

The “Why” Behind the Project

To bring the first neighborhood school in more than 40 years to the students and families of South Norwalk.

About the Workshop

Our second workshop is a forum for the community to share their feedback and preferences as the schematic design is developed. Floor plans, site plans, building elevations and precedent images will be on display. After the presentation, the floor is yours! **We want to listen and understand what comments you may have on the site and building plans.**

Our team will facilitate an **interactive dialogue where you can express your thoughts and concerns, ask questions, and discuss topics.** With your input, this important conversation will continue to help shape the creative vision and development of the new elementary school design!
