The risk screening conclusion above informs the level of support that must be provided. See 2145P Exhibit A for guidance regarding next steps. The risk screening provider may determine a higher level of risk based upon their professional expertise but may not determine a lower level of risk than yielded by the C-SSRS.

**Intervention Notes:** If risk screening provider used professional expertise to assign a higher risk level than the C-SSRS yielded, briefly explain why. Consider including pertinent information shared by the student (access to means, past suicidal behavior, plan details, additional risk factors), information from additional sources (parents, teachers, friends, written work), information about the student’s current supports, etc.

**Follow-Up Plan:** List action steps being taken by student, school team, parent/guardian to enhance safety, e.g. developed safety plan, provided crisis resources, parent picked student up from school, collaboration with outside therapist/agency, referral to mental health supports, emergency intervention such as 911 or parent taking student to the ER, referral to a support team such as GT or MDT, scheduled a re-entry meeting, or other.
