

4th Grade Homework Policy

Homework is assigned to students with the intention for students to practice skills learned in class, and with the intention to prepare them for the next day's lesson. In addition to homework relating to the day's lesson or work, homework may also include doing research, working on long term projects, or finishing incomplete in-class assignments.

Failure to complete homework by the assigned deadline will result in the student being given additional time to complete his or her work, during recess, lunch, or after school.
