## Dealer Responsibilities

### Unloading and Inspecting the Shipment

The dealer is responsible for inspecting the equipment and making sure all the pieces are delivered before signing the delivery receipt. WRITE any shortages or damages on the paperwork before you sign it. If damaged heavily, take pictures for documentation when possible, or refuse the shipment. If product is accepted and damage is not noted on bill of lading, dealer is responsible for all repair costs.

### Resale Sales Tax Exemption Forms

New dealers require a resale sales tax exemption form before the order will be shipped. Occasionally, an existing dealer will need to supply an updated form to make our file current.

### Drop Shipments

Absolutely no third party shipments without prior approval.

### Return Policy

Returned items will be assessed a 20% restocking fee plus all freight charges. This only applies to new and unused items returned within seven days of delivery. Used equipment may not be returned. Pre-approval is required for all returns on new equipment.

### Order Cancellations

Order cancellations AFTER unit completion will be charged a 10% cancellation fee.

### Factory Pick-up Orders

If you choose to pick up your product at the factory, you will have 10 working days to pick up your equipment order once complete. After 10 working days, there will be a \$25 per day storage fee. If the equipment is not picked up after 15 working days, the equipment will be put back into inventory and a 10% cancellation fee will be charged.
