MATH

BIOGRAPHY

Greetings Scholars! My name is Noel Khine and I teach Math 6 and Math 8 this year at Rising Scholars Academy.

I graduated from The University of Texas at Austin (Hook 'Em Horns!) with a degree in Liberal Arts, Psychology, and Asian Studies. After college, I got a job at a call center for a Fortune 500 company. Working my way up the ranks, I eventually became a supervisor and employee trainer. I transitioned into the field of education by starting as a substitute teacher here at RSA. After that, I then became an instructional aide where I worked with RSA teachers across every department and subject before becoming a teacher in the Math department.

Outside of school, I enjoy traveling. I've lived in and traveled all over the world to places like Dubai, Singapore, London and Milan and I've been to most of the major American cities and states. I also enjoy cooking and few things make me happier than getting a new recipe right the first time. Another big passion of mine is going to concerts. I've seen over 200 different bands and artists live and I enjoy music from a variety of genres.

Rising Scholars Academy is a special place full of amazing teachers and incredible students. I look forward to working with each and every one of you to keep this place that way.
