

Instructional/Service Delivery Model

The “School House” Model

The board recognizes that for students to grow academically, socially, culturally, emotionally and physically, so they will be prepared for a rapidly changing society, there is need for a comprehensive, K-12 approach to instructional delivery.

To this end, the board has formally named the “School House” model as the approved instructional/service delivery model for the Rainier School District.

The superintendent will be responsible for ensuring that the “School House” model is implemented in the district’s schools and shall be responsible for recommending any potential changes to the board.

The official district version of the “School House” model will have the version number and date of last update located in the upper right hand corner and be attached to this policy as an addendum.
