

Full STEAM ahead for Walnut Canyon!

Dear Walnut Canyon families,

This year, our school has partnered with codeCampus to provide weekly STEAM enrichment to every student. From TK all the way through 5th grade, our students receive structured STEAM enrichment as part of their school day. Each week, they build an incredible project using skills like coding, graphic design, and even hands-on engineering!

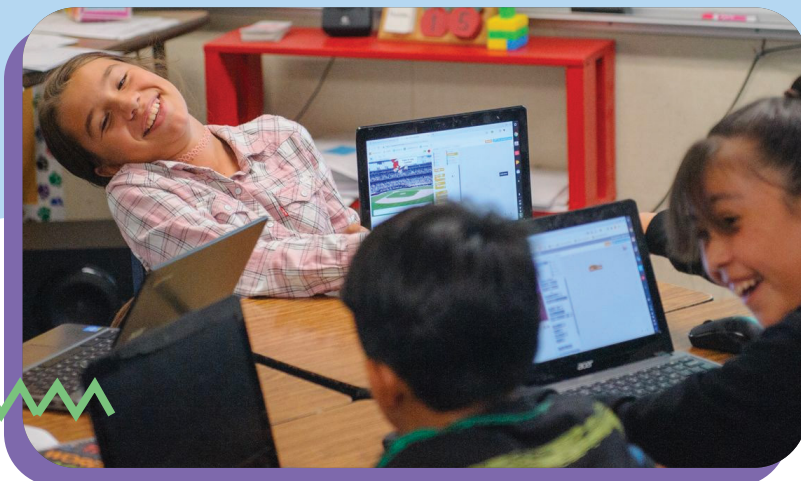

Learning STEAM skills is a multi-year endeavor, and the foundations that the students are building in elementary school today can open pathways to STEAM careers as they move on to middle school, high school, college and beyond.

Be sure to ask your own students about the amazing things they've created so far this year!

when: at school

for: each class...

learn to code!
