

Position Video guidelines and requirements

Delegates are expected to produce a position video explaining their country's position on the issue of the committee to which they belong.

What is a position video? In MUN, it is common practice for delegates to bring position papers— one-page essays that present their country's position on certain issues and propose solutions to the issue—to their conferences. At ASF MUN, we decided to change the format of this position paper to video. In it, you will appear on camera and you will talk about the same things you would talk about in a position paper.

How will delegates choose their countries? Delegates will need to consult the Google Form to register.

What are the position video's requirements?

1. A 1.5 to 2 minute video outlining the student's country's position on and solution to the committee's issue.
2. Clear audio and video. Videos must be filmed on a computer with the student seated. Headphones are encouraged but not required.
3. Has to show a clear understanding of the topic.

What are the consequences for not completing the video?

1. Delegates who don't submit their position won't have the right to receive awards and will be asked by their chair to express their country's position to the whole committee in the speakers list.
2. Delegates will also need to spend the two days hand writing position papers in the detention hall (or any other undisclosed location) if delegates fail to turn in video.

How will the videos be checked? The chairs will be in charge to check the position videos of all of the delegates in their committee and grading it according to the position paper rubric attached below:

When is the video due? January 9h, 2024
