

WORK HAPPENS IN ALL CONDITIONS

At OccuNomix, we have been keeping workers safe, seen & comfortable for decades, starting as early as 1982; so you can do what you do in any kind of conditions. From ergonomics to gloves and high visibility apparel we make PPE that keeps you cool, fends off the chill, cushions the unexpected impact, and supports your body against strain. We care about your body at work and because our reputation rides on our name, we push our products to the limit with:

Constant Innovation

From bringing the best that the world market has to offer in fabrics and treatments to finding new and novel designs that change the way workwear functions. OccuNomix is focused on innovation that brings well-made workwear into the future.

Confident Workwear Compliance

We are committed to third party testing our products as the standards are always increasing and the risks of noncompliance even greater. Particularly today, we feel it is more important than ever to give you products that are proven to be what they say they are and perform the way you need them to; to protect you.

Functionally Driven Design

We still leverage our foundation in ergonomics to inform and build products that fit the body at work. For this reason, they have the features and design elements that first and foremost make you comfortable. After that, we provide the services that can customize them to the specific way you work - whenever necessary.

**HIGH VISIBILITY**

AMPED FOR HIGH VIS

It's not just the job but what is around you that can be dangerous. You work shoulder to shoulder next to three-ton vehicles barreling by at 70 mph and you never flinch. You command 25,000-pound machinery that can chew you up and spit you out in a nanosecond. You do this whether it is scorching hot, blinding snow or pounding rain. That is why we make so many different kinds of High Visibility clothing.

03 | ENGINEERED TOUGH®

HIGH VISIBILITY

IBILITY

High Visibility is about compliance, we use rigorous third party testing to ensure all our products meet or exceed the exact standards required. You can be sure our products are certified to be what the label says – fully compliant. Count on safety gear that works harder in the toughest conditions - just like you do!

HIGH-VISIBILITY OUTERWEAR

COLD WEATHER GEAR

The bomber jacket first gained popularity among workers in the 70's and 80's due to its sturdy design and heavy insulation that was required of early flight jackets. Now OccuNomix takes that sturdy design and insulated warmth and engineers it into high visibility bombers, parkas, rainwear, and many other types of outerwear that today's workers demand.

The thermometer below shows the ANSI tested, ASTM F2732, temperature range for garments. Whether you are standing out in the elements in between tasks or hard at work, we have the right gear for your winter.

ANSI/ISEA 107-2015 TYPE P, CLASS 2

Requires less background material which allows easy access to duty belt equipment.

Type P is a public safety classification which includes Emergency & Incident Responders and Law Enforcement.

HIGH-VISIBILITY CLASS 3 VESTS

ANSI/ISEA 107-2015 TYPE R CLASS 3 vests as classified by the American National Standard for High Visibility Safety Apparel and Accessories. CLASS 3 vests are reserved for those working in the most dangerous environments where visibility is the highest priority. TYPE R is a Roadway classification for any occupational workers who are exposed to roadways where traffic is traveling in excess of 50 mph. Also applies to Emergency Personnel or those working in extreme conditions where visibility is at a minimum.

TYPE R, CLASS 3 REQUIREMENTS

- **1240 in²**
Minimum amount of background material
- **1000 in²**
Minimum amount of background material for smallest size offered
- **2"**
Minimum Width of retroreflective trim
- **310 in²**
Minimum amount of retroreflective tape

HEAT STRESS

TAKE ON THE HEAT.

You know us for MiraCool® – the original brand of evaporative cooling products. MiraCool® began with polymer crystals technology over 25 year ago and continues with Poly Vinyl Acetal (PVA) technology that has faster activation and a longer lasting cooling effect. And now we offer Tuff & Dry® perspiration management with our industry-leading wicking and evaporative cooling technology based on the revolutionary Coolcore® fabric.

41 | ENGINEERED TOUGH®

HEAT STRESS

YOUR GUIDE TO COOL

MiraCool® has been synonymous with the best of evaporative cooling for 25 years – whether it is traditional polymer crystal, PVA or Hyperkewl™ Technologies – lightweight super-absorbent materials. Our Tuff & Dry® products offer thermoregulation products that work through UPF sun protection, wicking and evaporative cooling – with our Coolcore® fabric.

TUFF NOUGIES®

MIRACOOOL CRYSTALS TECHNOLOGY

- 25 years of proven cooling
- Crystal polymers plump with water
- Activates in 10-15 minutes
- Designed for quality, not slime
- Triple washed to avoid bleeding or staining

MIRACOOOL ADVANCED FABRIC TECHNOLOGY

- Made from Hyperkewl™ fabric that absorbs and slowly releases water
- Soak in water for 1-2 minutes to activate
- Reusable and easy to recharge

POWERED BY
HYPERKEWL™ PLUS

MIRACOOOL PHASE CHANGE TECHNOLOGY

- Cooling effect lasts for hours maintaining a constant temperature of 65° Fahrenheit for consistent cooling.
- Cooling packs made from non-toxic materials.
- Adjustable fit at shoulders and torso for cooling your core
- Available in regular or flame resistant
- To activate place cooling packs in freezer for an hour or soak in ice water for 20 minutes.

MIRACOOOL PVA TECHNOLOGY

- Super absorbent, durable, lightweight material
- Feels drier to touch
- Honeycomb texture on one side perfect for wiping down
- Activates in one minute
- Designed for 100% evaporative power (no fabric-cover-up)
- 2 patents pending
- Anti-mold & UPF 50+
- Self activating pouch

TUFF & DRY® WICKING AND COOLING TECHNOLOGY

- Chemical-Free Cooling™ fabric technology
- Wicks and cools - with or without water
- Activates instantly; snap when wet
- 23% more cooling power than microfiber
- 30% Cooler than your skin when wet
- Only product tested with proven cooling power*
- Anti-mold & UPF 50+
- Patented

*Powered by CoolCore® - the first product we decide to be awarded the Hohenstein Quality Label "Innovative Technology - Cooling Power"

THREE COOLING VEST TECHNOLOGIES

1 POLYMER CRYSTALS

- Up to 8 hours of cooling relief
- Machine washable
- 100% Cotton
- Soak in water to activate
- Reusable and easy to recharge

2 ADVANCED POLYMER

- 1-2 Minute activation time polymer technology embedded in fabric for lightweight cooling option.
- Soak in water to activate
- Reusable and easy to recharge

10-20 MINUTES

1-2 MINUTES

MIRACOOOL CRYSTALS TECHNOLOGY

902

- Cotton
- Expandable Sides with Buckles
- Lasts up to 8 hours!
- Soak 10-20 minutes to activate
- Pullover Poncho Style

MIRACOOOL ADVANCED FABRIC TECHNOLOGY

POWERED BY HYPERKEWL™ PLUS

903 (Black) 904 (ANSI Class 2)

- Machine Washable
- Zipper Closure
- Stays cool for 5-10 hours
- Wicking Birdseye Panels for fit & breathability
- Pocket: Inside lower left
- Sizing: S/M-2X/3X

WHAT IS HYPERKEWL™ PLUS

HyperKewl™ fabric utilizes a unique chemistry to achieve rapid absorption, stable water storage and controlled evaporation - creating a cooling effect that can cool the user up to 10-15F below the ambient temperature, depending on airflow.

MIRACOOOL ADVANCED FABRIC TECHNOLOGY

901

- 100% Polyester Fabric Shell
- 2" Reflective Tape
- Mesh Shoulders for added breathability
- Pocket: 1 Inside Chest
- Sizing: S/M-2X/3X

HEAT STRESS

FOR THE VERSATILE WORKER

3 PHASE CHANGE

- Cooling effect lasts for hours maintaining a constant temperature of 65° Fahrenheit
- Cooling packs made from non-toxic materials
- Adjustable fit at shoulders and torso for cooling your core
- Available in regular or flame resistant
- To activate place cooling packs in freezer for an hour or soak in ice water for 20 minutes

20 MINUTES IN ICE WATER, 1 HOUR IN FREEZER

OX COOLER BAG INCLUDED!

STATE-OF-THE-ART PATENTED COLD AVENGER®

Stay out longer® with our Cold Weather Face Masks Powered by Cold Avenger®. No matter the exertion level you can breathe naturally. The state-of-the-art ventilator warms & humidifies the cold dry air to protect your airways and skin. Available in two styles!

State-of-the-art patented Cold Avenger® ventilator

OCEX-REG (BALACLAVA)
OCC-REG (FACE MASK)

- Polyester Breathable Anti-Pilling Fleece
- Soft Medical Grade Anti-microbial Polyurethane Ventilator

POWERED BY **COLD AVENGER®**

WARM

Studies show there is no resistance to breathing with Cold Avenger® technology. The user is able to breathe naturally through both the nose and mouth with air inside the mask 40-60°F degrees warmer than the outside temperature

HUMIDIFY

In tests, humidity inside the chamber varied from 70-80% with an internal temperature of 66°F compared to outside humidity of 15% and temperature of 5°F.

PROTECT

Ventilation tests show that percent of O2 and CO2 during inhalation and exhalation are very similar to normal without the mask, indicating more than adequate movement of air through the ventilator and no accumulation of CO2.

GEAR

D30®
.....

BY OCCUNOMIX
ANTI-VIBE

IT'S TIME TO GEAR UP.

OccuNomix has been engineering ergonomic work gear for over 35 years – starting with supports, hand protection, head protection as well as gear bags. At every step of the way, we gained a reputation for exceeding expectations by using the latest technologies available. Looking through our work gear today, you will find some of the most innovative materials ever applied to work gear – from inherent cooling fabrics and infrared textiles to high performance impact resistant materials. No one engineers work gear like OccuNomix!

61 | ENGINEERED TOUGH®

COOLING PERFORMANCE GLOVES

Introducing the first work gloves to keep hands cool. Powered by Coolcore®, these are the only gloves with a patented and chemical free cooling technology, that offers independent lab proven, wicking, drying, and cooling. These gloves help hands stay dryer, longer, which means increased performance and safety.

FINGER TIPS & THUMB

WHAT IS CELLIANT® INFRARED FLEECE?

Celliant® is a cutting-edge infrared yarn technology. It recycles and converts escaping body heat into something that gives the body a measurable boost — infrared energy. It doesn't just trap the heat, it returns it back into the skin. The benefits are temperature regulation, reduced hand fatigue, and of course, warmer hands. Hands stay 5° Fahrenheit Warmer!

ANTI-VIBRATION

Anti-vibration gloves give protection for particular tasks such as operating jackhammers, chainsaws, grinders, and other heavy machinery. Construction workers shouldn't use these traditional tools bare handed. This can cause hand-arm vibration syndrome (HAVS). HAVS can occur in your fingers, hands, and even arms as a result of continuous exposure to heavy machinery vibration. In the palm of these gloves, is extra padding using various technologies to protect you, the hard worker! Invest in a pair today and keep your nerve in these shaky situations!

WHAT IS THE EN 388 STANDARD?

The EN 388 is a European standard which is designed to assess the performance of a fabric or layers of fabric for their ability to resist heavy rubbing, cutting by a blade or sharp object, tearing, and puncture by a pointed object. The test procedure includes a separate tests for each of these properties and a performance level is awarded according to each test result.

GEAR

D3O® KNEE PROTECTION

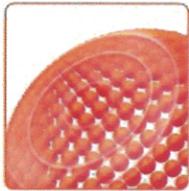

5X MORE PROTECTION THAN REGULAR FOAM KNEE PADS

We've partnered with D3O, the leading provider of impact resistant and cushioning foam, to create three knee pads that provide more comfort and durability. Strategically placed D3O foam under the cap absorbs impact from the ground while improving cushioning and all day comfort. Knee injuries are expensive. Our D3O knee pads offer great value.

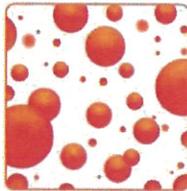

HOW D3O® WORKS

Soft & Flexible Material

Upon impact, molecules absorb and dissipate impact energy

Returns to flexible state after impact

221D

- PE Cap
- Hook & Loop Neoprene Split Strap Closure System

225-D

- PE Plastic Hard Cap
- Buckle & Strap Closures

226-D

- PVC Cap
- Buckle & Strap Closures

KNEE PROTECTION

A CRADLE FOR YOUR KNEES.

Knees are one of the most important joints in the human body. So why are you beating them up? According to the American Journal of Epidemiology, investing in knee pads decreases the risk of knee injury by 56%. That's why we made a line of affordable knee pad solutions, with Cradle Technology™, contoured to fit the knee.

121 (Black Hard PE Cap) **122** (Clear Soft PVC Cap)

- Gel Injected EVA Foam Padding is ideal for hard services
- Neoprene Split Strap keeps knee pads in place comfortable
- PE Cap with Slip Resistant Ridges

125

- Flexible Small PE Cap Design for long wearing and swivel movement

126

- Wide Flexible PVC Hard Cap Design

OK-KP-210

- PE Cap
- Contours to Patella for protection & comfort

127

- Rubber Cap with ridges
- Won't Mar Scuff or Scratch up surfaces

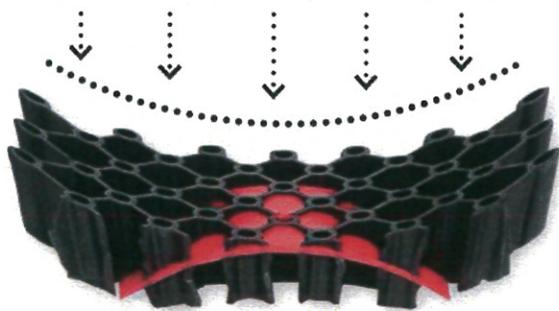

GEAR

REDBACK® CUSHIONING

NOT GEL OR FOAM THE 3RD DIMENSION

Redbacks® award winning knee pads have been scientifically proven to outperform foam and gel knee pads. This patented leafspring technology has phenomenal compression with 100% return to form. It is curved to fit around the knee to eliminate point pressure and distribute weight evenly! You've never seen anything like this!

FLAME RESISTANT

BUILT FR.

ANSI/ISEA 107-2015 requires we call out whether a High Visibility garment is flame resistant or not. OccuNomix has always engineered its FR garments to the highest standards possible – without compromise. So when choosing OccuNomix FR garments, you can feel confident that we've got you covered!

77 | ENGINEERED TOUGH®

FLAME RESISTANT

STANDARDS MADE SIMPLE

ANSI/ISEA 107-2015 Standard
 Since 1999, the standard has been recognized by federal, state and local authorities as well as private industry and provides performance criteria for materials used, specifies minimum areas and recommends placement of the materials.

The standard's performance requirements focus on color and brightness of garments relative to the work environment and the combined use of fluorescent and retroreflective materials to make a person conspicuous in all light conditions, day and night.

ANSI/ISEA 107-2015 includes criteria for flame resistance (FR) as an optional feature of high-visibility personal protective equipment. High-visibility apparel marked as FR must be certified as complying with one of the FR tests cited in the standard.

ASTM F1506 and NFPA 70E Standards
 Garments that meet these standards are ideal for workers exposed to momentary electrical arc and related thermal hazards.
 Applications: Utility workers, Welders, First responders, Railroad workers, Oil & Gas workers

ASTM F1891 Standard
 Electrical Arc specific to FR rainwear

ASTM F2733 Standard
 Protection against Flame Hazards (i.e. flash fire) specific to FR rainwear

OCCUNOMIX.COM | 78

BEST SELLER

MODACRYLIC FR

Modacrylic, while being man-made, is inherently flame resistant. It doesn't melt or drip and will self-extinguish when the flame is removed. In addition, it is comfortable, resistant to abrasion and pilling, and holds its shape versus other fabrics. Made of 100% ANSI 107 Modacrylic Aramid Blend. All of our vests are ANSI Class 2 compliant and tested to ASTM F1506 - Arc Rated. Our vests use durable 2" 3M™ Scotchlite™ Reflective Material - Silver Industrial Wash Flame Resistant Fabric. Additional features include FR Thread and Flame Resistant binding.

FLAME RESISTANT

FR TREATED COTTON VESTS

The first arc rated and ANSI compliant cotton vests on the market. Made up of Flame Resistant Cotton/Polyester Blend. OccuNomix FR Cotton Vests have a higher arc rating than Modacrylic and are also more economical.

LOGO

MAKE AN IMPRESSION

Why decoration? Decorated gear helps your team be even safer on the job site. Quickly identify personnel in crucial moments as well as maintain job site security by adding a logo to your gear.

OccuNomix is able to decorate a wide selection of the products we offer. Look for the Logo Ready icon in the product description to see if it can be imprinted. Questions about a particular product? Just call our friendly Logo Customer Experience team and we'll help you out.

Once you select a product, all we need is the logo. Services offered include artwork layout and preparation through individual bagging after decoration. We are a one stop shop of services customizable to make your life easier. Our team will guide you through each step of the process and get your team what they need to be safe on the job site.

HELPFUL INFORMATION:

Turn-around time is 7-10 business days upon receipt of approved proof and PO.

SIZE CHARTS

MEASURE YOUR BODY FOR A PROPER FIT

Chest Size: Taken at the fullest point of your chest. Measure just under your arms and across shoulder blades holding the tape firm and level.

Waist: Measure around your natural waistline, keeping the tape snug, but comfortably loose.

Inseam: Measure from the base of your crotch to the top of your shoe. For a more accurate measurement have someone take this measurement. You can also measure a similar pant that fits you well. Lay the pant flat with the front and back creased smooth. Measure along the inseam from the crotch to the bottom of the leg hem.
