

BIOGRAPHY: Elizabeth Milovidov

Elizabeth Milovidov is Senior Corporate Counsel, supporting The LEGO Group as a trusted leader in implementing and promoting digital child safety, rights, and well-being, in all digital games, metaverse experiences and digital engagements. Previously, Elizabeth was Global Digital Child Safety lead, where she created the LEGO Group Digital Child Rights & Well-being Principles as well as advocated for the Responsible Innovation in Technology for Children (RITEC) supported by UNICEF and The LEGO Foundation. Prior to joining The LEGO Group, Elizabeth was an independent consultant advising government and child protection agencies, non-profits and think tanks on public awareness campaigns, research initiatives and public policy strategies related to digital safety, parenting, and wellbeing.

She has several publications on parenting in the digital age [available on Amazon](#) and [co-wrote the Internet Literacy Handbook for the Council of Europe](#). She is an international speaker on Internet safety issues, leads parental workshops, writes on digital parenting, and coaches parents on best practices in the digital age through her website www.digitalparentingcoach.com. She also moderates a Facebook Group for parents, caregivers and child protection specialists called, [The Digital Parenting Community](#).

A graduate of UCLA and UC Davis, she practiced as a litigator in California for four years before moving to France to work as General Counsel in two Internet Technology companies. She earned a Ph.D. in International Relations and Diplomacy from the American Graduate School (AGS) in Paris (dissertation: international adoption via Internet and photo listings).

She is an [Assistant Professor at AGS](#) and a lecturer at several universities in France and Geneva and specializes in Law and Technology (ISCOM, Paris), Intellectual Property and Internet Law (INSEEC, Paris) and Children's Rights and the Internet (University of Geneva, Geneva).

She is an international speaker on digital parenting and safety and her work has been featured in WSJ, BBC, OZY, France 24, HuffPost, FOSI, Internet Matters and other media outlets and organizations focused on child online safety.
