**OVERFLOW DISCLAIMER LETTER**

Date: \_\_\_\_\_

Dear Parents/Guardians:

Throughout the district, enrollment situations exist that create the need for students at some grade levels to be overflowed from their neighborhood school to another school in the district. In July 1996, the state of California passed legislation reducing class size in the primary grades. The School Board of the Pleasant Valley School District is committed to continue Class Size Reduction dependent on funding from the state. Therefore, overflow may occur at any grade level.

To meet state requirements for implementing district programs, the school district must retain some flexibility in the placement of students. While we remain committed to the neighborhood school concept, we recognize that some students may have to be moved to another school on an overflow basis.

Placement of students for a new school year will follow district guidelines. **Students new to the area will be placed at their neighborhood schools on a space available basis. The date and time of registration will be the factor used to determine this placement.**

**Students overflowed to other schools will have first priority in returning to their neighborhood school as space becomes available. Transportation is not provided for temporarily displaced students.**

**PARENT ACKNOWLEDGMENT:**

**I have read the above statement and I understand that my child may be moved to another school site on an overflow basis.**
