Environmental Health & Safety

MEMORANDUM

To: Shannon Tenner, Principal, Justice Page Middle School

From: Lee Setter, Manager, Environmental Health & Safety (EH&S)

Date: November 22, 2023

**RE: Justice Page Middle School
1 West 49th Street 55419
Lead In Water Testing**

Drinking water was tested at Justice Page Middle School on November 10, 2023. The testing was performed as part of our Lead in Water Safety Program as required by the Minnesota Department of Health. The purpose of this program is to ensure that school drinking water does not exceed the permissible lead level of 5 parts per billion (ppb).

All water was collected on a first draw basis (before flushing) with a minimum of eight-hour system stagnation. This collection method represents the worst-case scenario for lead in water concentrations. All drinking water samples collected at Justice Page Middle school had first draw concentrations that were identified at less than 2 ppb for lead (see attached laboratory report). **2 ppb is the laboratory detection limit and is considered a non-detection for lead.**

It is very good news to receive test results showing all drinking water sources are below the 5-ppb standard. Since the testing only represents one point in time, EH&S will still require flushing of the system daily as an added safety measure. This flushing does not indicate contamination of the water, rather a continued precaution for the safety of staff and students. EH&S will work with Plant Operations to continue the flushing program.

This memorandum and the laboratory analysis report will be available to the public on the MPS website: http://facilities.mpls.k12.mn.us/lead_in_water_safety_plan. You are encouraged to share this information with staff and parents.

Please contact me if you have any questions.

Thank you.
