

SELECTION OF LEARNING RESOURCE MATERIALS

The primary objective in the selection of learning resource materials is to implement, enrich, and support the curriculum and further the achievement of Region #10's instructional goals. The school district is dedicated to providing a wide range of materials on all levels of difficulty with diversity of appeal and the presentation of different points of view.

The term "learning resource materials" refers to any material with instructional content or function that is used for formal or informal teaching/learning purposes, including all library media materials. All learning resource materials purchased by the school district shall be acquired in accordance with this policy and accompanying administrative guidelines. Textbook adoptions shall be approved by the Board of Education in accordance with relevant law. Textbooks are defined by the state as that resource which provides 50% or more of the information upon which the program of instruction is based. While the Board of Education recognizes this definition of textbooks, the textbooks are resources and are not the Region #10 curriculum.

Guiding Principles for the Selection of Learning Resource Materials

The responsibility for recommending textbooks for approval by the Board and reviewing and selecting all other learning resource materials is delegated to the professional personnel employed by the school district. The professional staff is responsible for recommending learning resource materials which provide information and experiences that:

1. Implement, enrich and support the curriculum, taking into consideration the varied interests, abilities, needs, and maturity of the students served.
2. Stimulate growth in factual and conceptual knowledge, literary appreciation, aesthetic values, and ethical standards.
3. Enable students to make intelligent judgments in their daily life.
4. Provide opposing sides of controversial issues so that young citizens may develop under guidance the practice of critical analysis of all media.
5. Accurately present the achievements and accomplishments of individuals and groups from all ethnic and racial backgrounds and of both sexes.
6. Place the principle of open access to ideas above personal belief and reason above prejudice.
7. Are free of bias and intolerance in the areas of gender, race, color, religion, age, national origin, marital status, sexual orientation and disability.

Criteria for the Selection of Textbooks

In addition to the guiding principles for the selection of learning resource materials, textbooks recommended to the Board of Education for formal approval and adoption shall be selected based upon the following criteria:
