

Continuous Improvement Process for Infrastructure Needs

Modules, switches, APs – are identified by funding source, location, and follow E-Rate purchase cycle. (Maintained by WAN Engineer)

Needs are based on equipment operability and growth

Director of Tech, WAN Engineer, and Network Engineers formulate plan for upgrades, funding sources, and installation.

Infrastructure Team coordinates and adjusts plan with E-Rate Consultant.

E-Rate Consultant coordinates and implements district's E-Rate application.

Hardware arrives, added to inventory, and installed as planned.
