Trustees,

Thank you for working to get an emergency meeting for the mask issue. I'm urging you to stand your ground and to provide these kids some relief. Provide us a choice.

My daughter went to the nurse today because she was dizzy and felt sick. Nurse called me and said she was "white as a sheet" and her blood pressure was 87/49. Read that again 87/49!!

The nurse told me point blank that this was from not having food and water. They can't have snacks in class, and she was dehydrated from not removing her mask enough to drink enough water. This is absolutely ridiculous and as a result, she missed almost of a day of instruction. I shudder to think what could have happened if she actually fainted and hit her head.

I have instructed her to keep her mask down as much as she needs to, so she can drink water as often as she needs to, during the day. Please end the nonsense that we all see through. Please stop messing around with the health of these children.

We waited for vaccines...now we are being pressured to wait until next year...what will be the next "wait?" The ball is in your court. The time is here. Make the right decision for these kids.

Received and understood. I appreciate your points. I see the same health problems being so important to consider now that the weather is so hot and humid.

Thank you for the email.

Jan Hammond.

Thank you thank you thank you. You were powerful tonight. I was so impressed with your command of the meeting. Keep this up!!

The children thank you, too!!
