SCIENCE

BIOGRAPHY

I am excited to be teaching for my 6th year at RSA and my 31st year overall! I am originally from Forest Lake, Minnesota and attended the University of Minnesota-Morris where I majored in both Biology and Spanish. I also worked on my masters in Genetics at the University of Minnesota. I have traveled throughout Mexico and parts of Spain.

I am a cancer survivor and live with my husband and daughter in Harlingen. My husband, Alberto, is also an educator and my daughter, Estela, is a Senior at Science Academy. As a family, we enjoy traveling and watching a variety of shows on Amazon Prime, Netflix, and HULU. We share our home with 3 cats; Neferkitti, Negrito, and Sushi. My hobbies include baking, cooking, crafting, reading, and sewing. I am a life-long fan of the Minnesota Vikings and try to watch their games when I can; especially when they play the Packers and the Cowboys!

I am coaching UIL Science and hope have several students qualify for state competition. I love talking about science and scientists. I truly believe that the world's problems could be solved if we were to employ a little kindness, a little common sense, and the scientific method.
