

# El Camino Real Charter High School

HOME OF ACADEMIC, ARTISTIC AND ATHLETIC EXCELLENCE.

## STEAM Program Your Future Starts Here

The Science, Technology, Engineering, Art and Math (STEAM) Program prepares students for success in the real world through an interdisciplinary, project-based approach to education. STEAM students learn specialized skills while expanding their ability to communicate effectively and think critically and creatively.

- Graduate with a STEAM Program recognition seal on your diploma
- Take courses at the level that's right for you (College Prep, Honors, Advanced Placement)
- Explore your other interests too — STEAM offers students the flexibility to stay involved in additional activities, such as athletics

### Choose Your Own Path

The STEAM program offers three pathways to allow students to explore the areas that interest them. And if you change your mind, switching pathways is easy.

- Technology and Engineering
- Medical Sciences
- Environmental Science

### Be Part of the Club

#### STEAM Club

Required for all STEAM Program students, STEAM Club takes key concepts beyond the classroom with team-building activities, community-based projects and field trips.

#### Robotics Club

Robotics Club is an optional opportunity for students interested in learning more about robotics. The club participates in — and has won — the VEX Robotics World Championship.
