SPECIAL EDUCATION

BIOGRAPHY

I was born and raised in Harlingen, but spent the better part of my 20's living in Massachusetts before returning to the valley. It was there where I found my passion of teaching and working with students.

I have been at RSA since its inaugural year in 2015. I truly believe that RSA is like no other school I have taught at; its mission and culture can be seen in and out of the classroom. I hold RSA in such high esteem that I was proud to have my two youngest children attended RSA during their middle school year. They have since graduated and are doing wonderful things. You may notice and wonder about the other Wilson on campus. My husband and I are lucky enough to be teaching together here at RSA. The kids think it's wild and enjoy connection that they make between us.

For me, each new school year has come with a new challenge. I have earned my Masters in Education, obtained a diagnostician certification, and again this year, I am fortunate enough to continue being part of the coaching team. I am the assistant coach of the secondary girls' volleyball, basketball, and soccer teams. I cannot express how much I have enjoyed helping our students become better versions of themselves- not only in the classroom but on the court as well.

We have 5 children; our two youngest are in college here in Texas, and our three oldest are out living their lives in Missouri, Idaho, and California. My hobbies include reading, crafting, DIY projects, and occasionally refurbishing/refinishing old furniture.
