

Pesticide Notification

A Minnesota state law requires that schools inform parents and guardians if they apply certain pesticides on school property. State law also requires that parents and guardians specifically be told that the “long-term health effects on children from the application of such pesticides or the class of chemicals to which they belong may not be fully understood.”

The Watertown-Mayer School District does not apply pesticides on school property unless other measures have failed to control the problem. In the event that insect control sprays and dusts need to be applied, it will only be done when students are absent from the areas, and will be out of the area until the spray and any odor has dissipated.

If you would like to be notified prior to a chemical application, please contact the Building and Grounds Director at the district office 952-955-0417.
