## GUSTAVO A. RAMIREZ

### ALGEBRA

#### BIOGRAPHY

I am Mr. Ramirez, a Math teacher here at RSA, I want to give you a warm welcome to the exciting course of Algebra 1. I will be here to assist you throughout the entire course. I look forward to assisting students and ensuring they have a pleasant journey this year.

A little bit about me; I have been a proud founding member of our Rising Scholars Academy since 2015 and assisted in creating our mission, vision, and core values. I have studied Engineering, Mathematics, and Sociology and have a background in the Mental Health field. I Became an educator back in 2012. I am a loving father of 3 and my passion is in the automotive industry.

In terms of my class, Algebra 1 – (everyday section) has been designed to address the student's needs in math and to fill any gap from previous courses. By providing extra time in this class, we can ensure the students grasp their concepts using a variety of teaching strategies that create a community in the classroom and alleviate the stress that students tend to build on their math classes.
