

COVID OVER-THE-COUNTER (OTC)/ AT-HOME TEST KITS

BEFORE YOU THROW OUT “EXPIRED” TESTS

- Most at-home tests can be safely used past the date on the box.
- Check to see if your COVID-19 tests' expiration dates have been extended on the FDA's [At-Home COVID-19 Test page](#).
- Replace your tests with fresh ones as the extended expiration dates approach.
- **If you have to, you can use an expired test until you can get new ones, as long as the control line is working.**
- See your test instructions for details about the control line.
