GBSD Drinking Water Testing plan: updated 12/29/2016 Terry Taylor, Director of Facilities

Following EPA's 3t's in Reducing Lead in Drinking water:

https://www.epa.gov/sites/production/files/2015-09/documents/toolkit_leadschools_guide_3ts_leadschools.pdf

Currently GBSD has followed the EPA plan in reducing lead in drinking water in our school. We have tested all known drinking water sources and are working to reduce all drinking water lead sources to below EPA Limits of 20/ppb. Only one drinking fountain is currently off due to this standard.

Next steps GBSD is now testing water sources in ice machines as well as on all outdoor water spigots as both sources of water do make it into the drinking water source for our students and staff. We will continue to follow the EPA 3t's for Reducing Lead in Drinking Water in Schools. Upon findings from those samples GBSD will address appropriately. At this time water sources that have not been tested to be below EPA levels for schools are not being used for Drinking water Sources.

GBSD will continue to monitor lead levels in drinking water sources and will continue to use the EPA 3t's for remediation of lead in drinking water sources.

GBSD has organize schools in age of construction and specific plumbing material groups to allow specific testing frequencies to address in priority order the schools and or office that require more frequent testing/management.
