

**ANN SOBRATO HIGH SCHOOL
COURSE DIRECTORY
AND
REGISTRATION INFORMATION
2024 – 2025**

(UPDATED 12/2023)

A MESSAGE FROM THE PRINCIPAL

Dear Students and Parents,

The staff at Ann Sobrato High School want all students to be successful. We believe that the first step in this process is to help parents and students select appropriate courses to meet high school graduation requirements and college and career goals.

To assist you, we will:

- provide a Course Directory
- hold small-group student advisories to discuss graduation requirements, and college and career readiness
- have counselors meet one-on-one with students to discuss their course requests
- schedule an evening event where parents and students can receive information

We recommend that parents and students discuss:

- Goals during high school
- Hopes and plans after graduation
- Interests, skills, and academic strengths
- Desired and required courses for academic plan

Please consider the following:

- Each student is different and therefore has different needs. Request courses that meet your student's needs, strengths, and goals.
- Students' interests, goals, and strengths may change. Try to request an academic program that keeps the student's future options open.
- We strongly recommend that students take the **most academically demanding program** that they can **successfully complete**.

The courses requested during the registration process determine our hiring and master schedule for next fall. This is why changes to course requests are not possible after May.

We are excited to work with you and your students as we plan for the 2024-2025 school year. If you have questions regarding this process, please reach out to your student's counselor. **GO BULLDOGS!!**

Sincerely,

Theresa Sage
Principal, Ann Sobrato High School

A Message from the Principal	1
Table of Contents	2
Overview of Registration Process	3
MHUSD High School Graduation Requirements	4
College/University Testing Requirements	5

COURSE DESCRIPTIONS AND SUBJECT AREAS:

Social Studies– Subject Area A	6
English – Subject Area B	9
Mathematics – Subject Area C	12
Science – Subject Area D	15
World Language – Subject Area E	18
Visual or Performing Arts – Subject Area F	20
Career Technical Education/Electives – Subject Area G	25
General Electives	30
Physical Education	32
Special Education	34
Notes	36

OVERVIEW OF REGISTRATION PROCESS

December - January

Counselors meet one on one with students to review course requests and academic plan.

January

Course Information Night will be on Sobrato campus. (Check the [Sobrato Calendar](#) on the website for the exact date.) The night will include information regarding graduation requirements, college eligibility requirements, department overviews and information, information regarding AP classes, and general information regarding life at Sobrato. Teachers, counselors and administrators are available to answer questions about course sequences and electives within each department. Teachers are the course content experts and can answer all questions specific to their department's courses.

February - April

Students' course selections are tallied and staffing needs are identified.

May

Parents and students can review on the Aeries Portal the courses requested. Students and parents may request an adjustment to the selected course requests. However, based on space availability, not all requests for adjustments can be honored.

August

During student orientation, students receive their class schedules. If a course placement error has been made, students may go to the counseling office to review schedule adjustment options.

Morgan Hill Unified School District

High School Graduation Requirements

Morgan Hill Unified School District's default curriculum is considered basic academic preparation for college, trade school, military, and career readiness. In order to be eligible to apply to any school in the University of California (UC) or the California State University (CSU) systems, you must take certain classes in high school known as the "A-G requirements." The MHUSD graduation requirements cover all the A-G requirements. Students who complete the default curriculum of College Prep (CP) courses with grades of C or higher will be eligible to apply to four-year universities. This required curriculum also provides excellent preparation for career paths and the world of work.

Morgan Hill Unified Graduation Requirements

1. **Social Studies** (3 years – World History, US History, Civics/Econ)
2. **English** (4 years – Eng 9, Eng 10, Eng 11, Eng 12)
3. **Math** (3 years required—Integrated Math 1, Integrated Math 2, Integrated Math 3)
4. **Science** (3 years— Biology, Chemistry, Physics)
5. **Language** (2 years or equivalent; equivalency can also be shown via AP Exam, SAT II subject test required – see below)
6. **Visual and Performing Arts** (1 year)
7. **College Prep elective** (1 year – an additional A-F course)

Additional Graduation Requirements:

- **Physical Education** (2 years, including PE 9 and the CA Fitness test)
- **CTE – Career Technical Education** (1 year course – may be a course that also meets VPA)

Total of 220 credits

Language Equivalency

Students who read, write, and speak a language other than English may be eligible for a waiver from coursework. Students who are fluent in another language should speak with their counselor regarding receiving language equivalency. Upon passing any of the exams below, students can receive language equivalency for graduation and submit language requirement for university admissions purposes.

AP Exams are available in Spanish, French, Chinese, Japanese, German, and Italian. Students interested in demonstrating proficiency via an AP exam should see a counselor and sign up for the appropriate AP exam. AP Exams are available only once a year in May. AP Exams are ordered and proctored at Sobrato. The approximate fee is \$94 per exam. Students can get more information about AP Exams at <http://apcentral.collegeboard.com>.

SAT Subject Tests are available in Spanish, French, Chinese, Japanese, German, Italian, Modern Hebrew, Latin, and Korean. Students interested in demonstrating proficiency via a Subject Area test should see a counselor and sign up on College Board to take the appropriate Subject Area test. These tests are available several times a year but are NOT proctored at Sobrato. The approximate fee is \$48 per exam. Students can get more information about Subject Tests at <http://sat.collegeboard.org/about-tests>.

College/University Testing Requirements

Admission to a four-year university sometimes requires a college admission test such as the SAT or the ACT. Most, but not all, colleges accept either test. These tests are taken no later than the fall of the senior year. Many students take the first exam during their junior year. Students will report SAT or ACT scores on their college applications.

The **SAT** contains three sections: Reading, Math, and Writing and Language. The **ACT** contains four sections: Reading, Math, English, and Science. Both also have an optional essay that the counseling department recommends students take, as some schools list it as a requirement. It is also recommended that students take a SAT Subject Test as soon as appropriate after the completion of the coursework if they are planning to apply for a STEM major (after an AP exam). Students should research the requirements or recommendations for the universities to which they hope to apply.

Invaluable practice for the SAT is the **PSAT** (Preliminary SAT) which students can register and take in October at Sobrato. We recommend that all students take this test at least once. Juniors taking the PSAT may also qualify for a National Merit Scholarship Program.

For more information on the SAT Test, Subject Tests, and the PSAT, visit the College Board website at <http://sat.collegeboard.org/about-tests>. For more information on the ACT Test visit www.actstudent.org.

The counseling department has fee waivers for both tests for students that receive free or reduced lunch.

Social Studies – Subject Area A

130300 AP Human Geography Year 9-12 Social Studies Meets Requirement “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in 8th grade U.S. History.

Description: AP Human Geography is an introductory college-level human geography course. Students develop their understanding of human geography through data and geographic analyses as they explore topics like population and migration patterns, cultural and political patterns, rural and urban land-use patterns, and industrialization and economic development patterns. Students will learn about every region of the world as they apply these concepts to both historical and current events. Students will also develop skills in: reading and note-taking using a college-level textbook, map, data, and source analysis, and technical writing. Students will develop the skills necessary to pass, and are expected to take, the AP Human Geography examination in the spring.

919870 World History CP Year 10 Social Studies Meets Requirement “A” for CSU/UC

Description: This course provides students with a background in world history beginning with the Rise of Democratic Ideas from Ancient Greece and Rome. It covers the Scientific and Industrial Revolutions, the Enlightenment, Imperialism, the two World Wars and concludes with contemporary world issues, which allows students to gain a better understanding of the modern world. Through utilizing the text, research, hands-on projects, individual and group presentations, essays, and Socratic Seminars, students will sharpen skills necessary to analyze and evaluate the events of history.

160400 AP World History Year 10 Social Studies Meets Requirement “A” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Advanced Placement Human Geography in 9th grade (highly recommended) and/or Advanced English 9.

Description: Advanced Placement World History is taught as a college equivalent class. It traces the development of world history from the Early Modern Era (1450) to the recent era. Special attention will be paid to the assessment of change and continuity over time, the development of nations and their interactions with one another, and the dynamics of political, economic, religious, and intellectual developments within each. The class incorporates both extensive reading in a college level textbook and interpreting primary sources as well as historical, analytical, and writing skills necessary for success in a college level history class. Students will develop the skills necessary to pass, and are expected to take, the AP World History examination in the spring.

130310 US History CP Year 11 Social Studies Meets Requirement “A” for CSU/UC

Description: This course emphasizes U.S. History in the 19th, 20th, and 21st centuries. Students will focus on the following major units: Political and Religious Foundations of America, Industrialization and America’s Rise to World Power, Social and Political Changes between the World Wars, Domestic Issues after WWII, and Foreign Affairs after WWII into the modern era. These units, organized into historical periods/themes, provide a detailed view of the critical events, people, and processes, which have created the United States of the 21st century. A wide range of materials and learning activities are incorporated within the course: lecture/note-taking, researching and writing, document analysis, videos, group and individual presentations, projects, and simulations.

160310 AP US History Year 11 Social Studies Meets Requirement "A" for CSU/UC
Suggested Course Preparation: Satisfactory achievement in 8th grade U.S. History, CP/AP World History. AP World History is highly recommended.

Description: Advanced Placement U.S. History compares to a college-level United States History survey course. The course challenges students to rigorously examine the main issues and problems of American history, from the pre-Columbian period to the present. In covering the breadth of this period, students will address the political, economic, social, diplomatic, and cultural dimensions within each era. In-depth reading and note-taking of the college-level text, several supplementary books, and primary source documents are incorporated, along with analytical writing skills and projects to promote student engagement and retention of content. Students will develop the skills necessary to pass, and are expected to take, the AP U.S. History examination in the spring.

130550 Civics CP Sem 12 Social Studies Meets Requirement "A" for CSU/UC

Description: This one-semester class is offered in combination with Economics as a requirement for graduation. As students prepare to vote, participate in community activities, and assume the responsibilities of citizenship, they will learn about the American system of government and politics, and explore current issues. Interpretation of the Constitution and other historical documents are also emphasized. Students must complete the district outside points requirement by attending public meetings and court proceedings, or by performing community service as volunteer work, while enrolled in this course.

130650 Economics CP Sem 12 Social Studies Meets Requirement "A" for CSU/UC

Description: This one-semester course is offered in combination with Civics as a requirement for graduation. It focuses on basic economic principles: supply and demand, banking and monetary policies, unemployment, and inflation, as well as the role of consumers, government, and labor in the economy. Students will learn about various economic systems, micro and macroeconomics, and international trade, as well as studying about personal finance and investing, and how to file taxes, while applying tools such as graphs, statistics, and equations to their understanding.

130050 Psychology CP Sem 11-12 Social Studies Meets Requirement "G" for CSU/UC
Suggested Course Preparation: Satisfactory achievement in 10th grade CP/AP World History

Description: Combined with the Sociology, Marriage, Sex & Family class (below), this semester class will fulfill a year of Social Sciences. It is an introductory psychology course, studying human behavior and mental processes. Personality theories, learning and memory, sensation and perception, psychological theorists, consciousness, psychological disorders and mental illnesses are incorporated within the course. Class structure includes reading from the text, lecture, discussion and participation as well as guest speakers.

120020 Marriage, Sex & Family CP Sem 11-12 Social Studies Meets Requirement "G" for CSU/UC
Suggested Course Preparation: Parent permission is required

Description: Paired with the Psychology class (above), this semester course will fulfill a year of Social Sciences. This introductory sociology course will investigate a range of contemporary issues which include, but are not limited to, human relationships, marriage, sex (including reproduction and sexually transmitted infections), family, education, comparative cultures, life skills, handling stress, addictions, loss, gender and sexuality issues.

The structure of the course includes text and article readings, student projects, research, guest speakers and class discussions.

130150 AP Psychology

Year 11-12 Social Studies Meets Requirement "G" for CSU/UC

Suggested Course Preparation: This course is open to 11th and 12th grade students. Successful completion of CP Psychology/Marriage, Sex, & Family is recommended but not required.

Description: The AP Psychology course introduces students to the systematic and scientific study of human behavior and mental processes. While considering the psychologists and studies that have shaped the field, students explore and apply psychological theories, key concepts, and phenomena associated with such topics as the biological bases of behavior, sensation and perception, learning and cognition, motivation, developmental psychology, testing and individual differences, treatment of abnormal behavior, and social psychology. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. Students will develop the skills necessary to pass, and are expected to take, the AP Psychology examination in the spring.

English – Subject Area B

213023 English 9 Adv A-G

Year 9-12 English

Meets Requirement “B” for CSU/UC

Description: In the Advanced English 9 course, students will work toward mastery of the Common Core State Standards for English Language Arts. Units of study will be created around essential questions and will utilize a balanced literacy approach between literature and informational texts, traditional texts and multimedia, formative and summative writing, independent practice and collaborative learning. Students will investigate Essential Questions about argumentation, individual choices, heroism, and social justice by reading both assigned and choice literature and informational texts.

213024 English 10 Adv A-G

Year 10-12 English

Meets Requirement “B” for CSU/UC

Description: The 10th grade English course aligns with the California 9th and 10th Common Core Standards and builds upon students’ prior skills acquired. The course requires extensive reading of a variety of genres, both fiction and nonfiction with a consideration of historical and cultural context. Class work requires proficiency in analytical reading and writing with respect to determining a theme or central idea and analyzing how explicit word choice and implicit understanding of author’s purpose and audience determines understanding of text. Students will be able to analyze information from multiple sources and will synthesize the information by including citations into their works using precise language and specific vocabulary. Students will be able to interpret and evaluate the impact of figurative language and universal themes.

216100 AP Seminar

Year 10 English

Meets Requirement “B” for CSU/UC

Suggested Course Preparation: Satisfactory achievement in Advanced English 9

Description: Students in this course develop and practice skills in research, collaboration, argument, and communication using a variety of real-world topics and academic disciplines. Students will learn to identify credibility and bias in sources used for research. Students will identify common themes and synthesize information from a variety of sources, including literature, art, non-fiction text, and research studies. They will write research-based essays, and design and give presentations both individually and as part of a team. Students will be prepared for and are expected to submit the two CollegeBoard Performance Tasks and take the CollegeBoard End-of-Course Exam associated with this course.

213050 English 11 Adv A-G

Year 11 English

Meets Requirement “B” for CSU/UC

Description: The 11th grade English course in MHUSD is designed to build upon students’ prior skills aligned with the 11th-12th grade Common Core State Standards. The course will require extensive reading of a variety of genres, both fiction and nonfiction, in order to demonstrate grade level comprehension, a depth of understanding, awareness of text purpose, audience, and occasion, and to analyze and interact with the text. Students will receive regular practice in writing, and will be required to write extensive and structured papers directed at various audiences and responding to a variety of rhetorical tasks, especially analysis and persuasion. Students will demonstrate knowledge and ability to move through the writing revision processes. All students will participate in active discussions in both large and small groups, demonstrating an ability to listen actively and to think critically.

261050 AP English Language

Year 11 English

Meets Requirement “B” for CSU/UC

Suggested Course Preparation: Satisfactory achievement in Advanced English 10

Description: The Advanced Placement Language and Composition course is designed to build upon the literature, composition, vocabulary, and other communications skills addressed in 10th grade English classes. Students engage in a variety of learning experiences: writing, research, oral presentations, reading of various genres in nonfiction, group work, and independent study. Through these experiences, students will explore the development of rhetoric as part of American history and thought. Students will also strive to improve competence in writing well-developed essays and participating in engaging and questioning discussions. The AP class prepares students for the Advanced Placement Exam in May as well as provides a rigorous learning environment which emulates a college level course and may provide students college credit with a passing grade on the AP Exam. Students will develop the skills necessary to pass, and are expected to take, the AP English Language and Composition examination in the spring.

213510 English 12 Adv A-G Year 12 English Meets Requirement “B” for CSU/UC

Description: This course aligns with 11th and 12th grade Common Core State Standards English Language Arts & Literacy. It is intended to prepare students for post-secondary college and career options. The course intends to develop well-informed, thoughtful and creative readers, writers, listeners and thinkers. Classwork prepares students for the respectful, ethical dimensions of academic discourse. This course focuses on research skills, media literacy, and evaluating source credibility. Students learn to construct arguments after reading, comprehending, and evaluating complex text of various genres and disciplines. The course develops skill in recognizing, adapting, and responding to varying demands of audience, task, purpose, genre, and discipline. The course continues to have students, use, cite, and value evidence. The class requires students to enhance communication through strategic capable use of technology and digital media. Students demonstrate independence through curiosity and experimenting with new ideas.

216050 AP English Literature and Composition Year 12 English Meets Requirement “B” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in English 11 CP or AP English Language

Description: An AP course is a college-level course with high school supports. Students will read a variety of forms of literature from multiple genres and cultures, focusing on building complex literary analysis and academic discourse skills in order to prepare for the AP Literature exam. Discussion is a crucial aspect of literary study, especially at this level, and students will be expected to take part in daily discussions. Writing assignments will vary from timed in-class essays and out-of-class essays. Students should be prepared to keep up with consistent reading homework outside of class time. Additionally, students will take AP-style multiple choice tests regularly to prepare for the exam. All students enrolled in AP Literature are expected to take the AP exam.

211503 Newcomer ELD Year 9-12 English Meets Requirement “B” for CSU/UC
Suggested Course Preparation: students score a 1 on ELPAC and have been enrolled in US schools for less than one year.

Description: This course develops student’s ability to read, write, speak, and listen in English with an emphasis on metacognitive, reflective, and receptive skills. The curriculum will align with grade level standards and rotate content by unit to prepare students for success in all classes. **This course counts as English credit toward graduation and is a UC/CSU approved English course.**

211504 LTEL ELD Year 9-12 English Meets Requirement “B” for CSU/UC

Suggested Course Preparation: students score a 2 or 3 on ELPAC and have been enrolled in US schools for at least five years

Description: This course continues to develop the student's ability to read, write, speak, and listen in English with an emphasis on literacy and study skills. The curriculum covered in this course will align with the appropriate grade level Language Arts Standards and grade level English courses described above. **This course counts as English credit toward graduation and is a UC/CSU approved English course.**

Mathematics – Subject Area C

313224 Integrated Math 1 Year 9-12 Math Meets Requirement “C” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Math 8

Description: Integrated Math 1 objectives include, but are not limited to, the following units: modeling with functions, linear functions, linear equalities and inequalities in one and two variables, rules of motion, geometric relationships and properties and statistics. The following eight standards for mathematical practice will be included within the course structure: perseverance, reasoning, construction of arguments, modeling of mathematics, use of the appropriate tools of mathematics, precision, use of structure and identifying patterns.

313225 Integrated Math 2 Year 9-12 Math Meets Requirement “C” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Integrated Math 1. It is recommended that a student complete Integrated Math 1 with a grade of C or better. Students who earn a grade of C- in Integrated Math 1 may need additional support to be successful in this course.

Description: Integrated Math 2 objectives include, but are not limited to, the following units: family of functions, graphing form of family of functions, coordinate geometry, quadratic functions and equations, similar figures, circles, probability, introduction to logarithms. The following eight standards for mathematical practice will be included within the course structure: perseverance, reasoning, construction of arguments, modeling of mathematics, use of the appropriate tools of mathematics, precision, use of structure and identifying patterns.

313226 Integrated Math 3 Year 10-12 Math Meets Requirement “C” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Integrated Math 2. It is recommended that a student complete Integrated Math 2 with a grade of C or better. Students who earn a grade of C- in Integrated Math 2 may need additional support to be successful in this course.

Description: Integrated Math 3 objectives include, but are not limited to, the following units: geometric measurement and dimension, exponential functions, trigonometric ratios and functions, functions, rational and polynomial expressions. The following eight standards for mathematical practice will be included within the course structure: perseverance, reasoning, construction of arguments, modeling of mathematics, use of the appropriate tools of mathematics, precision, use of structure and identifying patterns.

313850 Statistics CP Year 11-12 Math Meets Requirement “C” for CSU/UC
Suggested Course preparation: Satisfactory achievement in Integrated Math 3. It is recommended that student complete Integrated Math 3 with a C or higher.

Description: This course is designed to be a project-based introduction to applied statistics. Reasoning statistically is essential to being an informed citizen and consumer. This course will prepare students for college statistics. By the end of this course, students shall have rudimentary knowledge of statistical reasoning and skills that support an informed populace.

PROPOSED AP Pre Calculus CP Year 11-12 Math Meets Requirement “C” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Integrated Math 3. It is recommended that a student earn a grade of B or better in Integrated Math 3. Students who earn a C in Integrated Math 3 may need additional support to be successful in this course.

Description: The objective of this course is to prepare students for college calculus. Topics include but are not limited to the following: trigonometric functions and their inverses, graphs and identities, trigonometric laws and formulas, trigonometric equations, limits of functions, and introduction to derivatives. The following eight standards for mathematical practice will be included within the course structure: perseverance, reasoning, construction of arguments, modeling of mathematics, use of the appropriate tools of mathematics, precision, use of structure and identifying patterns. This is a college level course, which follows the College Board's outline. Students will develop the skills necessary to pass, and are expected to take, the AP Pre Calc examination in the spring.

316750 AP Calculus AB

Year 11 - 12 Math

Meets Requirement "C" for CSU/UC

Suggested Course Preparation: Satisfactory achievement in Pre Calc/Trig with a grade of B or better. Students who have successfully completed the Math Diagnostic Placement Test in the Integrated Math 3 and have received a grade of A or better can also advance directly to this course. Students who earn a C in Pre Calc/Trig may need additional support to be successful in this course.

Description: This is a college level course which follows the College Board's outline. The course includes but is not limited to the following topics: properties of relationships of polynomials, exponential, logarithmic, circular functions, method of approximation, concepts of limits, differential and integral calculus. The following eight standards for mathematical practice will be included within the course structure: perseverance, reasoning, construction of arguments, modeling of mathematics, use of the appropriate tools of mathematics, precision, use of structure and identifying patterns. Students will develop the skills necessary to pass, and are expected to take, the AP Calculus AB examination in the spring.

316755 AP Calculus BC

Year 11 -12 Math

Meets Requirement "C" for CSU/UC

Suggested Course Preparation: Satisfactory achievement in AP Calculus AB with a grade of B or better. Students who earn a C in AP Calc AB may need additional outside support to be successful in this course.

Description: This is a college level course which follows the College Board's outline. The course extends topics from Calc AB. It includes but is not limited to the following topics: properties of relationships of polynomials, exponential, logarithmic, circular functions, method of approximation, concepts of limits, differential and integral calculus. The following eight standards for mathematical practice will be included within the course structure: perseverance, reasoning, construction of arguments, modeling of mathematics, use of the appropriate tools of mathematics, precision, use of structure and identifying patterns. Students will develop the skills necessary to pass, and are expected to take, the AP Calculus BC examination in the spring.

316850 AP Statistics

Year 11-12 Math

Meets Requirement "C" for CSU/UC

Suggested Course Preparation: Successful achievement in Integrated Math 3 with a grade of A, or satisfactory achievement in CP Statistics with a grade of C or better, or satisfactory achievement in Pre Calc/Trig with a B or better. Students who do not meet these suggested guidelines may need additional outside support to be successful in this course.

Description: This is a college level course, which follows the College Board's outline. The student will learn the many aspects of statistics. Topics include the exploration and description of data, planning statistical research, probability testing and experiments, and statistical inference and modeling. Students will develop the skills necessary to pass, and are expected to take, the AP Statistics examination in the spring.

319274 Math for Liberal Studies (MATH 14) Sem 11-12 Math Meets Requirement "C" for CSU/UC

Suggested Course Preparation: Successful completion in Integrated Math 3 with a grade of C or better. Students who do not meet these suggested guidelines may need additional outside support to be successful in this course.

Description: Survey of selected topics from contemporary mathematics to introduce the liberal arts student to a variety of mathematical ideas, methods and historical trends. Topics include systems of numeration, logic, set theory, mathematical modeling, geometry, trigonometry, mathematics of finance, probability and statistics. Students taking this course will receive an elevated GPA on their Sobrato transcript and college credit on their Gavilan transcript. This college course is transferable to CSU and UC.

319274 Finite Mathematics (MATH 7) Sem 11-12 Math Meets Requirement "C" for CSU/UC

Suggested Course Preparation: Successful completion in Integrated Math 3 with a grade of C or better. Students who do not meet these suggested guidelines may need additional outside support to be successful in this course.

Description: Systems of linear equations and matrices, introduction to linear programming, finance, counting techniques and probability, properties of probability and applications of probability. Students taking this course will receive an elevated GPA on their Sobrato transcript and college credit on their Gavilan transcript. This college course is transferable to CSU and UC.

312260 Math 1 Support Year 9 Elective

Suggested Course Preparation: Criteria for placement in this course will be based upon performance in previous math classes

Description: This course is designed to provide support for Integrated Math 1 students who have demonstrated difficulty in math concepts. **This course counts as elective credit toward graduation but is NOT a UC/CSU-approved math course.**

312260 Math 3 Support Year 12 Elective

Suggested Course Preparation: Criteria for placement in this course will be based upon performance in previous math classes

Description: This course is designed to provide support for Integrated Math 3 students who have demonstrated difficulty in math concepts. **This course counts as elective credit toward graduation but is NOT a UC/CSU-approved math course.**

Science – Subject Area D

Either Biology CP or Biology CP/Ag will meet the biology graduation requirement. Chemistry CP or Agriculture Soil Chemistry CP will meet the Chemistry graduation requirement. Physics CP or AP Physics 1 will meet the Physics graduation requirement.

Once the graduation requirements are met, upper level science courses may be taken as electives for both graduation and college entrance requirements. The UC/CSU systems and most colleges recommend three high school science classes for students to apply.

413400 Biology CP Year 9-12 Life Science Meets Requirement “D” for CSU/UC
Suggested Course Preparation: Concurrent enrollment in Integrated Math 1 or higher

Description: Biology is a one-year college preparatory course in laboratory life science that is required for graduation by all students. Course topics typically include but are not limited to cellular biology, genetics, growth and reproduction, structural basis of function in living systems, chemistry of living systems, quantitative problem-solving, and data acquisition and display. Students will be involved in laboratory exercises as well as field experiences to enhance their learning.

413450 Biology CP/Ag Year 9-12 Life Science Meets Requirement “D” for CSU/UC
Suggested Course Preparation: Concurrent enrollment in Integrated Math 1 or higher

Description: Agricultural Biology courses apply biological principles and understanding to plant and animal science in order to produce or refine agricultural products. Course topics typically include but are not limited to cellular biology, genetics, growth and reproduction, structural basis of function in living systems, chemistry of living systems, quantitative problem-solving, and data acquisition and display. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

413500 Chemistry CP Year 10-12 Physical Science Meets Requirement “D” for CSU/UC
Suggested Course Preparation: Successful completion of Biology CP or Biology CP/AG and Integrated Math 1, concurrent enrollment in Integrated Math 2 or higher

Description: Chemistry is a one-year college preparatory course in laboratory physical science. Students will study the particulate nature of matter and models of the atom as they apply to gas behavior, energy transfer, thermochemistry, molar relationships, stoichiometry, bonding, nuclear and organic chemistry, equilibrium and acid-base behavior. Laboratory experiences will be used to develop the scientific models used to explain chemical phenomena.

415500 Soil Chemistry Ag CP Year 10-12 Physical Science Meets Requirement “D” for CSU/UC
Suggested Course Preparation: Successful completion of Biology CP or Biology CP/AG and Integrated Math 1, concurrent enrollment in Integrated Math 2 or higher.

Description: This course explores the physical and chemical nature of soil as well as the relationships between soil, plants, animals and agricultural practices. Students examine properties of soil and land and their connections to plant and animal production. Using knowledge of scientific protocols as well as course content, students develop an Agriscience research program to be conducted throughout the first semester of the course.

To complete that whole project each student will investigate and test an Agriscience research question by formulating a scientific question related to the course content, formulating a hypothesis based on related research, conducting an experiment to test the hypothesis, collecting quantitative data, and forming a conclusion based on analysis of the data. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

416700 AP Environmental Science Year 11-12 Elective Meets Requirement “D” or “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Biology CP or Biology CP/AG, and Chemistry or Agriculture and Soil Science CP recommended.

Description: Advanced Placement Environmental science is a one-year course in a laboratory, life science course devoted to the study of the world in which we live. This is a college level course which follows the College Board's framework. Students will be introduced to concepts in ecology, populations, water, air, land, mineral and energy resources, human health and the future. Field trips and laboratory exercises will be an integral part of this course. A college textbook and technology will be used. Students will develop the skills necessary to pass, and are expected to take, the AP Environmental Science examination in the spring.

413900 Physics CP Year 11-12 Physical Science Meets Requirement “D” or “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Biology CP or Biology CP/AG, and Chemistry or Agriculture and Soil Science CP, and concurrent enrollment in Integrated Math 3 or higher math recommended.

Description: Physics is a one-year college preparatory course in laboratory physical science. Students will study kinematics, dynamics, Newton’s Laws, projectile motion, energy and work, impulse and momentum, mechanical waves, as well as electricity and magnetism. Laboratory experiences and designed projects will be used to develop the scientific models used to explain physical phenomena.

416900 AP Physics 1 Year 11-12 Physical Science Meets Requirement “D” or “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Biology CP or Biology CP/AG, and Chemistry or Agriculture and Soil Science CP, and concurrent enrollment in Integrated Math 3 or higher math recommended.

Description: Advanced Placement Physics 1 is a physical science course designed to be the equivalent of the algebra-based physics university course which counts toward the physical science requirement on the A-G for many CSU and UC schools. This is a college level course which follows the College Board's framework. Learning experiences provide in-depth coverage of topics including kinematics; force and translational dynamics; work, energy, and power; linear momentum; torque and rotational dynamics; energy and momentum of rotating systems; oscillations; and fluids. Laboratory experiments and observations are used to demonstrate mathematical applications of natural laws. A college textbook will be used. All AP criteria for laboratory work will be met. Students will develop the skills necessary to pass, and are expected to take, the AP Physics I examination in the spring.

410110 AP Physics 2 Year 11-12 Elective Meets Requirement “D” or “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Biology CP or Biology CP/AG, and Chemistry or Agriculture and Soil Science CP, and Physics CP or AP Physics 1, and concurrent enrollment in a math course higher than Integrated Math 3 recommended.

Description: Advanced Placement Physics 2 is a physical science course designed to be the equivalent of the second semester of an algebra-based physics university course which counts toward the physical science requirement on the A-G requirement for many CSU and UC schools. This is a college level course which follows the College Board's framework. Learning experiences provide in-depth coverage of topics including thermodynamics; electric force, field, and potential; electric circuits; magnetism and electromagnetism; geometric optics; waves, sound, and physical optics; and modern physics. Laboratory experiments and observations are used to demonstrate mathematical applications of natural laws. A college textbook will be used. All AP criteria for laboratory work will be met. Students will develop the skills necessary to pass, and are expected to take, the AP Physics 2 examination in the spring.

416400 AP Biology Year 11-12 Elective Meets Requirement "D" or "G" for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Biology CP or Biology CP/AG, and Chemistry or Agriculture and Soil Science CP, and concurrent enrollment in Integrated Math 2 or higher math recommended.

Description: Advanced Placement Biology is a life science course designed to be the equivalent of the university course taken by Biology majors in their first full year of study. This is a college level course which follows the College Board's framework. It will provide learning experiences focusing on ecology, evolution, heredity, physiology, cell biology, energy flow and biogeochemical cycling; useful statistical math will be taught and applied. College Board recommended laboratory experiments and observations are used to demonstrate how biological information is developed, interpreted and applied. Students will develop the skills necessary to pass, and are expected to take, the AP Biology examination in the spring.

416500 AP Chemistry Year 10-12 Elective Meets Requirement "D" or "G" for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Biology CP or Biology CP/AG, and Chemistry or Agriculture and Soil Science CP, and concurrent enrollment in Integrated Math 3 or higher math recommended.

Description: Advanced Placement Chemistry is a physical science course designed to be the equivalent of the university course taken by Chemistry majors in their first year of study. This is a college level course which follows the College Board's framework. Learning experiences provide in-depth coverage of topics including the structure of matter, kinetic theory of gasses, thermodynamics, bonding, acid-base theory, chemical equilibria and chemical kinetics. The quantitative aspects of chemistry will be emphasized. This includes significant figures, precision of measured values, and the use of logarithmic and exponential relationships. Laboratory experiments and observations are used to demonstrate how chemical information is developed, interpreted and applied. A critical analysis of the reasonableness of results is expected. A college textbook will be used. All AP criteria for laboratory work will be met. Students will develop the skills necessary to pass, and are expected to take, the AP Chemistry examination in the spring.

416950 Anatomy/Physiology CP Year 11-12 Elective Meets Requirement "D" or "G" for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Biology CP or Biology CP/AG, and Chemistry or Agriculture and Soil Science CP, and concurrent enrollment in Integrated Math 2 or higher math recommended.

Description: Anatomy and Physiology is a focused life science course that addresses the structure, functions, and ailments of the human body. Students will study the organization and functioning mechanisms of the skeletal, muscular, cardiovascular, nervous, endocrine, respiratory, digestive, urinary, and reproductive systems. This course takes a lab intensive, hands-on approach to all topics, although individual textbook study is required for success.

World Language – Subject Area E

513200 French 1 CP Year 9-12 Language Meets Requirement “E” for CSU/UC

Description: French 1 students learn basic French grammar and vocabulary as they practice the four language skills: speaking, listening, reading, and writing. Students are also introduced to various aspects of the cultures of France and French-speaking countries. Students in this course are non-native speakers.

513210 French 2 CP Year 10-12 Language Meets Requirement “E” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in French 1 (C or better).

Description: Students will continue to develop language skills, expanding on their speaking, listening, reading, and writing abilities. They will also continue to gain knowledge and understanding of the cultures of the language. Instruction supports entrance to the third level of language and understanding.

513220 French 3 CP Year 10-12 Language Meets Requirement “E” or “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in French 2 (C or better).

Description: French 3 will develop students’ proficiency in French to gain and give information for personal, social, professional, and educational purposes at an intermediate to advanced level. Students will also develop cultural literacy relating to the societies that speak French. Instruction supports entrance to the AP French course.

513220 French 3 CP Honors Year 10-12 Language Meets Requirement “E” or “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in French 2 (C or better).

Description: French 3 Honors will develop proficiency in French to gain information for personal, social, professional, and educational purposes at an intermediate to advanced level. Students will develop cultural literacy relating to the societies that speak French. This honors-level course is supplemented with additional readings and essays. Instruction supports entrance to the AP French course.

516120 AP French Language Year 9-12 Language Meets Requirement “E” or “G” for CSU/UC
Suggested Course Preparation: A grade of C or higher in French 3 CP or French 3- Honors is recommended.

Description: This course will continue to develop students’ proficiency in all four language skills: listening, speaking, reading, and writing. Cultural awareness, reading proficiency, writing skills, and verbal communication are all advanced through thematic units. Instruction is conducted entirely in French. Students will develop the skills necessary to pass the AP French Language examination in the spring.

513150 Spanish 1 CP Year 9-12 Language Meets Requirement “E” for CSU/UC

Description: Spanish 1 students learn basic Spanish grammar and vocabulary as they practice the four language skills: speaking, listening, reading, and writing in Spanish. Students are also introduced to various aspects of Hispanic culture in Latin American countries and Spain. Students in this course are non-native speakers.

513160 Spanish 2 CP Year 9-12 Language Meets Requirement “E” for CSU/UC

Suggested Course Preparation: Satisfactory achievement in Spanish 1 (C or better).

Description: Students will continue to develop language skills, expanding on their speaking, listening, reading, and writing abilities. They will also continue to gain knowledge and understanding of the cultures of the language. Instruction supports entrance to the third level of Spanish language and understanding.

513175 Spanish 3 CP Year 10-12 Language Meets Requirement “E” or “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Spanish 2 (C or better).

Description: Spanish 3 will develop students’ proficiency in Spanish to gain and give information for personal, social, professional, and educational purposes at an intermediate to advanced level. Students will also develop cultural literacy relating to the societies of Latin America and Spain. Instruction supports entrance to the AP Spanish course.

513170 Spanish 3 CP Honors Year 10-12 Language Meets Requirement “E” or “G” for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Spanish 2 (C or better).

Description: Spanish 3 will develop students’ proficiency in Spanish to gain and give information for personal, social, professional, and educational purposes at an intermediate to advanced level. Students will also develop cultural literacy relating to the societies of Latin America and Spain. This honors course is an Instruction to AP Spanish; therefore, students must do oral presentations, read authentic Spanish news articles, and write essays.

513300 Spanish 3/Native Speaker CP Year 10-12 Language Meets Requirement “E” or “G” for CSU/UC

Description: Spanish for Native Speakers is designed for native/heritage speakers with oral language proficiency. The course will continue to complement students’ native Spanish skills with grammar instruction, reading for comprehension, and writing. The course will enable students whose heritage language is Spanish to develop, maintain, and enhance proficiency in Spanish by allowing them to listen, speak, read, and write in various contexts. This course is an Instruction to AP Spanish; therefore, students must do oral presentations, read authentic Spanish news articles, and write essays.

516130 AP Spanish Language Year 10-12 Language Meets Requirement “E” or “G” for CSU/UC
Suggested Course Preparation: A grade of C or higher in Spanish 3 CP or Spanish 3 Honors is recommended.

Description: This course will continue to develop students’ proficiency in all four language skills: listening, speaking, reading, and writing. Cultural awareness, reading proficiency, writing skills, and verbal communication are all advanced through thematic units. Instruction is conducted entirely in Spanish. Students will develop the skills necessary to pass the AP Spanish Language examination in the spring, which they are expected to take when enrolled in the AP course.

516110 AP Spanish Literature Year 11-12 Language Meets Requirement “E” or “G” for CSU/UC
Suggested Course Preparation: Grade B or higher in AP Spanish Language is recommended.

Description: Students will continue developing advanced language proficiency, including expanding their ability to: Listen to reports and lectures of non-literary content. Read newspaper and magazine articles, contemporary fiction, and non-technical writing for comprehension. Express ideas orally and in writing with fluency and accuracy. Students will be prepared for and expected to take the AP Spanish Literature exam in the spring.

Visual or Performing Arts – Subject Area F

515420 Advanced Band CP

Year 9-12 VPA

Meets Requirement "F" or "G" for CSU/UC

Suggested Course Preparation: One or more years of experience on a woodwind, brass or percussion instrument. Placement into Wind Ensemble is by audition only.

Description: Students will rehearse and perform a variety of music from the wind band repertoire on a woodwind, brass, or percussion instrument in four concerts each year, music festivals, and other community events. Students will develop technical skills on their instrument as well as study music theory, music history, and rehearsal and performance techniques. Students will perform Grade 2.5- 5 pieces selected throughout the year (based on the abilities of the ensemble). One section of Adv Band CP (Concert Band) is open to all students regardless of experience, while other sections of Adv. Band CP (Wind Ensemble and/or Symphonic Band) are by audition only. May be repeated for credit.

516375 AP Music Theory

Year 9-12 VPA

Meets Requirement "F" or "G" for CSU/UC

Suggested Course Preparation: One or more years of Advanced Band CP.

Description: Students cultivate their understanding of music theory through analyzing performed and notated music as they explore concepts like pitch, rhythm, form, and musical design. Students work on ear training and development (intervals and melodic and harmonic dictation), understanding scales, modes, cadences, harmonic progressions and other patterns in music, and being able to apply these skills through score analysis. Students will develop the skills necessary to pass the AP Music Theory examination in the spring, which they are expected to take when enrolled in the AP course.

512680 Jazz Ensemble

Year 9-12 VPA

Meets Requirement "F" or "G" for CSU/UC

Suggested Course Preparation: Students must be concurrently enrolled in Advanced Band CP and one or more years of experience on a woodwind, brass or percussion instrument. Placement is by audition only.

Description: Jazz Ensemble & AP Music Theory emphasizes instruction in advanced techniques on a woodwind, brass, or rhythm section instrument (drumset, vibraphone, bass, guitar, or piano) These include skills in tone, intonation, rhythm, tempo, dynamics, articulation, harmony, phrasing, style, music analysis, ear development and improvisation. Students will also experience a variety of music activities through participation, performance, creation, interpretation, and evaluation and perform in concerts, festivals, and other situations as a team. In addition, the course will explore jazz literature and performance practices from various historical/cultural sources as well as provide many opportunities for music appreciation and knowledge of college/career opportunities. May be repeated for credit.

815670 Advanced Multimedia

Year 9-12 Electives

Meets Requirement "F" for CSU/UC

Description: Students will get real-life experience working with visual media, and sound/video production platforms towards creating content with various purposes. There will be a strong emphasis on working collaboratively (production teams) with the objective of producing artistic/expressive content as well as content that is needed for programs around campus and beyond. We'll be working with many of the following 5 basic types of multimedia: Text, Audio Files, Images & Photographs, Video Material and Animation.

Arts, Media, and Entertainment

Performing Arts

PROPOSED Choir Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC

Description: Choir VPA/CTE is an introductory vocal music ensemble for singers. Instruction includes introductory music theory, music history, vocal techniques, sight singing, performance decorum, and ensemble performance techniques. The ensemble performs frequently during the school year, including public events, school concerts (Fall/Spring), athletic events, festival performances and competitions.

526420 Advanced Choir Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC
Suggested Course Preparation: C- or higher in Choir VPA/CTE or teacher recommendation

Description: Advanced Choir VPA/CTE is an advanced vocal music ensemble for singers. Instruction includes advanced music theory, music history, vocal techniques, sight singing, performance decorum, and ensemble performance techniques. The ensemble performs frequently during the school year, including public events, school concerts (Fall/Spring), athletic events, festival performances and competitions.

512310 Drama I CP Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC

Description: Drama CP provides an introduction to oral communication and is designed to reduce inhibitions and improve basic public speaking skills. Students will experience training in pantomime, stage movement, improvisation, basic character development, theater vocabulary, stage presence, and work in front of a live audience. Students will do group and individual projects with out-of-class work and rehearsal as needed.

515340 Advanced Drama CP Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC
Suggested Course Preparation: C- or higher in Drama CP or teacher recommendation

Description: Advanced Drama CP provides an expansion of the theatrical performance concepts learned in Drama CP. Students will experience training in advanced stage movement, short and long form improvisation, advanced character development techniques, and genre specific acting styles. Students will perform both in small workshop environments and for audiences of ranging sizes. This class includes group and individual scene work along with out-of-class work and rehearsal as needed.

Production and Managerial Arts

812230 Stagecraft 1 Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC

Description: In Stagecraft 1, the student is introduced to the technical elements of theater production. Students will begin their learning in all areas of technical theater including set construction and design, theatrical sound engineering, stage costuming, small team management and theater business management. Students will also be introduced to job site safety and the expectations, regulations and responsibilities of a theater technician.

812130 Stagecraft 2 Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC
Suggested Course Preparation: C- or higher in Stagecraft 1

Description: In Stagecraft 2, the student will prepare the technical elements for an actual stage production, producing a minimum of two plays. Students will deepen their learning and choose an area of specialty from set construction and design, theatrical lighting installation and design, theatrical sound engineering, stage costuming, small team management, and theater business management, or another area of business. Students will also study basic industry history, standards, job opportunities and requirements.

Design, Visual and Media

513850 Ceramics CP Year 9 - 12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC

Description: This course provides introductory experiences in both hand-built and wheel-thrown ceramics as well as sculpture. Students will create works that reflect a functional and aesthetic understanding of three dimensional elements of art and design. Students will learn about contemporary art as well as artists of the past. Hand building techniques like pinching, slab building, hollowing, and coiling will be emphasized.

515850 Advanced Ceramics CP Year 10-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC
Suggested Course Preparation: C- or higher in Ceramics CP

Description: This course offers the more advanced/experienced ceramics student the challenge to improve on the basic fundamentals, while utilizing the potter's wheel, advanced hand building techniques, sculpture, art history and the opportunity to focus on developing one's creative voice. Students will have the opportunity to focus on wheel thrown pottery or hand built sculpture to further their creative and technical skills. We will also focus on the development of glazes, glaze application, clay bodies, and firing techniques. There will also be emphasis on production pottery and the business side of ceramics.

119201 College Level Cultural History of Ceramics (ART 10A) Sem 9-12 VPA Meets Requirement "F" for CSU/UC

Description: An introduction to the historical developments and cultural influences of ceramic art. Development of a personal expression is realized through the combination of historical elements, observation and actual creations in clay. Students taking this dual enrollment course will receive an elevated GPA on their Sobrato transcript and college credit on their Gavilan transcript. This college course is transferable to CSU and UC and meets the General Education requirement of Art Appreciation.

119201 College Level Ceramics (ART 7A) Sem 9-12 VPA Meets Requirement "F" for CSU/UC

Description: This course is intended for students who have little or no experience in the field of ceramics. The curriculum introduces basic skills in a well-rounded approach. Forming techniques include pinch, coil and slab hand building along with beginning wheel work. Slips, underglazes, stains, and glazing will be introduced as surface treatments. Safe studio protocols will be taught and followed. Portfolio development and personal assessment are introduced. Students taking this dual enrollment course will receive an elevated GPA on their Sobrato transcript and college credit on their Gavilan transcript. This college course is transferable to CSU and UC.

812310 Advanced Photography Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC

Description: This course concentrates on acquiring skills beyond those of the beginning photographer. Areas of instruction include studio posing & lighting, intermediate & advanced digital lab, and digital editing. Using DSLR cameras and Adobe Photoshop, students experience technical and aesthetic aspects of photography, taking pictures and solving photographic problems with materials, industry standard equipment and production processes. Additional instruction includes exploration of careers, the history of photography, and the continued development of creative and critical visual thinking skills. Students will complete the course year by creating a personal project/portfolio package.

812900 Graphics Design CP Year 10-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC

Description: Graphic Design is combining typography, images and symbols to communicate. Most of the work is done on Macintosh computers, using Adobe Photoshop and/or Adobe Illustrator. Students sample some traditional printmaking practices such as silk screen printing, cyanotypes. Students investigate the careers of working professionals in the field of Graphic Design.

513711 Studio Art I CP Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC

Description: This course focuses on the basic art elements and design principles. Through hands-on experiences and critiques, students will demonstrate the ability to create, appreciate, analyze, and respond to their own artwork as well as that of others from different cultures and throughout history.

515750 Advanced Studio Art Year 10-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC
Suggested Course Preparation: C- or higher in Studio Art I or teacher recommendation

Description: This course offers the more advanced/experienced art student the challenge to improve on the basic fundamentals, while introducing them to a broader scope of media, art history and the opportunity to focus on developing one's creative voice. By taking this course students will begin to create a personal portfolio providing a strong foundation for explorations in AP Studio Art and/or enriching supplemental materials for college applications. Students will have opportunities to show their artwork and will be encouraged to enter contests. Students interested in taking four years of Studio Art classes, culminating in AP Studio Art, are encouraged to repeat this course. This course may be repeated for credit.

516750 AP Studio Art Year 11 - 12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC
Suggested Course Preparation: C- or higher in Advanced Studio Art or teacher recommendation

Description: This course offers an opportunity for students to apply previously learned skills and explore/develop personal imagery while preparing a portfolio to be evaluated by the Advanced Placement Committee (portfolio is in lieu of exam). Major concepts emphasized in this course: increasing quality of students' work-- both conceptually and technically, concentration on an individual series of images that explore a specific idea or theme, and evidence of tenacity/creativity in pursuing the development of one's artistic vision. Students who earn a passing grade on the portfolio evaluation may be granted college credit.

By taking this course, students will begin to create a personal portfolio providing a strong foundation for explorations in AP Art 3D and/or enriching supplemental materials for college applications. Students will have opportunities to show their artwork and are encouraged to enter contests.

Agricultural and Natural Resources

Agricultural Business

812020 Floral Design AG/CTE Year 9-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC

Description: This class involves the fundamentals of floral design theory, techniques, and skills currently practiced in the floral design industry, including wedding, sympathy, party, holiday, and themed floral designs. Subjects will include applied art principles, cut flower care & handling practices, proper and safe use of florist tools and materials, pricing of floral products, and use of current floral business technology. Skills to be developed include customer relations, consultations, pricing, and use of technology in the industry. Course instruction also includes construction of corsages, floral arrangements, foliage plant items, introductory ornamental horticulture, identification of plants and flowers, professional industry organizations, and career opportunities. Construction and servicing of special events, party, and holiday floral displays are included. In addition, the inter-curricular FFA program supports and enhances the materials covered in the classroom. This includes involvement in FFA activities, planning of an agriculture based project, and keeping accurate records.

PROPOSED Advanced Floral Design AG/CTE Year 10-12 VPA/CTE Meets Requirement "F" or "G" for CSU/UC
Suggested Course Preparation: C- or higher in Floral Design

Description: This course allows students to learn advanced professional florist skills for employment in the floral field. Students will explore the floriculture industry on a more technical and advanced level including the proper care and handling of flowers, plants, and foliage; evaluate floral materials and arrangements; utilize floral tools, supplies and products to apply design principles to floral medium; construct arrangements for all occasions; display, price and market floral designs; and preserve floral materials as students run their own floral shop. The art elements and principles of design will serve as a foundation for each unit covered. After completion of this class, students will be prepared to secure a job in the floral industry. Students will be exposed to careers in Agriculture Business. Students will run floral sales, including marketing, purchasing, construction, delivery, and finances. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

Career Technical Education/Electives – Subject Area G

Arts, Media, and Entertainment

Design, Visual and Media Arts

612755 Yearbook Publications Year 9-12 Electives/CTE Meets Requirement “G” for CSU/UC

Description: Yearbook Publications provides training in writing with emphasis on researching, writing, rewriting and editing material for publication. Students in this course write for and publish Sobrato’s student yearbook. Students will learn the computer skills including editing, photography, interviewing, and graphic design, required for modern publishing methods.

PROPOSED Advanced Yearbook Publications Year 10-12 Electives/CTE Meets Requirement “G” for CSU/UC

Description: Advanced Yearbook Publications provides leadership training in writing with emphasis on researching, writing, rewriting and editing material for publication. Students in this course will act as editors, leading classroom activities and making sure the book is publishing ready. Students will learn the computer skills including providing constructive criticism editing, photography, interviewing, and graphic design, required for modern publishing methods. Course can be repeated for credit.

PROPOSED Creative Writing Year 9-12 Electives/CTE Meets Requirement “G” for CSU/UC

Description: Writers of all levels welcome. Students in this course develop skills in creative writing and publishing. As they practice these skills, students work with the ethics of journalism and all parts of the creative writing process. In addition students workshop, write and design children’s picture books, graphic novels, young adult literature, and more.

PROPOSED Advanced Creative Writing Year 10-12 Electives/CTE Meets Requirement “G” for CST/UC

Description: Leadership in writing. Students in this course will act as editors leading workshops to improve their own writing as well as writing of others. They will learn how to give and receive critiques on writing. In addition students workshop, write and design children’s picture books, graphic novels, young adult literature, and more.

Agricultural and Natural Resources

Agricultural Business

812050 AG Sales & Service Year 9-12 Electives/CTE Meets Requirement "G" for CSU/UC

Suggested Course Preparation: Satisfactory achievement in previous Agriculture Education Course and Teacher approval.

Description: Ag Sales and Marketing courses develop student knowledge and skills in agricultural sales and marketing, commodity marketing, agricultural economics, and international agriculture. Instructional units include: successfully starting an agribusiness, developing a marketing plan, pricing, advertising, and selling products and services, communicating with customers, applying commodity trading techniques, basic economic principles, the international agribusiness economy, and agricultural career opportunities. Student skills will be enhanced in math, reading comprehension, communications, and writing through agribusiness applications. Improving computer and workplace skills will be a focus. Participation in FFA student organization activities and

SAE projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

Agricultural Mechanics

812030 AG Mechanics Year 9-12 Electives/CTE Meets Requirement "G" for CSU/UC

Suggested Course Preparation: Satisfactory achievement in previous Agriculture Education Course, concurrent enrollment in Agriculture Education or Teacher recommendation

Description: Introductory Agricultural Mechanics courses provide theory and hands-on experiences that provide opportunities for students to develop basic knowledge and skills in agricultural mechanics. Instructional areas include the basic fundamentals of maintaining and repairing small gasoline engines, basic electricity, welding, construction, cold metal work, and operating agricultural equipment safely. Improving workplace and computer skills will be a focus. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

812951 College Level AG Welding WELD (201) Sem 10-12

Suggested Course Preparation: Satisfactory completion of Agriculture Mechanics.

Description: This course is an introduction to Oxyfuel Cutting/Heating/Welding, Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Flux-cored Arc Welding (FCAW), Gas Tungsten Arc Welding (GTAW), Air-carbon Arc Cutting, Plasma Arc Cutting, Safety and Metal Fabrication. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts. Students taking this dual enrollment course will receive an elevated GPA on their Sobrato transcript and college credit on their Gavilan transcript. This pathway covers the first 2 of 3 classes that lead to a Gavilan Welding Certificate.

812951 College Level AG Welding WELD (202) Sem 10-12

Suggested Course Preparation: Satisfactory completion of WELD 201.

Description: This course continues training in arc, gas, and oxy acetylene welding and oxy fuel and plasma arc cutting; as well as introduces Gas Tungsten Arc Welding (GTAW). Content includes an introduction to welding symbols, fabrication, and a continued emphasis on safe practices and equipment use. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts. Students taking this dual enrollment course will receive an elevated GPA on their Sobrato transcript and college credit on their Gavilan transcript. This pathway covers the first 2 of 3 classes that lead to a Gavilan Welding Certificate.

Agricultural Science

813310 AG Food Science Year 9-12 Electives/CTE Meets Requirement "G" for CSU/UC

Description: This course provides learning experiences in food science and safety which allow students to apply scientific knowledge and processes to practices used in the development and preservation of food products. Issues of food science and safety are examined from a scientific and technological perspective. Students critically

analyze information to evaluate and draw conclusions on the appropriate use of technology to implement food science and safety practices. Units of instruction include: principles of food preservation, food processing, biochemistry of foods, and food selection and consumer health. Careers to be examined include meat inspector, quality control technician, food processor, and sanitation supervisor. Students will use scientific and technological information about food science and safety as a part of developing career plans and personal viewpoints on societal issues concerning the development and preservation of food products. Improving computer and workplace skills will be a focus. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

813311 Advanced AG Food Science Year 10-12 Electives/CTE Meets Requirement "G" for CSU/UC
Suggested Course Preparation: Satisfactory completion of Food Science.

Description: This is a capstone course that should be taken after Food Science. This advanced agriculture food science course will extend the topics covered in Food Science, allowing students to learn additional food processing techniques, especially in the produce, viticulture, meat and/or dairy processing industries. In addition, students in the course will develop an in-depth understanding of food product development, food chemistry, food safety issues, and food marketing strategies. Students will develop a new food product based on current industry trends including packaging and marketing principles. Career exploration in the local food science & processing sector will be included in the course. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

Agricultural Science

812000 AG Horticulture Year 9-12 Electives/CTE Meets Requirement "G" for CSU/UC

Description: This course exposes students to the art and science of growing plants, shrubs, trees, flowers, fruits, and vegetables. They provide information regarding the care and propagation of plants, flowers, trees, and shrubs, but place a special emphasis on those used for decorative and aesthetic purposes. In doing so, they cover a wide variety of topics, including greenhouse and nursery operations, soils and media mixtures, fruit and vegetable production, turf/golf course management, interior and exterior landscaping, irrigation systems, weed and pest control, and floral design. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

817501 AG Veterinary Science Year 10-12 Electives/CTE Meets Requirement "D" or "G" for CSU/UC
Suggested Course Preparation: Satisfactory achievement in previous Agriculture Education Course or teacher recommendation

Description: Veterinary Science courses impart information about the causes, diagnosis, and treatment of diseases and injuries of animals, typically emphasizing domestic and farm animals. Course topics focus on anatomy and physiology, nutrition, behavior, and reproduction, sanitation, and use of veterinary supplies and equipment. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

Information and Communication Technologies

Software and Systems Development

813551 Computer Science Intro Year 9 - 12 Electives/CTE Meets Requirement "G" for CSU/UC

Description: This course teaches the foundations of computer science and basic programming, with an emphasis on helping students develop logical thinking and problem solving skills. Students learn material equivalent to a semester college introductory course in computer science and can program in JavaScript upon completion.

816111 AP Computer Science Principles Year 10-12 Elective/CTE Meets Requirement "G" and "D" for CSU/UC

Suggested Course Preparation: This course is meant to be a first time introduction to computer science, and does not require students to come in with any computer programming experience. However, we recommend that students take our Introduction to Computer Science in JavaScript prior to our AP courses. Students who have completed our Intro to CS course will be able to apply knowledge of concepts covered in the Intro course to the more advanced setting of the AP courses. Satisfactory achievement in Integrated Math 2.

Description: This course introduces students to the foundational concepts of computer science and explores the impact computing and technology have on our society. With a unique focus on creative problem solving and real-world applications, the AP Computer Science Principles course gives students the opportunity to explore several important topics of computing using their own ideas and creativity, use the power of computing to create artifacts of personal value, and develop an interest in computer science that will foster further endeavors in the field. The entirely web-based curriculum is made up of a series of learning modules that cover the fundamentals of programming. Students will be able to write both text based and block based JavaScript programs, and students will use Processing.js to create graphical programs. They will also create webpages using HTML, CSS, and JavaScript. Students prepare for the AP Computer Science Principles Exam administered in May by the College Board.

816101 AP Computer Science A Year 10 - 12 Elective/CTE Meets Requirement "G" and "C" for CSU/UC
Suggested Course Preparation: Satisfactory achievement in Integrated 2 and Intro to Computer Science.

Description: The AP Computer Science A course is an introductory college level course in computer science. Because the design and implementation of computer programs to solve problems involve skills that are fundamental to the study of computer science, a large part of the course is built around the development of computer programs that correctly solve a given problem. At the same time, the design and implementation of computer programs is used as a context for introducing other important aspects of computer science, including the development and analysis of algorithms, the development and use of fundamental data structures, the study of standard algorithms and typical applications, and the use of logic and formal methods. Students prepare for the Computer Science AP "A" Exam administered in May by the College Board.

Health Science and Medical Technology

Patient Care

812351 Sports Medicine I Year 9-12 CTE Meets Requirement "G" for CSU/UC

Description: Sports Medicine is designed for students who are interested in the practical and theoretical aspects of sports injury prevention, recognition, and treatment of sports-related injuries. Students will study career opportunities, ethical and legal responsibilities, overview of basic anatomy and physiology of the human body, tissue response to injury, emergency procedures, mechanisms of sports injury, basic injury evaluation and identification, and communication skills and career skills development. Students will participate in lab activities including basic life support training and American Red Cross certification, and basic injury evaluation. This class also requires work-based learning experiences that involve observing and assisting at sporting events and or in the training room throughout the year, as well as case study problem solving.

PROPOSED Sports Medicine II Year 10-12 CTE

Meets Requirement "G" for CSU/UC

Description: This program is designed to provide students with a more in depth experience in the field of Sports Medicine. Expanding upon the range of topics covered in Sports Medicine 1, students will experience a deeper exploration and understanding of athletic injuries in each region of the body. Topics in each unit will include a review of basic anatomy and physiology; evaluation and care of athletic injuries, and protective taping and wrapping techniques by region. Therapeutic methods of injury care, exercise, and exercise rehabilitation will also be covered. Students are required to complete work-based learning activities outside the classroom. This course includes classroom activities, lab activities, and work-based learning.

General Electives

216101 AP Research Year 11-12 Electives Meets Requirement "G" for CSU/UC
Suggested Course Preparation: Successful completion of AP Seminar.

Description: Students will build on what they learned in AP Seminar to deeply explore an academic topic, problem, or issue of individual interest. Through this exploration, students will design, plan, and conduct a year-long research based investigation to address a research question. The AP Capstone Diploma is granted to students who earn scores of 3 or higher in AP Seminar and AP Research and on 4 additional AP Exams of their choosing.

220900 AVID Year 9-11 Electives Meets Requirement "G" for CSU/UC
(Advancement via Individual Determination)
Suggested Course Preparation: Staff Recommendation

Description: AVID is designed to increase the number of students who enroll in four-year colleges. Although AVID serves all students, it focuses on the least served students in the academic middle. AVID raises expectations of students and provides support for their success. AVID students are enrolled in the school's most challenging courses including advanced placement, and receive support in an academic elective class within the school day by a trained AVID teacher and college tutors. AVID students develop academic study skills including note taking, text reading, and using writing as a tool of learning as a basis for all assignments.

120900 AVID Senior Seminar Year 12 Electives Meets Requirement "G" for CSU/UC
Suggested Course Preparation: Staff Recommendation

Description: AVID Senior Seminar prepares students for entrance into four-year colleges by emphasizing analytical writing, preparation for college entrance and placement exams, college study skills, oral language development, note taking, and research. AVID Seminar students are expected to participate in, and eventually act as moderators for Socratic Seminars. In addition, students are required to make oral presentations to the class on topics related to career searches, contemporary issues, and social concerns, all the while focusing on a culminating senior paper, portfolio, and/or project.

110900 Intro to Ethnic Studies Year 10-12 Elective Meets Requirement "G" for CSU/UC

Description: This course explores the historical and current contributions, challenges, and experiences associated with race and ethnicity in the United States. At its core, the field of Ethnic Studies is the interdisciplinary study of race, ethnicity, and indigeneity, with an emphasis on the experiences of people of color. Topics discussed include the history and origins of race and ethnicity, personal identity, immigration and migration, humanization and dehumanization, media representation, systems of power, social justice, cultural influence and community, etc.

120350 Leadership/ASB Year 9-12 Electives Meets Requirement "G" for CSU/UC

Description: First and foremost, the objective of ASB is to enhance self-esteem and self confidence, develop positive attitudes, learn coping mechanisms and develop, over time, the leadership skills of each individual student. ASB Leadership class provides an opportunity to develop personal values, leadership and teamwork skills and the characteristics of responsibility and integrity. Students will also learn the basics of meeting

etiquette, activity planning, public speaking, managerial skills and time management. **Students should be aware that they will be required to plan and participate in ASB sponsored school activities and are committing to participate in activities outside of regular school day hours.**

Physical Education

712400 PE 9

Year 9 Physical Education

Graduation Requirement

Suggested Course Preparation: All 9th grade students are required to take this course as this is a graduation requirement.

Description: Students will demonstrate knowledge and competency in aquatics, dance, and individual/dual movement activities. Students will learn and apply knowledge of fitness principles, take the California Physical Fitness Test, and develop a personal fitness plan for a healthy lifestyle. Students will demonstrate independence while developing positive social skills and learning to set and strive for personal, achievable goals. Students will also learn to assume leadership roles, cooperate with others, and accept responsibility for their own behaviors.

715535 Advanced Body Conditioning Year 10-12 Physical Education/Elective Satisfies 2nd Year Graduation Requirement

Description: This course is designed to give students the opportunity to learn comprehensive cardio-respiratory endurance activities and training techniques used for achieving physical fitness. Students will benefit from activities including, but not limited to, step aerobics, aqua aerobics, various types of dance aerobics, cardio kickboxing, yoga, self-defense, and resistance training. This course includes both lecture and activity sessions. Students will be empowered to make wise choices, meet challenges, and develop positive behaviors in fitness, wellness, and movement activity for a lifetime.

712430 Lifelong Activity

Year 10-12 Physical Education

Satisfies 2nd Year Graduation Requirement

Description: Students will demonstrate knowledge and competency in team activities, combatives, and gymnastics and tumbling. Students participate in challenging physical fitness activities. They will apply knowledge of fitness principles and evaluate fitness resources to help them achieve desired fitness goals. Students will explore personal interests and identify fitness and recreation opportunities for lifelong involvement.

513550 Marching Band PE Sem 10-12 Physical Education/Elective

Satisfies 2nd Year Graduation Requirement

Description: Marching Band PE is a Fall Semester class designed for students interested in playing a woodwind, brass, or percussion instrument while learning body movement styles within the Marching Arts. Students rehearse and perform a 7-minute high intensity field show and will learn a variety of movement patterns. Students are expected to attend a 9 day band camp prior to the start of school, perform at home football games, participate in two local parades, and participate in all WBA competitions throughout the season in October & November. At home practice and participation in sectionals is an expected requirement of the course. Marching Band PE focuses on individual and collective growth and attendance, willingness to each give our personal best, and the ability to maintain a growth mindset are important and vital parts of being a marcher. Elements of musicianship and marching fundamentals are progressively taught and developed throughout the Semester. Spring semester, this course is replaced with Adv. Band CP. May be repeated for credit.

715530 Strength and Conditioning Year 10-12 Physical Education/Elective Satisfies 2nd Year Graduation Requirement

Description: Students will participate in activities designed to improve and maintain muscular strength and endurance, cardiovascular endurance, and flexibility. Students will learn proper lifting and spotting techniques and demonstrate appropriate behavior in the weight room. Students will work in small groups to monitor and achieve challenging personal fitness goals. Students will be formally evaluated by the instructor on a quarterly basis and be responsible for maintaining a personal workout log.

Special Education

919920 Biology RSP

Year 9-12 Life Science

Description: Based on California State Standards, students who meet eligibility criteria for RSP/SDC services will receive modified instruction in basic biological concepts. This course is devoted to scientific vocabulary, fundamental concepts, investigations, experimentation, and processes of our living world. The student is given a systematic and comparative investigation of many representative organisms, from simple to complex, in order to better understand man's place in the environment and ecology of our living planet. In addition, students will learn and discuss the vital role humans play in the stewardship of planet Earth. **(This course satisfies the Science graduation requirement.)**

919700 English Skills RSP

Year 9-12 English

Suggested Course Preparation: None

Description: Based on California State Standards, students who meet eligibility criteria for RSP/SDC services will receive specialized instruction and intensive remediation in reading and written language skills. Students will practice reading, writing, listening and speaking skills in a separated setting integrated classroom. This is a literature-based program that emphasizes an understanding of the basic coding and decoding of English. In addition, students will develop appropriate language and communication skills. **(This course satisfies the English graduation requirement.)**

919880 General Civics

Sem 12 Social Studies

Suggested Course Preparation: Successful completion of CP or Basic U.S. History

Description: Based on California State Standards, students who meet eligibility criteria for RSP/SDC services will receive modified instruction on the major concepts and perspectives in political science and government. Students will be given the opportunity to gain a deeper understanding of the operation of our legal system. Students will participate in experiences designed to develop an appreciation of the ethical beliefs supported by American Society. This course includes mandatory attendance at local civic functions, including city council, planning commission, and board of education meetings. **(This course satisfies the Social Studies graduation requirement.)**

919890 General Economics

Sem 12 Social Studies

Suggested Course Preparation: Successful completion of CP or Basic U.S. History

Description: Based on California State Standards, students who meet eligibility criteria for RSP/SDC services will receive modified instruction on how the free market operates and distributes goods and services. The course will discuss uses of credit, investments, saving and spending strategies of the consumer. Students will learn business axioms of supply/demand, profit motives, finance, and production of goods, economic theory, monetary policy, use and banking. Students will understand concepts of inflation/deflation, employment/unemployment and their effects on the economy. **(This course satisfies the Social Studies graduation requirement.)**

919600 Math Skills RSP

Year 9-12 Math

Description: Based on California State Standards, students who meet eligibility criteria for RSP/SDC services will receive modified instruction and remediation in basic math concepts necessary to meet individualized math

goals and objectives. This course reviews and reinforces the basic operations of addition, subtraction, multiplication, division of whole numbers, fractions, decimals, percentages, and integers up to and including pre-Algebra I applications. Practical applications of these math skills are taught as a component of vocational education. **(This course satisfies a Mathematics graduation requirement.)**

919980 Physical Science RSP Year 10-12 Physical Science

Description: Based on California State Standards, students who meet eligibility criteria for RSP/SDC services will receive modified instruction in basic Physical Science concepts. This course reviews scientific vocabulary, investigations, experimentation, and emphasizes a general understanding of physics. It encompasses scientific measurement, energy, magnetism, basic chemistry, the periodic table of elements, compounds, light, sound, and electricity. In addition, students will be given the opportunity to complete hands-on projects to reinforce academic areas covered in this course. **(This course satisfies the Science graduation requirement.)**

919870 World History RSP Year 10-12 Social Studies

Description: Based on California State Standards, students who meet eligibility criteria for RSP/SDC services will receive modified instruction in basic concepts and precepts surrounding World History, including significant historical characters, places, and events leading to present day. Major topics include basic geography, study of historical and current countries worldwide, political, agricultural, and economic factors leading to the rise and fall of nations; review of these historical events and how they apply to modern nations today. **(This course satisfies the Social Studies graduation requirement.)**

919830 U.S. History RSP Year 11-12 Social Studies

Description: Based on California State Standards, students who meet eligibility criteria for RSP/SDC services will receive modified instruction in basic concepts and precepts surrounding the history of the United States. Major topics include the birth of our nation, the Constitution, rise of industry, Imperialism, The Roaring 20s, WWI, The Great Depression, WWII, The Cold War, Vietnam, Civil Rights, and issues and events leading to present day. **(This course satisfies the Social Studies graduation requirement.)**
