Urban Agriculture – 90101*

Semester-long course, 0.5 credit

Explore emerging technologies and learn how urban agriculture, food science, and natural resources are revolutionizing how we design and manage local community-based food production. Plus, build a personal portfolio and resume showcasing your knowledge and employability skills in preparation for a local internship. This course is prerequisite for 90201 and 99205.

Plant Science & Horticulture – 90201*

Semester-long course, 0.5 credit

Develop skills to grow plants in a variety of settings, landscape design, and maintenance. Learn how urban agriculture and landscaping are driven by plant science, the environment, and resources of our local community.

Career Work Experience – 99205

Semester-long course, 0.5 credit

Gain hands-on experience in an agriculture, food, or natural resources internship.

99201 or 99201P is a prerequisite for 99205.
