

Parents,

As we continue to integrate technology into our learning environments, we remain committed to ensuring that our students have access to quality devices to support their education.

However, the nature of daily use means that these devices might occasionally be subjected to physical damage by your student. The cost of repairing these devices can be significant, and we are aware that such unexpected expenses can impose a financial burden on our families. In our continuous efforts to serve our students and their families better, we are pleased to remind you about our Laptop Insurance Program for the upcoming school year.

This Laptop Insurance Program, introduced last year, is designed to either waive or reduce the cost associated with repairing or replacing a damaged device. For a nominal fee of just \$20 per school year, this insurance provides a layer of protection and peace of mind, ensuring that accidental damage does not interrupt your child's learning or your family's budget.

To continue with or enroll in the Laptop Insurance Program, please visit our eFunds page on the school's website and select the " Student Laptop Insurance" option after you login. You can create an account if you do not have one.

WARRANTY, REPLACEMENT AND REPAIR COSTS
