Treasurer recognize the importance of providing equal resources to schools that are disadvantaged. Our concern is not the State's effort to direct more resources to the poorest schools in Ohio but the shifting or reduction of the current minimal State support received by the Revere LSD to the poorer school systems (Robin Hood Effect). Our district has consistently achieved Academic Excellence with Distinction. We accept the fact that additional resources are not available but strongly disagree with a funding approach in which the economic resources of successful schools that are leaders in public education are eroded.

The programming aspect of HB1 also contained a number of unfunded mandates which would have had a significant negative impact on the Revere Schools. This includes programs such as mandatory, without tuition all-day kindergarten and a Family/Civic Engagement staff.

Ohio's School Funding Formula – Under Governor Kasich

Governor Kasich reversed the funding philosophy forwarded under former Governor Strickland. Under his initial biennium budget proposal, there is now significantly greater local dependency on property taxes to fund k-12 education. By transferring the burden to fund schools to the local level, there is a greater dependency on local property taxes which has been declared unconstitutional three times by the Ohio Supreme Court.

Under Governor Kasich's plan the Revere LSD lost almost \$2,000,000 annually in State support when fully implemented. His budget proposals are as follows:

1. Eliminate hold harmless payments for Public Utility tax losses - \$461,437
2. Eliminate hold harmless payments for Tangible Personal Property tax losses - \$1,176,000
3. Reduce school funding payments - \$103,000 (minimum)
4. Not replace Federal Stimulus money previously used to fund public schools - \$158,850
5. Autism and Peterson Scholarships (school choice) funded by local tax dollars - \$100,000

Also contained with the governor's budget bill and HB 136 was significant legislation focusing on and modifying an expanded State voucher program. Instead of funding these proposals out of

the State's budget the dollars supporting the school choice voucher program are coming out of local school tax dollars. The voucher program for regular education students has been postponed but is still under active discussion and is not in this forecast. With a possible second term this will be a closely watched issue.

Summary of Funding Proposals

It is clear that a high achieving school district, like the Revere LSD, will become more and more dependent on local funding. The constituents of the Revere L.S.D. must decide what they want their schools to look like and the services to be provided. From that decision, the school system would either have to increase its dependence on the community through increased tax levy support over the long term or eliminate programming. The other essential component which is already in place and continually being evaluated, is the ongoing process of identifying ways to reduce and contain costs i.e. doing more with less. The Board of Education and administration take this responsibility very seriously.

General Economic Trends

Economic Summary

The assumptions in this forecast in both revenues and expenditures are influenced by the trends experienced in our local and national economies. The reader of this forecast should therefore incorporate the economic information below as factors which influence the assumptions throughout this report.

Summit County's full reappraisal of property values occurs every 6 years and is updated every 3 years. The full reappraisal took place in CY 14 resulting in a 1.27% reduction in the overall appraised, property values. The Five Year Forecast reflects limited growth in property taxes which is held back by inside millage with falling collections corresponding to valuation losses and the modest prospect for new construction which results in new, additional tax revenue. However, there is no forecast for overall sustained growth in taxes above current trends.

The labor market continues to strengthen but at a pace which is slightly below prior growth. GDP for the second quarter is growing with the stabilization of utility costs and economic activity is up. What is difficult to measure is the impact of oil prices on spending trends. The domestic financial conditions have supported more optimistic economic growth rather than a down turn. Finally interest rates which impact housing, although rising, are still at historical lows. There continues to be pessimism relative to the global economy.

The Public Policy Impact of HB 66, SB 3 and 287

HB 66, implemented in 2005 created sweeping reform in the tax structure of the State. These changes had a direct impact on both the economy of the State and on public school funding. The Educational Tax Policy Institute projected that these structural tax changes would result in a loss of revenue to the State by fiscal year 2009/2010 of \$3.5B.

Changes to the tax structure are as follows:

1. Elimination of tangible taxes paid by businesses (forecast line 1.020)
2. Phase out of the Corporate Franchise Tax over 5 years
3. Replacement of the temporary 1 cent sales tax with a permanent ½ cent tax increase
4. Enact an untested Commercial Activity Tax (CAT Tax) on gross business receipts

SB 3 and 287 enacted by the 123rd General Assembly reduced the assessment rates for certain tangible personal property of electric utilities and all tangible personal property of gas utilities. For electric utilities, including rural electric utilities, all property except transmission and distribution property will have its assessment rate reduced to 25 percent. All natural gas personal property goes to 25 percent from 88 percent. The two changes combined have been estimated to reduce property taxes by about \$300 million on a state wide basis. The actual impact to the Revere LSD was a total loss in assessed value of \$32 M.

HB 66 did include a hold-harmless clause which was intended to insulate schools from the tax revenue losses incurred by the elimination of the tangible tax value and public utility value. Under Governor Strickland's budget bill the hold harmless payments were largely eliminated. See additional notes above under HB 153.

Enrollment

Three of the primary communities that populate the school system, Bath Township, Richfield Township and Richfield Village, have comprehensive land use plans in place which control the growth of residential development. Consequently, the District is not experiencing significant growth in student enrollment in these areas. However, because of the high quality of life in our community, which includes the school system's academic achievement, our District is a desirable location and will continue to experience modest growth in enrollment over time. The one exception to this conservative growth pattern is the southern-most region of the district along Route 18. This area is growing and allows for high density residential developments. Also looming, is the Briarwood Development in the northern area of the district off of Route 303. Plans are not yet finalized for this area but represents an area for potential growth in housing. This forecast does include very modest growth in new enrollment in FY 2017 and all subsequent years. These projections include both the revenue from new construction as well as the expense of additional teachers from the route 18 area.

The Board as approved the placement of a bond issue on the November 2016 ballot for a new High School and a new Bath Elementary. The architectural firm hired by the Board projects consistent, slow growth. All day kindergarten has had a positive impact on enrollment. We are also in the process of implementing an updated and current strategic plan.

Facilities

The District continues to focus on an ongoing facilities maintenance program and those costs are partially reflected in both the purchase service and supply budgetary categories. There is a clear recognition by the Board of Education and the administration of the age of our buildings. And as

mentioned under enrollment above we are finalizing both a facilities and strategic plan. A common link in both plans is facilities. This forecast does not reference specific building initiatives in that building projects are typically funded by the permanent improvement fund or bond initiatives and not the general fund. A facilities committee was established by the Board of Education in late fall of 2015 to begin more formalized facility discussions which have culminated in a recommendation to the Board. This included a facilities finance sub-committee and facilities sub-committee which were later combined to make final recommendations. The District selected Lesko Architecture for facility planning.

The District's facilities are old and incorporated into this forecast are line-item expenditures for maintenance supplies and purchase services. This increasing investment is necessary in order to insure a safe and productive instructional environment for staff and students. For these improvements the District is also reliant upon a Permanent Improvement levy with an annual collection of \$1.3 M.

There is one major step forward that has occurred in the area of facilities. Specifically, the District applied for and was awarded an energy improvement project under HB 264 through the Ohio School Facilities Program in 2012. This \$3.2 million dollar initiative was funded through un-voted bonds at a 0% interest rate subsidized through a Federal stimulus program. In addition, the debt service payment is funded by the energy savings generated from the "green" facility improvements.

Expanded Fiscal Overview

Since proclaiming a budget deficit of \$8 B at the start of his term, the Governor's proposed biennial budget slashed funding for K-12 education across the State. The loss realized by the Revere School District was \$1.6 M in hold harmless payments for Public Utility and Tangible Property taxes. In addition, the District lost an additional projected \$200,000 under the State Funding Formula in FY 14. Through re-appraisal in CY 11 and the resulting loss in taxable value the District lost \$440,000 in property taxes. Now with the new biennium budget starting in FY 16 the hold harmless reimbursements and loss of state funding continue to be eroded.

The above losses in revenue exclude two other key areas in which there is significant discussion by the Governor and legislators. Those two areas are first, school choice/voucher programs and second, further mid-biennium budget cuts. The school choice voucher proposal for regular education is not incorporated into this forecast but remains a very serious concern because these voucher plans are funded out of local tax dollars. There are currently two existing voucher programs benefiting special education students, the Peterson and Autism Scholarship programs, are in this forecast. The projected loss in local revenue for these two programs in FY 16 is approaching \$200,000 per year.

The District continually needs to remind our constituents that the financial challenges facing us not only relate to inflationary expenditure growth which compounds over time but of much more significance is the loss of revenue facing the district from legislative and tax law changes, because these items are outside of our control.

The District was on the ballot three times for new operating money, with the 3rd attempt on May 3, 2011 passing. This levy was an Emergency Levy for a 10 year term collecting \$4.7 M when

fully phased in. The community also supported the renewal of an existing emergency operating levy in November of 2015. The Board of Education, the administration and our students feel very fortunate to have received this level of support from our community. In this forecast there is no anticipated need for new, additional operating revenue but there is a renewal levy (no new taxes) which will be on the ballot in CY 15.

The reader of the forecast will see that the District will be able to operate without additional revenue for fiscal years 2016 through 2020. The goal of the Board of Education is to make budgetary decisions over the upcoming years that will enable the district to live within our current resources through that period.

The students, faculty and parents of the Revere L.S.D. have distinguished themselves with extremely high and consistent academic achievement. We believe that the parents and community recognize the need to maintain and build upon our academic success which resulted in the approval of new money in May of 2011. There is also a direct link between strong schools, property values and strong communities which we believe also played a significant role in the May approval.

Overview of the significant assumptions and facts in this forecast are as follows:

Revenue

1. Ohio does not have a finalized school funding formula and there is discussion in the forecast about the potential negative impact of future funding changes..
2. Tangible Personal Property Tax hold harmless payments will be phased out. This will result in a total realized loss of \$1,477,000 in revenue for rever.
3. Revenue from casino operations was received for the first time in FY 2013 and was \$301,000 in FY 15. This is an off-set payment.
4. The new housing developments along Rt. 18 will result in new revenue which is included in the forecast but does not have a dramatic, immediate increase but will occur over time.

Expenditures:

1. With retirement system changes for licensed staff going into effect in July of 2015, additional retirements were submitted. This impacts both replacement salary costs and severance costs starting in FY 16.
2. From a budget/cost perspective, the District will continue to implement cost savings measures and re-examine the purchase and delivery of services in containing costs.
3. All Day Kindergarten on a tuition basis is reflected in the forecast (both expenditures and revenues). In FY 15 all-day kindergarten class was added so that there are currently 6 sections.
4. Proposed voucher costs are not included in this forecast beyond the voucher programs for special needs students which are the Autism and John Peterson scholarships.
5. New instructional staff members are added effective in FY 2017. These increases are based upon enhanced instructional programing and the housing development along Rt. 18 in the southern portion of the District. There has also been additional staffing needed for changes to building academic schedules.
6. In developing the annual budget, the District utilizes a planning tool that incorporates a line item by line item comparison showing historical and requested expenditures.

When finalized the budget booklet provides detail behind each budget line item and those detailed expenditures tie into category totals for the current fiscal year with a comparison to 4 prior years. This is a public document distributed to key stakeholders in order to provide transparency to the budget process and current year planned expenditures.

Other Considerations & Comments

1. The forecast is a fluid document and decisions impacting future years on the expenditure side will undergo further discussion and consensus building on the part of the Board before being finalized.
2. The Board of Education does utilize a Finance and Audit Committee to discuss the forecast and related assumptions. The forecast is representative of the input from a broad range of individuals and is not the "Treasurer's" forecast.
3. The reader should note that for FY 11, FY12 and FY13, FY14 and FY 15, the District operated in the black. This was only accomplished with the support of additional revenue from the new levy which offset the revenue losses identified in this forecast.
4. The District's ability to avoid spending into reserves is a significant factor which will lengthen the levy cycle.
5. When reviewing the difference between revenues and expenditures for FY 12 and FY13, it is important that the reader factor in the revenue from the new operating levy which represents \$2.35 M in additional resources in each of those years. Without that new revenue source, the district would be in a position of significant deficit spending.
6. Note expenditures and revenues were both increased by \$3.5 M based on the need for an internal fund adjustment in FY13 which was an anomaly and does not occur in FY 14 forward.

INCOME ASSUMPTIONS

Forecast Line 1.010
Forecast Line 1.020

General Property Taxes (Real Estate)
Tangible Personal Property Taxes

Property taxes are levied and collected on a calendar year (CY) basis in contrast to a school district's fiscal year which runs from July 1st to June 30th of each year. Compounding the complexity of forecasting tax collection revenues both the effective millage rate and the total assessed valuation change from one year to the next. Consequently, property tax revenues received by a school district are the combination of two different tax years' assessments and valuations. Changes to value and assessment rates occur primarily as a result of new construction, reappraisal, tax appeals received by the county and levies newly approved by voters. The State of Ohio requires that residential and commercial property be appraised once every three years. For Summit County, CY 2014 was a full re-appraisal, after which this rotation between full and triennial updates will continue every three years.

Of critical importance is that the reader of the forecast understand, that as noted above the CY 2014 re-appraisal did occur and the valuation of the District dropped by 1.27% for a loss in value of \$11.5 M. This reduction in value will result in a loss of tax collections in the amount of \$65,000 per year. Although this is not a significant loss of revenue it is important

based upon the trend which it represents. See notes in the Executive Summary section on page 3.

Also impacting tax revenue is the high volume of tax appeal cases both residential and commercial which were submitted at unprecedented levels. For these cases in which the property owner seeks a reduction in the tax value, there is no formal process through which the county or the Department of Taxation communicates the outcome of the appeal.

The forecast assumes there will be minimal new construction growth at a rate of .5% per year impacting future tax collections.

The increase in property tax value which results from higher appraised values does not generate new revenue because of HB 920 which was passed in the 70's. There are some exceptions to this rule, but HB 920 in simple terms requires by law that when property values increase through re-appraisal that the millage is reduced so that the revenue received by a school district from the community as a whole remains flat. Individual tax payers may however have a different experience, so that some tax bills may go down and others go up at different rates, but as a community the collection is flat.

Tax value growth from new construction or new value does provide new revenue as it is recognized by the county and added to the tax rolls. Based upon overall economic conditions it is predicted that historical trends in new property growth will not occur in the near term as has been the case historically in the communities comprising the District.

Summary

Based on the general economic outlook and two successive reappraisals resulting in a loss of assessed value, our primary revenue source which is property taxes, are projected to be close to flat.

The District was fortunate to receive support for a new operating levy as well as a renewal in calendar year 2011. The renewal levy on the ballot in November of 2015 for \$4.6 M. Future property growth is forecasted at less than 1% until FY 20 at which time new construction revenue was incorporated from the new development on Rt 18, the Miller Farm.

Forecast Line 1.035

Unrestricted Grants-in-Aid

This forecast line represents revenue received from the State of Ohio for the education of our resident students. The District was previously protected from a loss of revenue from the State by what was referred to as the funding guarantee. However, the elimination of the guarantee continues to be a discussion in Ohio in relationship to school funding. It is significant to note that under two consecutive governors the district would have lost more than \$1M in state funding and one governor was a democrat and the other a republican.

Without the guarantee in place it is predictable that the District will continue to lose more funding in the following years. This loss in funding is driven by the District's above average property values and the deduction/penalty received under the funding mechanisms. It is a misnomer that the District receives a per pupil funding amount typically referenced in the various funding proposals. As of the submission of this forecast funding for future fiscal years is unknown and still an issue being debated by the legislature.

The current funding amount from the State in FY 17 is based upon information on the Ohio Department of Education's payment web site.

After the loss in FY 16 over FY 15, the assumption into future years is that State revenue is flat lined.

Forecast Line 1.040 Restricted Grants-in-Aid

The District applies for targeted funding for specific programs and purposes. This revenue source fluctuates from year to year and represents a very small percentage of total operating revenue received.

Forecast Line 1.045 Restricted Federal Grants-In-Aid SFSF (All 3200's)

For historical reference only, this revenue line item was created to show the revenue received under the American Recovery and Reinvestment Act. The State of Ohio elected to use these federal funds to prop-up k-12 public education funding in light of the State's economic challenges. These stimulus payments were received for just fiscal 2010 and fiscal 2011. At the end of fiscal 2011 this funding source was eliminated. The monies were to be used to support the general operational costs of the district. The annual allocation for FY 11 was \$147,808 excluding funds directed toward special education. There is no current revenue on this line item.

Forecast Line 1.050 Property Tax Allocation

For all residential home owners the State of Ohio applies the homestead and rollback credits equal to 12.50% of the tax bill. This amount is paid by the State to the public entity that levied the tax. Note this was phased out on new levies approved on or after CY 2015. These amounts are semi-annually aggregated and paid as a reimbursement by the State to the schools in Ohio. This payment is one of the primary components of line 1.050. The homestead/rollback revenue mirrors for the most part changes in value that take place in residential property. Changes to the rollback and homestead exemption amounts will mirror changes to property tax values and fall under the same assumptions as taxes.

With the elimination of tangible and public utility taxes, which were replaced by the CAT tax, Commercial Activity Taxes, schools were to be held harmless from revenue losses attributable to the changed tax structure. These hold harmless provisions remain under evaluation for possible total elimination by the Governor and legislators. The concept of hold harmless payments has been a legislative topic of debate for four years. Under Governor Kasich, the Public Utility payment was fully eliminated in fiscal year 2012 resulting in a loss of \$461,437 and Tangible Personal Property Tax (TPT) will be phased out with a total loss of revenue in the amount of \$1,177,000. At stake is an additional \$300,000 loss in TPT which will be eliminated in FY 16 but reflected in the unrestricted grant line in the forecast as an assumption.

With a loss in assessed value this revenue category is not anticipated to increase and at best will flat line or see minor reductions.

Forecast Line 1.060

All Other Revenue

This line item is made up of revenue from investment income, excess cost reimbursement, tuition, all day kindergarten tuition, contracted services revenue, TIF payments and other miscellaneous fees. Under fund accounting, the District does invest other monies in addition to general fund balances but those earnings are not all allocated to the general fund and reflected in the five year forecast. This revenue category is anticipated to remain flat with the exception of kindergarten tuition from the one added class of all-day kindergarten. The assumption is that this revenue line will grow and then flat line are also based upon the wide range of variables that impact this category such as interest income. This line represents only 3% of the general fund revenue

Forecast Line 2.040

Operational Transfers In

Forecast Line 2.050

Advances In

The District routinely advances cash to other funds which have not received the full cash allocation approved by the funding source. This typically occurs with Federal or State funds during the course of the fiscal year. The amount advanced is then repaid in the following fiscal year when the full funding is received from the governing agency. For the purpose of this forecast, historical advance amounts were utilized for the projected revenues. Said differently, transfers and advances represent tools used in no-profit accounting to manage cash flow related issues.

EXPENSE ASSUMPTIONS

General Assumptions for All Expense Related Projections

- Based upon the enrollment projections listed in the forecast overall enrollment changes are very small. A new development started off Rt 18 is anticipated to change what previously was our stable enrollment history. However, not all class sizes are the same size and as students move from grade to grade we need to track the enrollment impact.
- The funding formulas do not technically provide revenue on a per pupil basis so that enrollment does not have a direct impact on revenue. This is not to say that future funding methods may change in this regard.
- Percentage increases in this category were developed after evaluating historical trends, the economic environment, and key expenditure areas where specific inflationary trends were identified such as health care.
- A detailed general fund Revenue and Expenditure Plan is developed each year for the upcoming school year and for adoption by the Board. This report is prepared through a building and department based budgetary process and contains a line item budget for all general fund expenditures. It is from this report that the expenditures for the

current school year are developed (FY 2015-16) and this information also is heavily relied upon in developing this five year forecast.

Forecast Line 3.010

Personnel Services

Personnel service expenditures represent compensation paid to all staff members including substitutes, part-time employees, board members and all full time employees. The majority of the staff is represented by one of two labor unions. The licensed staff, except administrators, is represented by the Revere Education Association which is part of the National Education Association and the classified staff is represented by the Ohio Association of Public School Employees (OAPSE).

The REA contract and the OAPSE contract expired on June 30, 2015. Both contracts were negotiated with a 2% base increase. When the step increase is added the total annual cost increase vasilates around 3% based on our staff's placement on the step schedules. The accounting method through which we are paying substitutes moves this expense from salaries to purchase services and is in the amount of \$493,000. In FY 16, the new method of handing substitutes offsets the increased salary costs associated with the contract settlements.

The reason staffing costs, in part, have become stabilized in the last five years, is attributable to an employee severance plan initiated by the Board in 2013 and based upon the number of retirements in FY 14 and FY 15 based upon changes to the teacher retirement system. These vacancies enabled the Board to hire replacement staff at lower costs. In addition, there were agreements with staff through which a 2 year salary freeze was implemented. All together these opportunities resulted in a turnover of approximately 45, higher cost, staff members.

The forecast also includes an increase in salaries attributable to staff advancing in educational degrees and or block credits. This cost is estimated to be on average of \$40,000 per year.

Forecast Line 3.020

Employee Retirement/Insurance Benefits

Expenditures within this category include all medical premiums, payments to the SERS and STRS retirement systems, Medicare, workers compensation and unemployment insurance. Retirement contributions and workers compensation are true payroll taxes and change as wages are modified at a similar percentage.

Payroll cost increases are tied directly to salaries as percentages of payroll costs.

The District has joined a health care consortium to help contain health care related costs, starting with the renewal effective July 1, 2008. Beginning with the health care renewal on July 1, 2010, the District, through the consortium combined claims with the other member districts. We pooled claims to level swings in our health care renewal rates which have a direct impact on this segment of the budget. The overall renewal rate as of July 1, 2017 was 5% for Revere as a member of the consortium.

With the prior full negotiations completed with both unions and the agreed upon 3 year contracts there were very important health care savings generated through plan design

utilizing wellness. However, it is most significant that wellness provisions that were agreed to will provide a long term cost containment strategy in health care costs through reduced utilization and improved employee health.

This forecast assumes no premium holidays in fiscal year 2015 forward. The determination of a holiday is based upon plan funding at the mid-year point. There was a premium holiday in FY 14. Also factored into the forecast is the additional revenue generated by increased premium contributions by the staff under the negotiated agreements effective July 1, 2013 and forward. Under both collective bargaining agreements premium contributions are increasing annually over the 3 years of the agreements.

District medical plan renewals have been below national industry standards and reflects the success of our medical consortium and plan design which includes wellness. It is assumed that future trends will be at higher annual percentage increases more in the range of 7% to 10%.

Forecast Line 3.030 Purchased Services

Purchase services includes expenditures for utilities, tuition paid to other districts, repairs and maintenance, contracted professional and technical services, open enrollment costs to other districts, post-secondary fees and excess costs for special education.

As mentioned above, utilities are a significant purchase service expense. To reduce our energy costs the district applied for and was approved for an energy reduction program under state law called HB 264.

Not included in this forecast are the costs associated with the various voucher proposals and existing school choice programs which are under review. This includes the School Choice Voucher program which was proposed under House Budget Bill 136. This bill depending on the specifics of its implementation and how it is phased in will have a major impact on the forecast especially if you evaluate the impact of the voucher payments over a period of time such as five years. In analyzing the bill it is also important to know that the dollars to fund the proposed vouchers do not come out of the State budget in Columbus but come out of local revenue i.e. our constituent's property taxes. Further, the total cost of the vouchers may be in excess of four times the amount we receive per pupil from the State. Vouchers for special education students under the Peterson Scholarship and Autism Scholarship are in this forecast.

It is projected, based upon historical costs, that purchase services will increase at 6% annually.

Forecast Line 3.040 Supplies and Materials

This category of expenditures includes instructional supplies, text books, library books including periodicals, office supplies, software, building maintenance supplies and vehicle supplies.

The primary factors impacting variances in this category over prior year actual would be diesel fuel, bus repair parts/supplies the planned textbook adoption cycle and other instructional supplies.

In the FY 2017 budget is an increase of \$700,000 in the area of instructional supplies and materials for curriculum adoption purposes as directed by the State. These purchases, to the extent budgeted, were not completed by the District based on the continuing curriculum debates on methodologies.

Transportation supply costs are estimated to increase over the term of the forecast to cover the increased cost of fuel, tires and repairs at a rate of 4% along with the other supply categories. Finally, there is no decision relative to the costs associated with on-line testing and whether or not the estimated fee of \$30 per student will be passed along to individual schools by the State. The community should be aware of this new category of expenditure potentially charged to local schools but it is not in the forecast.

Forecast Line 3.050

Capital Outlay New and Replacement Equipment

Under the equipment forecast, line funds are allocated to purchase everything from desks, to microscopes, to computer technology to buses. The defining parameter is that the equipment being purchased must have a usable lifespan of five years. The District has a pre-defined replacement cycle for technology which must be upheld in order for these items to not become obsolete. The increases in this category represent the implementation of one on one computing possibly in combination with BYOD. In addition, in FY 17 and FY 18 there would be an investment in infrastructure of \$130,000 in each year.

The district has a fleet of over 40 buses and historically we have replaced two per year utilizing the permanent improvement fund which saves resources within the general fund. In FY 15 we purchased 4 buses, two of which were charged to the General Fund. Additional bus replacements are built into this category in future years based upon the age of our fleet.

Throughout the forecast there is a planned replacement cycle for classroom technology. This includes computers, smart boards, and LCD projectors. The district is fortunate to have smart boards in every classroom and has over 1,000 desktop computers including laptops in that number. Using those numbers that is a replacement cycle of 6.25 years. This burden is shared between the permanent improvement fund and the general fund.

The District has migrated to virtual servers as a cost savings initiative. The District previously had 15 servers which had to be replaced and these servers are spread out throughout the district. Based on advances in server technology the current servers were replaced using virtualization working through the NEONET computer consortium. This eliminated the reoccurring replacement cost of \$105,000 for 15 servers on a 5 year cycle

As mentioned above the new servers will also give the district the capability of moving into the virtualization of desktop computers, if feasible. The infrastructure needed to implement virtualization (made possible through the new servers) is estimated to be the \$175,000 and will enable us to generate significant savings relative to the replacement of desktop computers.

Also being continually evaluated in this forecast is the acquisition and implementation of desktops to accommodate the requirement of on-line testing for all students. This is a new initiative and unfunded mandate that schools in Ohio must prepare for.

Finally increases in this budget area include equipment for the facilities department i.e. trailer, utility vehicle and new van.

Forecast Line 4.300

All Other Objects

This category includes liability insurance, performance bonds, Summit County Auditor and Treasurer Tax Collection charges, banking fees, audit fees and the Summit County Educational Service Center deduction. The greatest single expenditure in this category is the county Auditor and Treasurer fees. The fee, based upon the November renewal levy is also projected to increase since the district will be on the ballot. This fee represents the costs associated with tax collection and are passed along to the public entity levying the tax. In election years when the District is on the ballot these fees increase to cover the cost of the polling locations. Also, a newly budgeted item in this category is the debt payment associated with the HB 264 project in the amount of \$215,000 which is offset from utility savings. Also added is the lease payment with Apple Finance for the devices purchased to support the one on one MacAir adoption grades 7 to 12.

Forecast Line 5.010 Forecast Line 5.020

Operational Transfers Out Advances Out

Within these categories the transfer and advance of funds from the general fund to other local, state, and federal grants are budgeted. Transfers are funds that are moved out of the general fund and into other funds without expectation of repayment. The primary example for the Revere LSD would be athletics. The general fund supplements the athletic fund each year. Typically up to \$50,000 is needed to balance the athletic budget which relies on primarily ticket sales to fund its programs. Advances are timing dependent and are temporary movements of cash from the general fund to another fund with an expectation of repayment. A prime example of an advance would be a Federal grant wherein the funding agency delays disbursement of the full grant amount.
