

You will find information on local career-technical (CT) school programs, tours, open houses, and applications. In most cases, students attend the CT school associated with the district in which they are currently living for their 11th and 12th grade years. Aside from attending a CT school full-time, many schools allow GOVS students to choose a half-day option where they would continue to complete academic coursework online with GOVS and participate in career-based education at a CT school. Please contact Mrs. Julie Burke (A-L) or Mrs. Manchak (M-Z) with any questions.
