

EHS IB Newsletter presents

THE MANE PRESS

Vol 2. Issue 1

CAS Project and Reflective Projects

The CAS Project is a DP exclusive project that requires students to organize an event. The project requires students to be creative, active, and to create something that would benefit students, the school, or community. "A good CAS programme should be both challenging and enjoyable – a personal journey of self-discovery" (IBO.org)

The Reflective Project is a CP exclusive project that is produced over the student's time in CP. The project requires students to "identify, analyze, critically discuss and evaluate an ethical issue arising from their career-related studies" (IBO.org). This project will have students research an ethical issue within their career pathway. - **Tyler Hernandez**

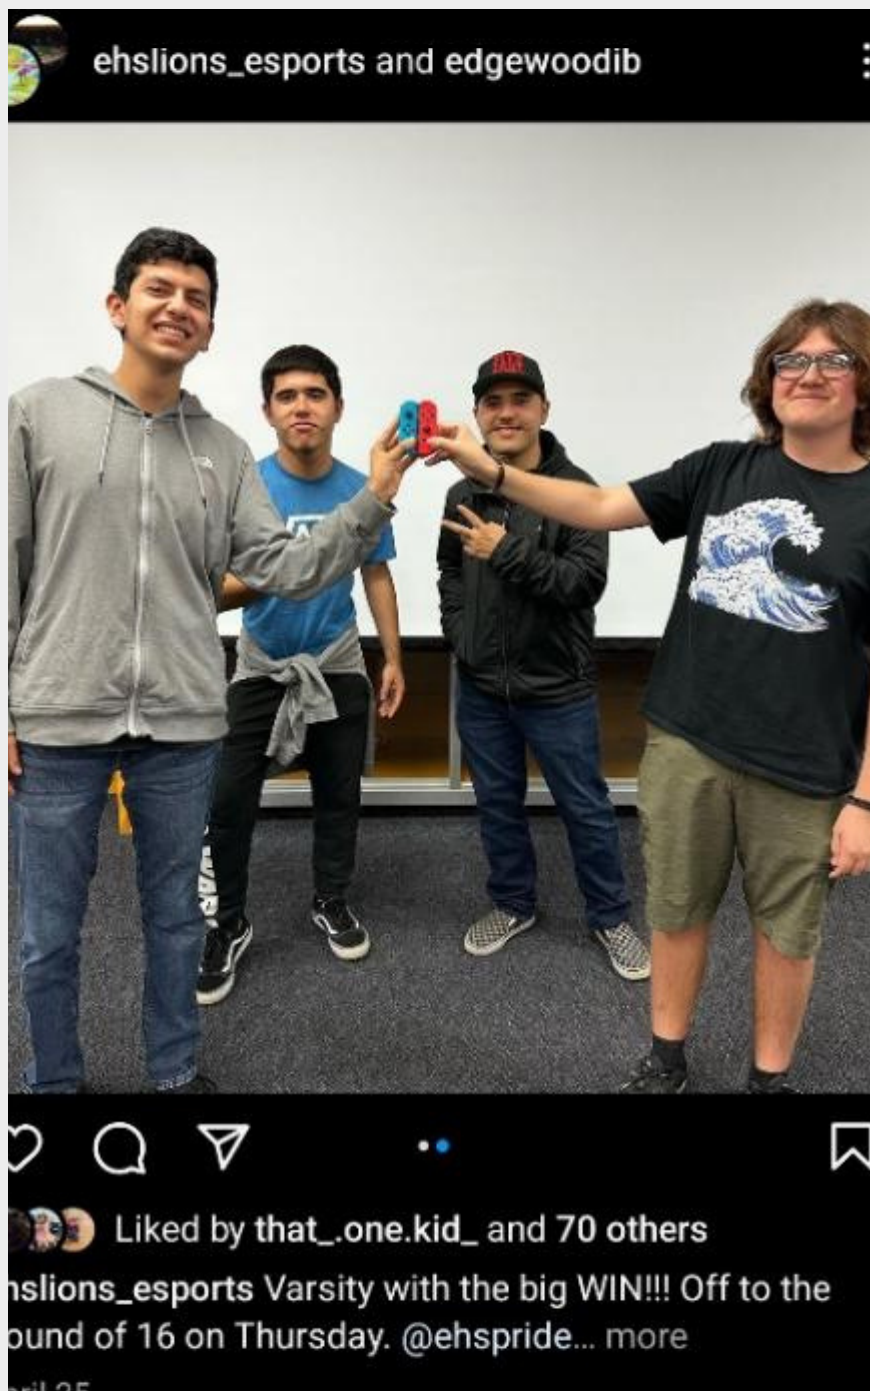

What are CP and DP?

CP (Career-related Programme) is a program, here at Edgewood, that helps students explore the career path they're interested in. Whether it's IT, dance, art, or film, students are given the aid they need in developing the path of their choice. In CP, students take a mixture of both IB and non-IB classes in order to develop these skills. Through the extra class they take (career prep) students learn how to apply their skills in the real world, preparing them for future career opportunities. In DP (Diploma Programme), students take college-level classes to help prepare them for academic life after high school be it college or trade school. Through these rigorous classes, students gain a better understanding of each of their subjects (be it history, biology, or math) and work to develop skills they will use later on in life. Through their extra class TOK (theory of knowledge), they learn how to combine all the skills they have learned in their IB-level classes and use them to question the sources and implications of knowledge. Overall, both CP and DP offer helpful skills that students can use after high school and in the real world. - **Rubi Torres**

Top 5 Study Techniques to Pass Your Next Exam

1. Spaced repetition
2. The Feynman Technique
3. Pomodoro Technique
4. The SQ3R Method
5. Self-quizzing

"Opportunities don't happen, you create them." - Chris Grosser

Club Spotlight

ESPORTS

Esports is starting up again and is ready for another year of competing! This year we might receive and set up new PCs, where we'll be able to play games like Overwatch, League of Legends, and Rocket League! The main game that we will play, and is ready for anyone to join is Super Smash Brothers Ultimate and the season will begin on October 2nd. Anyone is able to join (as long as you have above a 2.0 GPA) and we'll be competing against each other and other schools. Depending on your skill level, you will either be placed on JV2, JV1, or Varsity, with each of the teams having substitutes. We are excited to see all the new faces that will be joining this year, and we will welcome everyone with open arms! - **Joseph Leano**

Green Club

Green club is responsible for collecting and sorting the school's recyclables that are located in blue bins throughout campus. Participating in recycling will give an opportunity to join beach clean ups where we go to the Santa Monica beach and clean up as much as possible. The beach clean ups do not happen often but are fun to participate in. On top of that, it encourages recycling on campus! Participating with recycling can add towards hours for the CP program and can be a catalyst for reflecting if you are in DP. Aside from those previously stated activities, Green club is also responsible for taking care of the garden outside of the C and D buildings, where we tend to plant and maintain produce. To keep up maintenance, we do Garden builds on Saturdays. Participating will help you clear tardies and you'll learn how to take care of gardens, which is based on honest work and patience. - **Luis Aispuro**

Club Spotlight

EP3C

There are many amazing performance clubs available at Edgewood, EP3C being one of them! EP3C is a club that has four main distinct parts. This includes poetry, playwriting, acting, and music, singers and musicians are in this category. For this newsletter, I will be focusing on the poetry aspect. The poetry of EP3C is one of the most crucial parts of our club! During our performances, we have members read poetry based on specific themes that fit the show. These poems are written by the members which allows for students to express their creativity and perform on stage if acting, singing, or playing an instrument does not appeal to them. So if you're interested, talk to Mr. Michael in room O-9. - **Tyler Hernandez**

Auditions for next year's production are:

Monday 11/6 @ 3:45

Wednesday 11/8 @ 3:45

@ Room O-9
