Re: New burner

Quote # 726315

We will supply and install a new Webster dual fuel burner (of equal capacity) to replace the existing Gordon-Piatt burner.

The new burner will be full modulation. It will allow you to use oil or LP gas. A new spool piece, configured for the Bryan RV350 boiler is included.

Not included in this scope is running of the LP lines from a location to the boilers.

TOTAL PRICE: \$28,440.00
