

Cell Phone Policy

Introduction

The Governing Board understands that cell phones and mobile communication devices are an efficient and important method of conducting California Montessori Project (CMP) business and can help to ensure safety and security to students, staff and others.

Guidelines

The Superintendent or designee shall determine whether an employee needs a cell phone and/or other mobile communication devices in order to perform their job responsibilities. To meet this business need, CMP will either provide a cell phone for business use only or an allowance to eligible employees.
