RESERVE FUNDS OVERVIEW

Reserve funds, like other savings plans, are mechanisms for accumulating cash for future capital outlays and other allowable purposes. The practice of planning ahead and systematically saving for capital acquisitions and other contingencies is considered prudent management. Saving for future capital needs can reduce or eliminate interest and other costs associated with debt issuances. Similarly, certain reserve funds can be utilized to help protect the budget against known risks (a potential lawsuit) or unknown risks (a major ice storm). Most reserve funds are established to provide resources for an intended future use. An important concept to remember is that a reserve fund should be established with a clear intent or plan in mind regarding the future purpose, use and, when appropriate, replenishment of funds from the reserve. Reserve funds should not be merely a “parking lot” for excess cash or fund balance. Local governments and school districts should balance the desirability of accumulating reserves for future needs with the obligation to make sure taxpayers are not overburdened by these practices. There should be a clear purpose or intent for reserve funds that aligns with statutory authorizations. Each statute that authorizes a reserve fund sets forth a particular underlying purpose for the fund. For example, provisions of the General Municipal Law (the GML) and the Education Law allow municipalities and school districts, respectively, to establish capital reserves for future equipment purchases and capital improvements. The GML also authorizes the establishment of an employee benefit accrued liability reserve for the payment of the monetary value of accumulated, unused leave time to employees upon separation from service.

While reserve types and purposes are defined in detail later in this document, reserves can be utilized in the following ways:

- Save funds to offset future taxpayer expense
- Insulate the district from liability and financial loss
- Prepay certain types of expenses from current year’s funds
- Provide a buffer against spikes in certain areas of contractual benefit costs

While outside entities may opine as to the level of reserves a district chooses to carry, the “appropriate balance” of each reserve fund is determined solely by the Board of Education. ***It is important to note that in most cases a district’s sole source of funding for reserves is from unexpended appropriations.*** Therefore, multi-year financial planning and budgeted surpluses are integral to maintaining healthy financial operations and supporting district programs and services through periods of economic uncertainty.

COMPTROLLER'S POSITION ON RESERVE FUNDS FOR STRATEGIC PLANNING

“In our personal lives, saving or putting money aside to finance future needs is a common practice. Unquestionably, strong arguments can be advanced for accumulating funds. The disputable philosophy, “live for today and let tomorrow take care of itself” can easily be refuted with many savings slogans such as “prepare for a rainy day.” These practices are equally important for New York’s local governments. Legally established reserves can provide many benefits to municipalities* and their citizens. Available moneys can be set aside to finance all or part of planned projects, thereby reducing the need to issue costly debt. Reserves can provide a degree of financial stability. In uncertain economic times, reserve funds may give managers options other than cutting services or raising taxes. In good times, moneys not needed for current purposes can often be set aside for future benefit.”

“Planning today and saving incrementally for expected future events can help mitigate the financial impact of major, nonrecurring or unforeseen expenditures on your annual operating budget. Establishing and funding allowable reserve funds for a clear purpose can help smooth out spikes in the annual budget and in the real property tax levy.”

COMPTROLLER'S POSITION ON LONG-TERM FINANCIAL PLANNING

“OSC recommends using revenues from unexpected windfalls or other nonrecurring sources for one-time needs or to build reserves, rather than spending them on recurring expenses. You should build a plan that allows you to break out these non-recurring revenues and to track them separately from recurring revenues. You may also wish to track non-recurring expenditures to determine if you are using one-time windfalls to fund one-time expenses or establish reserves. *If, however, you are funding an increasing portion of your budget with such revenues, you may be using “one-shots” to address a structural imbalance between recurring revenue and recurring expenses.* Your plan should aim to address this situation with long-term revenue or expenditure adjustments.”

2022-2023 RESERVE SUMMARY BALANCES AND ACTIVITY

	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Unemployment Insurance Reserve	302,853	4,453	-	11,166	309,566
Employee Retirement Reserve	1,185,732	100,000	-	41,449	1,127,181
Teacher Retirement Reserve	470,711	50,000	177,215	16,323	614,249
Employee Benefits Accrued Liability Reserve	719,876	40,000	-	26,392	706,268
Liability Reserve	327,432	-	75,000	12,097	414,528
Insurance Reserve	292,965	-	191,065	10,823	494,853
Tax Certiorari Reserve	310,619	-	-	-	310,619
Capital Reserve 2022	241,898	-	2,000,000	7,780	2,249,678
Capital Reserve 2016	1,337,530	-	-	128,780	1,466,310
Bus Purchase 2021	1,090,624	-	1,200,000	36,514	2,327,138
Bus Purchase 2019	426,380	234,958	-	11,351	202,773
Total Restricted Fund Balance (Gen. Fund)	6,706,621	429,411	3,643,280	302,674	10,223,163
Other Fund Balance					
Debt Service Fund	1,301,922	500,750	-	(79,366)	721,806

UNEMPLOYMENT INSURANCE RESERVE

Purpose: This reserve fund is used to pay the cost of reimbursement to the State Unemployment Insurance Fund for payments made to claimants. The reserve may be established by board action and funded by budgetary appropriations or other funds as may be legally appropriated (General Municipal Law, §6-m).

Analysis: The District has utilized funds from this reserve to pay claims and will continue to do so. During the last several years the District has experienced more unemployment activity and also recovered some costs from the State of New York. As the economic recovery of the COVID-19 pandemic remains uncertain in terms of State revenues and economic climate, the District should retain a balance in the unemployment reserve that could defray the costs of a reduction in force should it become necessary.

Ideal Balance: Methodologies for this determination vary as yearly claims can fluctuate greatly dependent upon the macroeconomic climate. The ideal balance recommended is approximately \$525,000. This value would be sufficient to sustain the maximum claims (26 weeks at \$504) for a reduction of up to 40 positions. As Governor’s have threatened aid withholdings of up to 20% of total state aid, the ability to sustain claims in a climate of multi-year revenue reductions must be considered. Any additional balance beyond the ideal balance would be intended to address the potential for extended benefits during an economic crisis.

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Unemployment Insurance Reserve	302,853	4,453	-	11,166	309,566

NYS EMPLOYEE RETIREMENT SYSTEMS CONTRIBUTION RESERVE (ERS/TRS)

Purpose: For the payment of “retirement contributions” which is defined as all or any portion of the amount payable to either the New York State and Local Employee Retirement System or the NYS and Local Police and Fire Retirement Systems pursuant to section 17 or 317 of the Retirement and Social Security Law (General Municipal Law, §6c, d, e, f, or g, and Section 3651 of the Education Law). The TRS sub-fund was created as a sub-fund by Educational Law Section 521 beginning in 2019, and Williamson’s was established 6/17/20 by Resolution of the Board of Education.

Analysis: These funds will be used as a budgeted revenue source each year in the District’s annual budget to help offset ERS and TRS costs as needed.

Ideal Balance: The ideal balance for the ERS fund is a minimum of approximately \$1.170M, which is equivalent to 3 years of budgeted contributions to the retirement system. The ideal balance for the TRS sub-fund is \$950,000, which is roughly equivalent to the sum of 10% of eligible payroll. This is the maximum allowed by section 521 of educational law. That value is still less than one year’s budgeted contributions to the system. Combined, the Districts ideal funding for employee retirement systems would be \$2.120M aggregate.

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Employee Retirement Reserve	1,185,732	100,000	-	41,449	1,127,181
Teacher Retirement Reserve	470,711	50,000	177,215	16,323	614,249

EMPLOYEE BENEFITS ACCRUED LIABILITY RESERVE

Purpose: Reserve for Employee Benefit Accrued Liability (GML §6-p) is used to reserve funds for the payment of accrued employee benefits due to an employee upon termination of the employee’s service. This reserve may be established by a majority vote of the Board and is funded by budgetary appropriations or other reserves and funds that may be legally appropriated.

Analysis: This reserve is used to fund the retirement incentive liability for eligible contract member employees who have earned unused accumulated sick days. An annual calculation is performed at the close of each fiscal year to determine the current liability of eligible members at the close of the year. The District typically budgets an annual appropriation from this reserve as a General Fund Revenue source to help offset the District’s non-elective 403(b) retirement costs provided as a retirement incentive based on unused accumulated sick days. While \$35,000 has been appropriated to support the 2023-24 budget, it is important to note that only the payments for this purpose can be charged to the reserve, which may be less than the appropriated value.

Ideal Balance: The ideal balance for this reserve is approximately \$700,000, which is the audited balance of compensated absences as of 2023. Additionally, unlike OPEB liabilities for which a savings mechanism for earned benefits does not exist, the EBALR reserve helps the district fund its future payment obligations with revenues from the period in which the benefits were earned.

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Employee Benefits Accrued Liability Reserve	719,876	40,000	-	26,392	706,268

LIABILITY RESERVE

Purpose: This reserve fund is similar to the insurance reserve described next, in that it is used to pay for property loss and liability claims incurred. Separate funds for property loss and liability claims are required and these reserves may not in total exceed 3% of the annual budget or \$15,000 whichever is greater. (Education Law, §1709, Subdivision 8-c).

Analysis: The balance in this Liability Reserve has been deemed as a reasonable amount to protect against any potential property losses in which the District might reasonably incur, or claims against the District for negligence. In May 2014, the Voters approved the transfer of up to \$100,000 from the Liability Reserve to support the General Fund budget. In May 2018, the Voters approved the transfer of up to \$200,000 from the Liability Reserve to support the 2018-19 General Fund budget.

Ideal Balance: As the maximum allowable by law is 3% of the operating budget the ceiling for funding this reserve is approximately \$800,000 for the 2023-24 school year. The reserve has been utilized to fund the operating budget in recent years. The ideal balance for this reserve is approximately \$525,000 which is two-thirds of the allowable maximum of \$800,000. This would allow the District insulation from losses as its infrastructure ages and the legal climate for school operations becomes more litigious.

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Liability Reserve	327,432	-	75,000	12,097	414,528

INSURANCE RESERVE

Purpose: This reserve fund is used to pay judgments, claims, incidental costs and professional services connected with the investigation and settlement of claims. The reserve is funded by budgetary appropriations or any other permissive referendum. The amount that can be paid into the reserve during each fiscal year is limited to 5% of the annual budget. There is, however, no limit upon the amount which may be accumulated in the fund (General Municipal Law, §6-n).

Analysis: The District negotiated lower insurance premiums nearly \$1,800 by raising its deductible amounts to \$2,500 on property (\$1,000 on vehicles) in the 2009-10 school year. By lowering insurance costs and utilizing a greater share from the Insurance Reserve to cover uninsured claims, the District is making better use of its reserves and saving taxpayer dollars on an annual basis. In 2011-12, the District applied the deductibles from 1 insurance claim for \$1,000. In addition, the Board also approved the appropriation from the Insurance Reserve of \$160,000 to settle a claim for an employee. In 2012-13 a \$500 deductible and in 2017-18 a \$1,000 deductible was applied to the reserve.

Ideal Balance: There are a number of liability exclusions stated in the District’s umbrella liability coverage, including but not limited to pollution, asbestos, mold, and pandemic. As each of these pose a risk of loss to the district due to unforeseen building conditions, systems failures, or acts of nature, it is prudent for the District to retain a balance to mitigate these exposures. Additionally, cybercrime introduces a new layer of risk as more personal data is housed electronically by school districts. The average ransomware cost is now in excess of \$80,000 as cited by Coveware (via Forbes.com) from a January 23, 2020 report. As such, the District has determined the current balance to be adequate, and if this reserve is utilized to offset any incurred loss, the District will evaluate refunding the reserve at that time.

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Insurance Reserve	292,965	-	191,065	10,823	494,853

TAX CERTIORARI RESERVE

Purpose: The governing board of any school district, by resolution, may establish a reserve to refund taxes of the current year in tax certiorari proceedings. Establishing or expending from the reserve does not require voter approval. Amounts not necessary to refund taxes must be returned to the unreserved fund balance of the general fund by the first day of the fourth fiscal year following the year for which the reserve was created. (Education Law §3651, Sub.1a, 3a)

Analysis: Whispering Woods Estates has discontinued their certiorari case which removes a liability of roughly \$130,000 (approximately \$5.3M of value disputed) for the 2019 and 2020 tax years. As such, Walgreens is the only active case with a yearly liability of roughly \$85,000 (approximately \$3.4M of value disputed) dating back to 2014. Only 4 years of claims can be supported by this reserve which leaves a total exposure of approximately \$340,000.

Ideal Balance: It is unlikely the claims will be settled at the full disputed value, however, with the existing balance of this reserve the district is very well insulated against the remaining claim and will re-evaluate if the status of that claim changes.

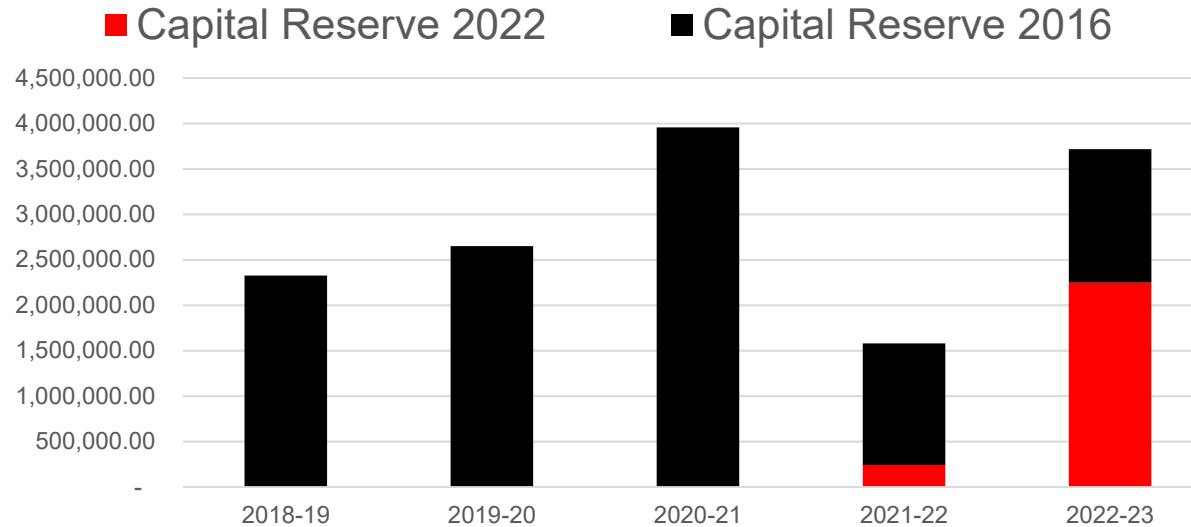

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Tax Certiorari Reserve	310,619	-	-	-	310,619

CAPITAL RESERVE

Purpose: The Capital Reserve Fund is used to pay the cost of any object or purpose for which bonds may be issued. Voter authorization is required for both the establishment of the reserve and payments from the reserve. The form of the required legal notice for the vote on establishing the reserve and the form of the proposition to be placed on the ballot are set forth in §3651 of the Education Law.

Analysis: The District’s current building aid rate is 86.8% which means approximately 87% of the cost of *eligible and approved* capital work will be reimbursed based upon amortization schedules set by NYSED. As not all capital work will be eligible for building aid, a more realistic local share is approximately 20% of total project budgets. The chart below shows a total aggregate balance of \$3,715,988 as of June 30, 2023. The 2016 capital reserve has reached it’s funding capacity, while the 2022 capital reserve is able to absorb additional funding.

Ideal Balance: The ideal balance for this reserve is an amount sufficient to fund the local share of the next capital project(s). The 2021 capital project is currently underway and \$2,625,000 was authorized by voters for use toward this project. The most recent Building Condition Survey on file for the District (2022) identifies more than \$20 million in infrastructure and mechanical systems repairs and updates. While this report is current, new needs will continually be identified, and systems will continue to age. As such, the local share (as defined as 20% of the total cost) of \$20 million in capital needs is \$4 million.

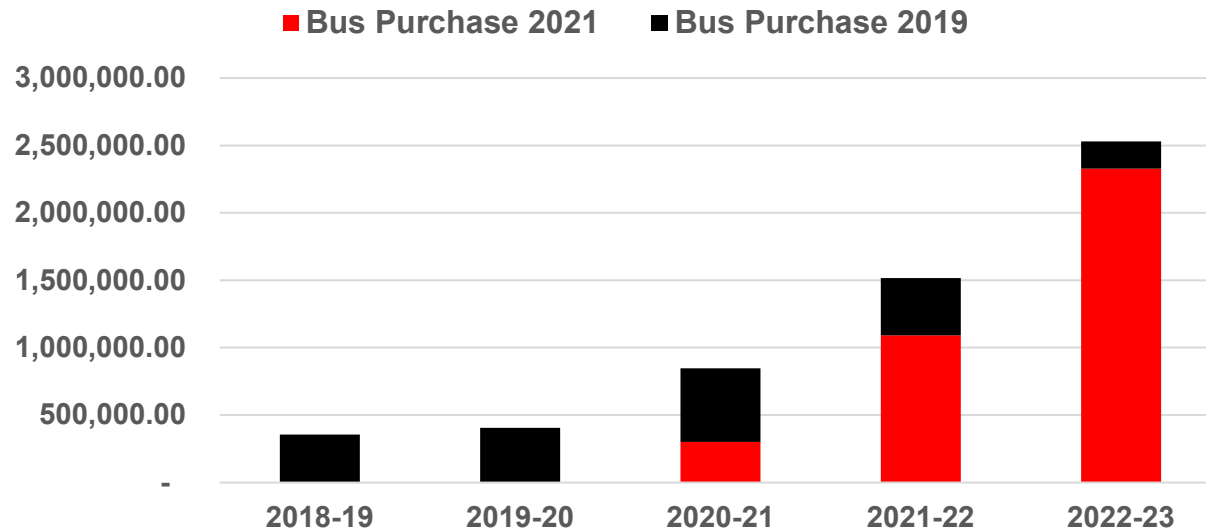

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Capital Reserve 2022	241,898	-	2,000,000	7,780	2,249,678
Capital Reserve 2016	1,337,530	-	-	128,780	1,466,310

BUS PURCHASE RESERVES

Purpose: The bus Purchase Reserve Fund is a capital reserve for the specific use of purchasing vehicles for student transportation. Voter authorization is required for both the establishment of the reserve and payments from the reserve. A reserve was authorized by a public vote on May 21, 2019 for a term of 5 years and a maximum aggregate funding limit of \$750,000. Another reserve was authorized by public vote on May 18, 2021 for a term of 10 years and a maximum aggregate funding limit of \$2,500,000. The form of the required legal notice for the vote on establishing the reserve and the form of the proposition to be placed on the ballot are set forth in §3651 of the Education Law.

Analysis: As of 6/30/23, the aggregate funding to the 2019 and 2021 reserves was approximately \$2,530,000. In years past the district has regularly utilized this reserve to fund the local component of bus purchases, while utilizing rolling BANS to fund the state aided component of the purchase. In July of 2022, the district paid off all bus BANS and moved to utilizing reserves to purchase buses. This shift in purchasing saves the district on high interest rates, bond rating fees, advisory fees and legal fees. The District's transportation aid rate is approximately 85%, meaning that 85% of the cost of bus purchases will be reimbursed by the state over the course of 5 years. The chart below combines the balance of the prior and current reserves for bus purchases. The district will seek authorization for an additional bus purchase reserve due to reaching the available funding capacity.

Ideal Balance: The ideal balance of this reserve is the maximum funding authorized in order to continue supporting the purchase of buses from reserves. Over the last several years the district is replacing 3-4 buses a year as the fleet inventory ages on a cyclical basis. With the mandate for the electrification of buses in sight, an increased amount of funding will be required to continue the cost savings mentioned above. At this time manufacturers are anticipating a 150% increase in the cost of one bus.

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Bus Purchase 2021	1,090,624	-	1,200,000	36,514	2,327,138
Bus Purchase 2019	426,380	234,958	-	11,351	202,773

MANDATORY RESERVE FOR DEBT SERVICE

Purpose: Upon the sale of district property that was financed by obligations which remain outstanding at the time of sale, a reserve must be established for the purpose of retiring the outstanding obligations. The funding of the reserve is from the proceeds of the sale of district property or capital improvement (General Municipal Law, §6-1). The debt service reserve is not accounted for in the general fund, but rather the debt service fund.

Analysis: The Debt Service Fund is used as a budgeted revenue source each year in the District’s annual budget to help offset principal and interest as needed. Transfers from the Debt Service Fund can be made to the general fund to offset budgeted debt service payments. Utilization can help maintain a negative tax cap “capital exclusion” which means there will be currently no tax impact to the Districts debt service payments to support prior capital expenditures.

Ideal Balance: There is no ideal balance for the Reserve for Debt service as it is the accumulation of funding from prior projects that shall be used to retire debt obligations. One consideration of utilizing this reserve to support the general fund budget is its functionality in the tax cap calculation, wherein any sum utilized will reduce the “capital exclusion” in the tax cap formula. As the District’s long-term debt service schedule demonstrates there will be a taxable capital exclusion in the coming years, it is advisable to use these funds judiciously to gradually scale in any local capital exclusion.

Restricted Fund Balance (Gen. Fund)	Bgn. Bal. 2022-23	Utilization	Contribution	Interest Earned	End Bal. 2022-23
Debt Service Fund	1,301,922	500,750	-	(79,366.48)	721,805.71
