I spent 14 years in the Marine Corps. I worked for the U.S. Government as a Russian Cryptolinguist Interpreter in the fields of military arms control humanitarian aid. I own a live music venue club who caters to underground alternative music. I am a booking agent promoter for bands and events. I am a sound technician and DJ. I set up bands for concerts, which includes amp cables, speakers, microphones, etc... I determine levels and frequency response, then monitor inputs for sound-checks during performances. The sound guy, the one who makes everything sound good and doesn't get any credit. HaHa! All of that and a day job too, floor covering installations. I have been playing rugby for 16 years and I coach the local military team at Camp Lejeune. Been through a couple of marriages and have two great kids. My parents are still living in Knightstown and I visit as much as I can. My club website is: www.arenasportsbar.net
