MATH

BIOGRAPHY

I am thrilled to be your 6th grade math teacher this year! I am passionate about education because I know that it's the key to all of your dreams. Whether or not math is your subject, I will help you every step of the way. My goal is that you leave this class with confidence in your learning of math! It's great to have you! I have taught high school math for nine years and I was an instructional coach for two years. I earned a Bachelor of Science in Applied Mathematics and a Masters in Curriculum and Instruction in Mathematics Education. I enjoy learning about education and how to be more effective as an educator. My hobbies are graphic design, arts and crafting, and enjoying my time with my family. I have four very spoiled dogs: Poe, Annabel, Buddy, and Jovie. My favorite sports team is the Dallas Cowboys! This is our year! I have been pescatarian since 2017, and I love chocolate and coffee. I'm glad you're here and happy to be your teacher!
