Medical Terminology - 98126*

Semester-long course, 0.5 credit

Become fluent in the language of health professionals! This course focuses on the recognition and understanding of medical terms and human anatomy. You will learn correct pronunciation and spelling of medical terminology, how to interpret and use common medical abbreviations used in medical forms and records, as well as the ability to write, read and translate medical cases.

Healthcare Core - 98616*

Semester-long course, 0.5 credit

Interested in exploring healthcare careers? Through this entry-level course you will learn about the basic skills needed for working in any healthcare profession. Topics include: awareness and sensitivity to client/patient needs, behaviors for success in healthcare settings, required communications skills, ethics, legal issues, respecting client and staff diversity, and healthcare safety standards.

Anatomy & Physiology - 95516*

Semester-long course, 1.0 credit

Explore the human body on a cellular and systems level! This course provides a critical foundation for any health care career. Learn to identify structures within the body and the processes and functions related to these structures. Body systems covered include skeletal, respiratory, circulatory, lymphatic, nervous, integumentary, gastrointestinal, and more.

Emergency Medical Responder - 98146*

Semester-long course, 0.5 credit

Learn how to save lives! Develop emergency medical skills and knowledge to assist people who have been injured or are suffering from a sudden illness or medical problem. This course is the first step to earn your American Red Cross Emergency Medical Responder certificate.

*Course eligible for college credit.
