- filled boxes with hygiene items, toys etc. for children overseas	

Essay: Educational Plans

Throughout my high school career I have had the chance to find where my passions and interests lie. I am fortunate enough to have realized that my passion is photography. In May of 2020, I started my business and it has been growing ever since. My business goal is to one day open my own studio in Buffalo. As far as my educational plans, I have worked towards my goals all through high school to be where I am today. As a freshman I made several goals for myself, such as: being valedictorian, maintaining a 4.0 GPA, and graduating with my general education completed. I have been working extremely hard to complete all of these goals. After graduation I plan to attend OTC to get my associates of Business in Arts degree. Throughout college I plan on focusing on my photography to grow my business and reach more clients. I am applying for this scholarship because I am trying to become more independent and pay for college on my own. While I do plan on using A+ for the tuition cost, I will still have to cover the cost of textbooks, school supplies, living expenses, and gas to get to and from college. Along with college I will also have the expense of equipment for my business which can be costly. With the help of this scholarship I will be able to pay for my college expenses as well as continue with my dream of owning my own studio.
