SALT LAKE CITY
SCHOOL DISTRICT
Community Education

Lights! Camera! Action! Radgeekery allows kids to explore the creative world of film making while having the unique opportunity to use professional equipment. With the guidance of an award winning film maker Conrad Paur, students learn important skills for creating a film - lighting, sound, camera, perspective, and much more. Students also have the chance to enter their film in an actual film festival! Join us for a fun and inspiring time as we work as a team to create a story everyone will remember!
