NORA GALAN

BIOLOGY

BIOGRAPHY

My name is Nora Galan and I have the honor of teaching Biology at RSA.

I was born and raised in the RGV and attended high school at Medical Professions. I graduated with a BS in Biology from UTRGV and a Master's in Education from UT-Arlington. I received my National Board Teacher Certification December 2023.

I have 2 wonderful kids at home which do take up most of my time. However, some of my hobbies include going on road trips, binge watching shows, and some exercise. I have visited Washington D.C., Belize, Yucatan, and Cozumel. I do hope to visit other countries soon!

While teaching is my vocation, watching movies is my beloved pastime. I believe that films are a powerful medium to convey life lessons, cultural diversity, and empathy, which I skillfully incorporate into my lessons to make them more relatable and engaging for the students.

My goal is to create an enriching and enjoyable learning experience inspires my students to become lifelong learners, critical thinkers, and compassionate individuals, making a positive impact on society for years to come.
