Policy EEAD: SPECIAL USE OF SCHOOL BUSES

Status: RESCIND

Original Adopted Date: 02/06/2023 | **Last Revised Date:** 02/06/2023 | **Last Reviewed Date:** 02/06/2023 **Rescinded Date:** 02/06/2023

Although the regular transportation of students to and from school will always be given first priority, school buses may also be used to take students to and from school-sponsored activities.

Driving regulations, safety rules, and insurance coverage will be the same for special uses as for regular student transportation to and from school. Regular bus drivers will, whenever possible, be given priority in assignments.

The transportation supervisor will work with the appropriate school administrators to establish regulations governing transportation for special district programs.

USE OF BUSES BY NON-SCHOOL GROUPS

It shall be the policy of the Deuel School District that local organizations may use district-owned vehicles for the transportation of district children, under the following conditions.

The cost to the organization desiring to use a bus for transporting school aged children shall be actual cost per mile traveled, less driver costs. The organization will assume the responsibility for furnishing a licensed bus driver. If the school is asked to furnish the driver, it will be done at the same rate as school activity trips.

THANK YOU FOR THE OPPORTUNITY

We are thrilled for the opportunity to partner together on your project. The terms and conditions below outline a working understanding for the project journey and is intended to set both organizations up for success. If you have questions or concerns, please contact us directly.

QUOTES AND PRICING

Please review your final project plan and quote to confirm it will fit your space and workplace needs. Quoted prices are good for 14 days from the date of the proposal. Due to the volatile transportation conditions in 2022 & 2023, freight will be billed based upon actual. Unless otherwise noted, prices quoted do not include sales, use, excise, or other applicable taxes. Any applicable taxes will be added or adjusted on the invoice at the time of billing. Buyers exempt from taxes should provide Innovative with copies of exemption certificates prior to placing the order.

DESIGN AND ORDERING

Innovative's Design team will work with you and/or your team to design a space that is customized to your budget, style and unique needs to transform your space/s and bring your vision to life. If you do not want to move forward with us on a project, the design work remains the exclusive property of Innovative Office Solutions and we reserve the right to invoice you for the design costs incurred.

NEED FOR DEPOSITS

A deposit of 50% of the order is required on all projects in excess of $10,000. The deposit is essential as our vendor partners require payment from us when placing orders. Once the deposit is received, we will place your order. Payments must be in the form of check, ACH or wire transfer. Credit cards are not accepted for deposits or other furniture payments over $5,000.

PAYMENT TERMS

Our Innovative team will send invoices following delivery and installation completion. To ensure a seamless accounting experience, please send payment within 30 days of the invoice date. It is not uncommon for a project to be substantially complete, except for a few punch list items. We appreciate you paying your invoice in full. Innovative will complete your project when outstanding items and/or parts become available.

CHANGES

Once we receive the sign off on design plan and proposed budget, your order will be placed. Due to the customization of many projects, once orders are placed, most products are not returnable. Modifications or cancellations may result in cancellation or restocking charges by our manufacturer partners. Unfortunately, we will need to invoice you if such charges are incurred. Where a Scope of Work is included with this Agreement, costs resulting from changes in the scope of the project, including any additional requirements or restrictions placed on Innovative will be added to the project price. When Innovative becomes aware of the nature and impact of the change, you will be notified, and all project paperwork will be updated as necessary. In this instance, a revised quote will be generated for signoff.

PROJECT DELAYS AND STORAGE

We understand projects are occasionally delayed. This may mean you are unable to accept product from us as scheduled. When this occurs, Innovative will store your items at no charge for up to 30 days to provide you with additional time to ensure your space is ready for installation. After 30 days, we will provide a quote to continue to store your product, as we want to make sure it is safe and in a secure location.

DELIVERY AND RECEIPT OF PRODUCT

We will contact you once we are notified your product has been shipped and is on its way. Your product will be delivered during regular business hours. In order to provide an exceptional delivery experience, we ask that you inform us of any unique circumstances that a driver or install team may face during a delivery. This may include such challenges as a downtown location or the need for a liftgate. Providing us with this information ensures that product is delivered to the proper location within your facility and will reduce the chances of damage to any of the items.

We kindly ask you to inspect all product directly shipped and/or delivered and brought onto the job site as scheduled. If you discover product has been damaged or shipped in error during the receiving process, please notify us within 24 hours to ensure that appropriate claims can be

filed. After product arrives at your site, any loss or damage caused by other trades or by weather, fire or other elements is your responsibility.

INSTALLATION PREMISES CONDITIONS

It is our sincere priority to make sure the installation of your product is timely, professional, and as efficient as possible. To facilitate this, we ask the site to be clean, clear, and free of debris prior to installation. The jobsite should have proper lighting, heat, power source, hoisting and/or elevator service and suitable unobstructed dock space and a secured staging area. The job site shall also be free of the interference of other trades in the area where installation is taking place.

We understand in certain situations spaces are not ready for installation when the initial date was scheduled. If this is the case, please provide at least a 48-hour notice so we can keep your project on track to the best of our ability. If proper, timely communication does not occur, unfortunately additional charges may be invoiced to cover costs incurred. Our Installation Team installs product based on the final approved layout. If there are any changes to the final plan, please make sure these are addressed prior to the installation date.

WARRANTY

Each manufacturing partner of Innovative has a warranty standard. For more information on warranty details, reach out to your Innovative Account Executive. Warrantied product replacements may require billable installation services.

CLAIMS

Innovative will help resolve claims concerning damaged and/or defective product, materials and/or workmanship made within the warranty period as stated by the manufacturer, supplier, or fabricator. We will arrange for the repair or replacement of any damaged or defective items and/or installation to make sure the project is successful.

FORCE MAJEURE

We will do our absolute best to ensure we can secure and install your product, but if there are reasons beyond our control, Innovative will not be liable. Reasons include but are not limited to, strikes, pandemics, embargos, war or other breakout of hostilities, acts of God, machinery breakdowns, delays of carriers or suppliers, and domestic or foreign governmental acts or regulations.

GOVERNING LAW

This agreement shall be governed by and construed according to the laws of the State of Minnesota.

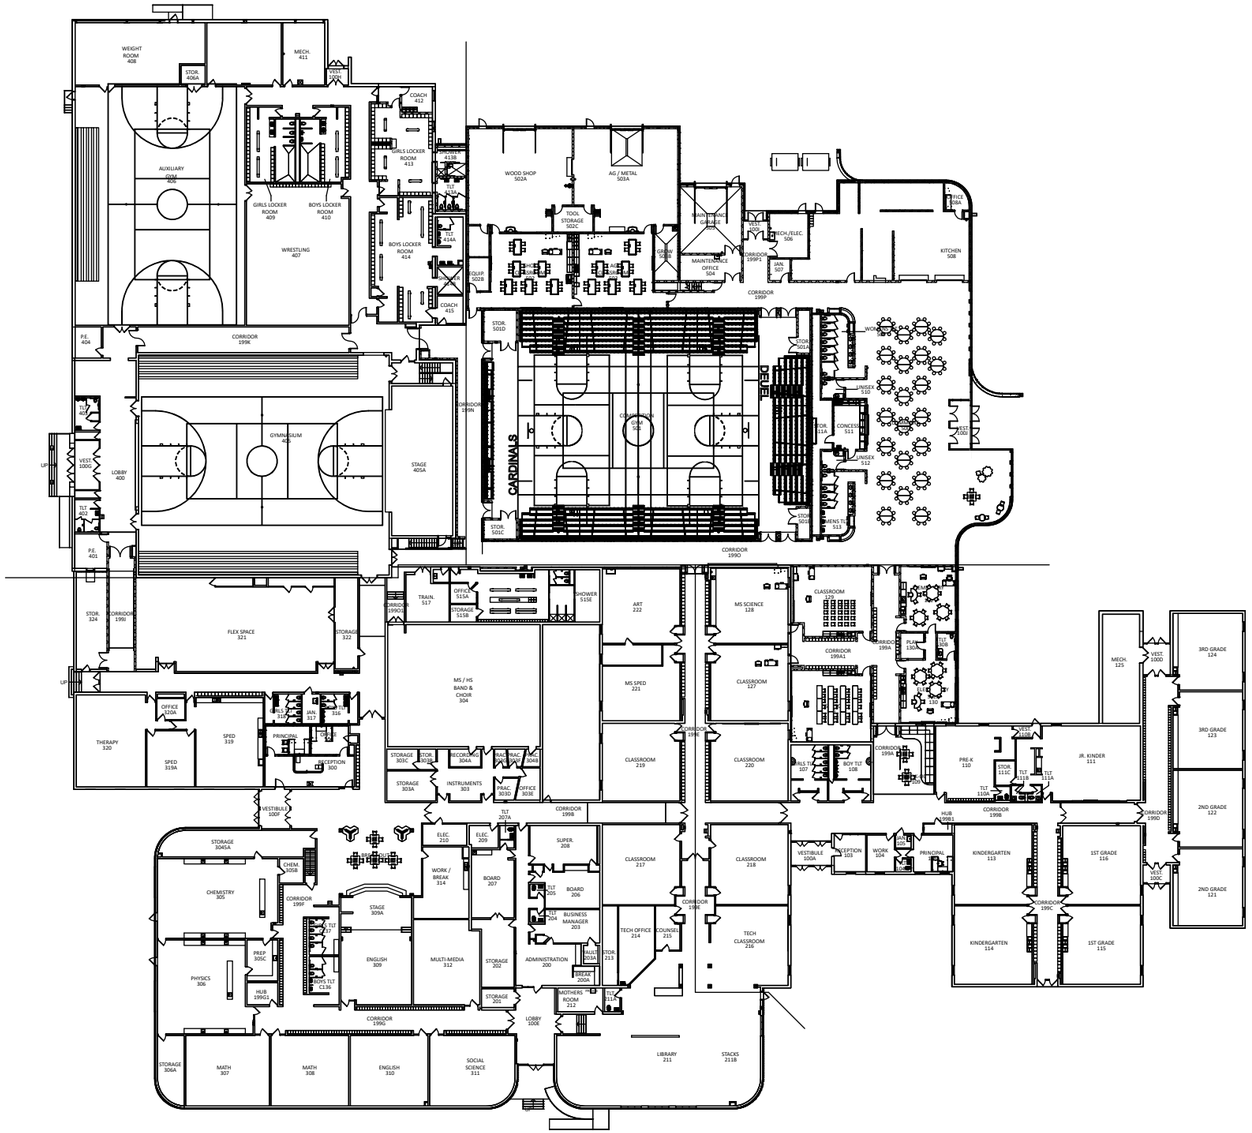

ARBITRATION

We want to make this a true partnership and resolve any issues that may occur. Any controversies or claims arising relating to this contract will be settled by arbitration administered by the American Arbitration Association. They will fall under its commercial rules, and judgment on the award rendered by the arbitrator(s) may be entered in any court with authority. The award shall include the costs of arbitration and the legal fees of the prevailing party.

THANK YOU FOR YOUR PARTNERSHIP

Innovative Office Solutions is built upon a “relationships matter” belief system, and every project matters to us. We are thankful for the opportunity to partner together, and we look forward to serving you!

A&E Specifications

The mixer shall be a compact, rack-mountable digital mixing solution without physical fader strips, but shall include 16 mono and 3 stereo line input channels mixing to 12 mix outputs and 4 stereo rack FX engines, 4 DCA groups and 4 Mute groups. All output mix channels shall contain Insert, Parametric EQ, Graphic EQ, Compressor, and Delay. Signal delays in the system shall be adjustable in Milliseconds.

Pre/Post fader routing and assignments, processing of signals, level sends, FX sends, DCA and Mute Groups shall be accessed and adjusted via a 5-inch colour touchscreen provided on front panel of the mixer or from Apple iOS touchscreen devices.

There shall be a Channel page on the touch screen replacing physical fader strips with different tabs providing access to Input Channels, FX, Groups, Mixes, DCA and Mute Groups and control of level, mute, pan and PAFL for the selected channel.

And fully-customizable page giving access to channels and settings tailored to the user and the specified application. Several ‘widgets’ shall be assigned to this page, these shall include channel levels, mutes and assignment on/off switches and shall be arranged to suit the user requirement.

The front panel of the mixer shall include 16 custom select keys and indicators, giving access to any combination of user defined input channels, output channel mixes, FX sends, FX returns or Main mix and also 15 assignable SoftKeys giving access to DCA mute masters and MIDI control as well as Tap Tempo, Instant Scene Recall/Navigation or PAFL Clear.

There shall also be dedicated keys for quick Copy/Paste/Reset of mixes and processing parameters.

The name and number of the selected channel or mix shall always be identified on screen when in the processing or routing pages.

The mixing system shall include application software for Apple iOS touchscreen devices connecting via a wireless network router to an Ethernet LAN port.

The application shall allow control of functions including the preamp gain, phantom power, mix channel levels and shall have a graphical representation of physical controls and indicators including signal processing parameters and shall provide control of channel processing including Parametric EQ, Graphic Eq, Compressor and Delay.

Routing assignments and level adjustments of input signals to all mixes and bus shall be provided and the application software shall provide signal metering and processing threshold indication when online including the Real Time Analyser.

Real Time Analysis metering shall include a spectrogram to allow for accurate monitoring of audio energy across the frequency spectrum over time for the purpose of feedback detection and correction of room acoustics.

A global source option for the direct out of each input channel shall be provided in the routing screen. The tap-off point shall be adjusted to the following positions in the processing path: post Preamp, post HPF, post Gate, post Insert return, post PEQ, post Compressor, and post Delay. There shall be further global options for Follow Fader, and Follow Mute.

Direct outputs shall be assignable via the mixer soft patch bay to any physical output socket interface channel or ME monitoring channel.

4 Stereo Audio Groups shall be available for sub mixing and the combined processing of selected input channels. These Audio Groups shall be switchable to function as additional Send Mixes when required.

A signal generator shall be provided with the ability to send a variable level signal to any output mix with visual assignment status on-screen. The following types of signals shall be available: Sine, White Noise, Pink Noise, and Band-Pass. Comprehensive input, output, and FX channel and RTA metering shall be provided on-screen.

A Channel Ducker shall be provided to reduce the level of selected channels when a designated channel is in use. This channel priority shall be available across all mono and stereo input channels and also channel groups.

An Automatic Mic Mixer shall be provided for automatic level control of up to 16 microphones using a constant gain sharing algorithm to dynamically adjust the gain for each mic in spoken word applications

4 user-assignable effect racks shall be provided with a library of factory preset FX emulations. The FX racks shall be individually configurable as send/return from a channel or FX/Mix, or inserted into input or output channels.

A Talkback facility with the ability to send to any output mix with on screen status indication and an option to enable talkback latching and HPF shall be provided.

A default Mains to PAFL sub-mix and a stereo quarter-inch jack socket for PAFL headphones output shall be provided, with an analogue output level control.

The mixer shall include stereo and 18-track recording/playback to optional USB hard drives. The format shall be 48 kHz/ 24 bit WAV. The mixer shall also play back stereo WAV files at 44.1 or 48 kHz and have a USB Type-A connector on the surface for recording, playback, data-transfer, archiving, and firmware updates to USB drive.

On the rear panel there shall be a Type-B USB connection following the high-speed USB 2.0 standard for multi-channel, bi-directional audio streaming of 32 out / 32 in and MIDI DAW control between the mixer and a computer.

DAW transport control using popular DAW control protocols for computer shall be available via the touch-screen.

The mixer shall provide a Fast Ethernet (100 Mbit/s) port for Cat5 cable connection to a wireless router (access point) for MIDI over TCP/IP control of mixer parameters via Apple iOS touchscreen devices for live mixing control.

There shall be a local “dSNAKE” Cat5 Ethernet audio expansion port with locking Ethercon connector, providing up to 38 input signals and 20 output signals, plus 40 personal mixing sends to be connected over a single cable ‘digital snake’ and allowing Remote Preamp control to an Allen & Heath AudioRack, or Allen & Heath ME Personal Mixing Systems.

Input and output channel processing and parameters in the mixer shall be saved on demand as a user library item for recall in other channels. Individual processing sections shall be save-able on demand as user library items for that type. All library items shall be stored on board and archived with the show-file. Library items shall be transferrable to USB drive as portable data to be used in other systems.

The mixer shall provide the facility to save 100 scenes of the settings of the mixing system and these scenes shall be nameable. A comprehensive table of Scene Safes shall be provided to prevent selected items from being changed from their state when the safe was enabled. A comprehensive scene filter shall be provided per scene to Allow / Block each parameter saved in a scene from being changed as that scene is recalled.

An option shall be provided for password protection for log-in of several users with different levels of system access and permissions. A particular scene may be chosen to be recalled per change of user-login if desired.

The mixing system shall periodically record all current settings and return the mixer to that state after reboot following a power-cycle.

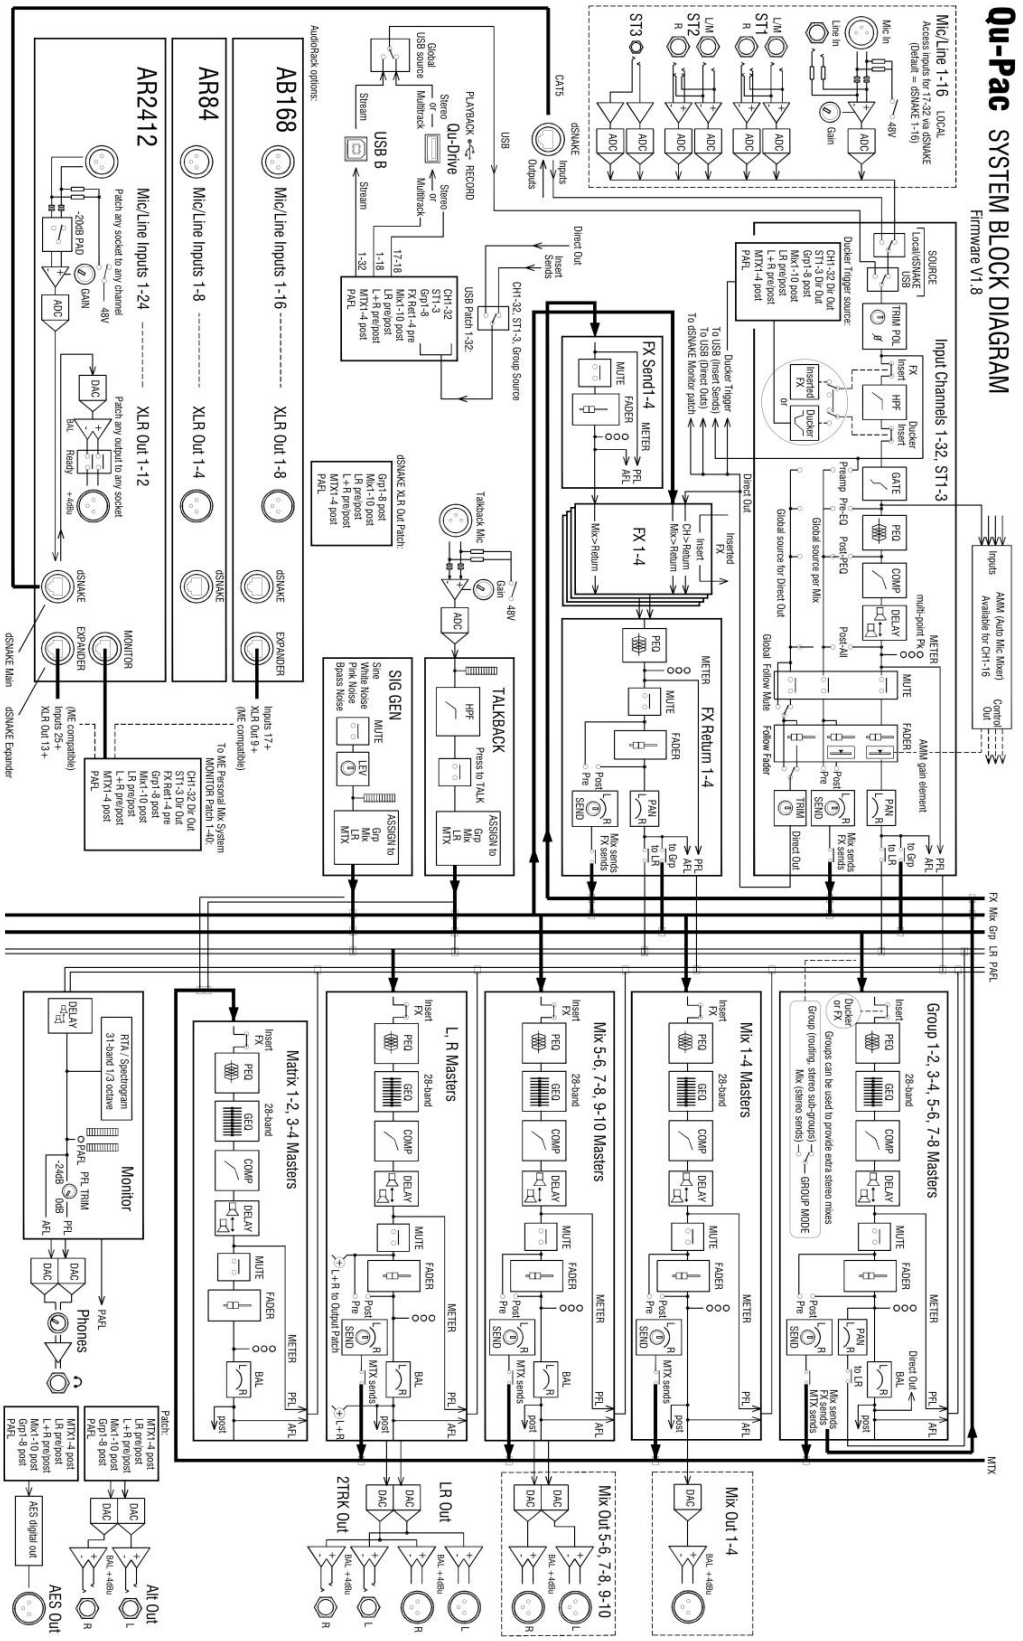

The mixer shall have a built in power supply accepting AC mains voltages of 100~240V, 50/60 Hz, 55W max via an earthed 3-pin IEC male connector mounted on the rear chassis. A Two Pole Push-Button switch shall be provided near the mains input.

The mixer shall have an optimised fan-less airflow design for silent operation.

Recommended operating temperature for the mixer shall be 5 to 35 degrees Celsius.

The mixer shall be the Allen&Heath Qu-Pac Digital Mixer.

Changing from right to left swing: Doors mount right or left (with hinges relocated) to premounted nutserts on each side of the rack frame. This method eliminates drilling and allows doors to be installed after equipment is loaded.

Relocated lock Position. After inverting door 1800, remove door lock screws, turn lock 1800 and remount.

Door hinge (part 1) relocated position.
After inverting door 1800,, remove door hinge screws, turn hinges 1800, and remount in the top two hole positions. This part of the hinge always mounts in the top two hole positions with the open side down to accept the hinge pin.

Door hinge pin (part 2) mounts to cabinet without drilling. The second part of the door hinge (pin) is always field installed to factory mounted nutserts. Nutserts are located on the front left and right of cabinet.

1. Wire all rear terminal blocks in parallel.
2. Front System Power UP/DOWN switch is wired in parallel with rear remote terminal block. When wired together as shown, pressing front System Power UP/DOWN switch on ANY sequencer will initiate system sequencing.
3. If remote Power UP/DOWN is required, wire dry contacts in parallel.
4. Initiating system sequencing remotely: Sequencing can be initiated by either momentary dry contact or maintained dry contact. Use of a maintained dry contact for system power up will re-initiate sequence after power is restored from a power outage. When using maintained (non-momentary) dry contact for remotely controlling system sequencing, the front System Power UP/DOWN switches will be over-ridden.

NOTE: A flashing power (green) LED indicates system sequencing has begun.

DN-300Z Specifications

Front-loading media slots (CD, USB, SD/SDHC) deliver intuitive playback of today's ubiquitous mass-storage mediums. With support for CD-DA, MP3, WAV, and AAC file formats, the DN-300Z is the catch-all-player that excels when the unpredictable occurs.

With rapid adoption of smartphones and tablets, it is no surprise that a significant amount of portable audio content must be accessed through a single-user's personal handheld device. For the ultimate in freedom, Bluetooth equipped audio sources can wirelessly link to the DN-300Z, letting the user manage media playback from their smartphone, computer, or tablet. For situations where Bluetooth is not permitted or accessible, the DN-300Z's 3.5mm (1/8-inch) auxiliary input reduces cable clutter to a single connection from any device's headphone jack. Whether going wired or wireless, operation is clean, simple, and stress-free.

The DN-300Z seamlessly integrates AM/FM radio with inputs for 75-ohm coax (FM) and loop-style (AM) antenna to boost reception when used deep within the walls of a venue or building. Featuring assignable outputs, the AM/FM tuner signal can be routed independently of optical/flash/Bluetooth program material – ideal for multi-room or zoned audio distribution.

Outputs consist of unbalanced RCA outputs that mate with the widest range of amplification devices. An IEC-weighted AC power port means space-saving connection to power sources – no bulky transformers or wall-warts required. When installed into a client's rack, the DN-300Z provides the capability, reliability, and versatility to tackle any playback task – from one-off requests to rehearsed program material – in an intuitive, tidy package.
