## Pear Deck: Student Login Settings

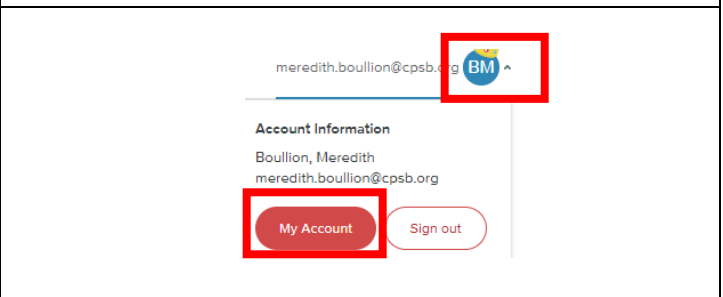

1. Teachers determine whether students join sessions with their CPSB email address or anonymously depending on the teacher's choice for the session.

When students are prompted to join a session anonymously, they'll be provided with a nickname and avatar and can participate in interactive slides, but a teacher will not know the real names of contributions.

Teachers can require CPSB email logins if they want to see who submitted responses since there is a current Act 837 addendum for Pear Deck providing permission to use student email addresses. To set up sessions that require student email logins, start at <https://app.peardeck.com> and sign into your account.

2. Next, click on your person icon and click *My Account*.

3. Here, select *Settings* to turn on *Require Student Logins*. Next, select *Microsoft* to enable the ability for students to login with their CPSB email address.

This setting will hold for all future sessions until it is turned off.
