## NOTICE OF ABATEMENT WORK

Dear Parents and Staff of Joliet High School District #204

During the past years, School District No. #204 has made a conscientious effort to identify and remove asbestos containing materials from its school buildings. To that end, we have made considerable strides. These removal projects are consistently tied to renovation projects or will surface as a specific project when unknown material is found within concealed areas during an ongoing project.

Joliet Central High School will be removing asbestos containing flooring, pipe insulation and ceiling materials to facilitate the Culinary Arts renovation project. The abatement project is scheduled from December 22, 2023, through January 5, 2024. Asbestos containing flooring, pipe insulation and glue associated with ceiling tiles are documented in the Culinary Arts Area. These materials will need to be removed prior to any other work proceeding, following all regulatory laws pertaining to A.H.E.R.A. (Asbestos Hazard Emergency Response Act), IDPH and EPA's NESHAP regulations.

The work areas will remain closed to all parents, students, and staff during the duration of this removal project.

Please feel free to contact Brian Paczesny, Director of Buildings and Grounds, 708/979-2885 with any questions related to this work.

Thank you,

Brian Paczesny  
Director of Buildings and Grounds  
Joliet Central High School District #204
