Lesson 1 Extra Practice

Functions

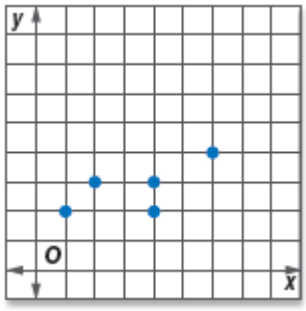

Determine whether each relation is a function. Explain.

1. $\{(4, -1), (2, -1), (0, 3), (5, -2)\}$

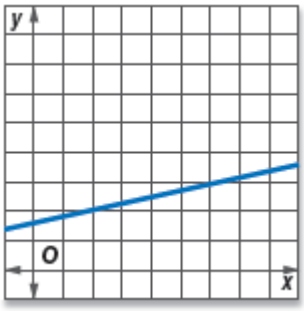

2.

x	6	8	6	7
y	4	3	9	1

3.

4.

If $f(x) = 3x - 1$, find each function value.

5. $f(-1)$ **6.** $f(0)$ **7.** $f(2)$ **8.** $f(3)$

If $g(x) = -6x$, find each function value.

9. $g(-12)$ **10.** $g(15)$ **11.** $g(-16)$ **12.** $g(22)$
