Notes

Online and fax order instructions
1. Go to mymechoshades.com.
If necessary, request an online-order-entry account. Contact us at onlineorders@mechosystems.com

2. Check the availability of the shadecloths.

If available:

Online: Click on the link for the MechoSystems Online Order Entry System.

Fax: Your order must be submitted on our order form and marked as QuickShipShades, with line-item pricing, according to the MechoSystems Fabricated Shade Dealer Price List, less your standard discount. Otherwise, the terms of the QuickShipShades program will not apply.

If not available: Contact customer service.

3. The order must then be accepted by MechoSystems, under the terms of the program, including shadecloths and hardware availability and credit approval.

4. **Online:** Submit online order.
Fax: Fax the form to your assigned customer service location.

5. Upon acceptance, your order will ship within one week (Online) or two weeks (Fax), not including legal holidays, or we pay for the ground freight.

UrbanShade® Manual Shade System

The durable, manual UrbanShade is the next generation of shades. Units are wall or ceiling mountable. The increased roll-up diameter (RUD) of 2-15/32 in. accommodates a wider range of shade sizes. The fabric deduct has been reduced by 1/8 in. to decrease light gaps. The offsetting bead chain on the drive-end bracket enables blackout channels for room-darkening applications. And a new steel bracket insert is part of the quality upgrade.

The system is backed by a Ten-Year Limited Warranty.

For DoubleShades Upgrade, see pages115–125.

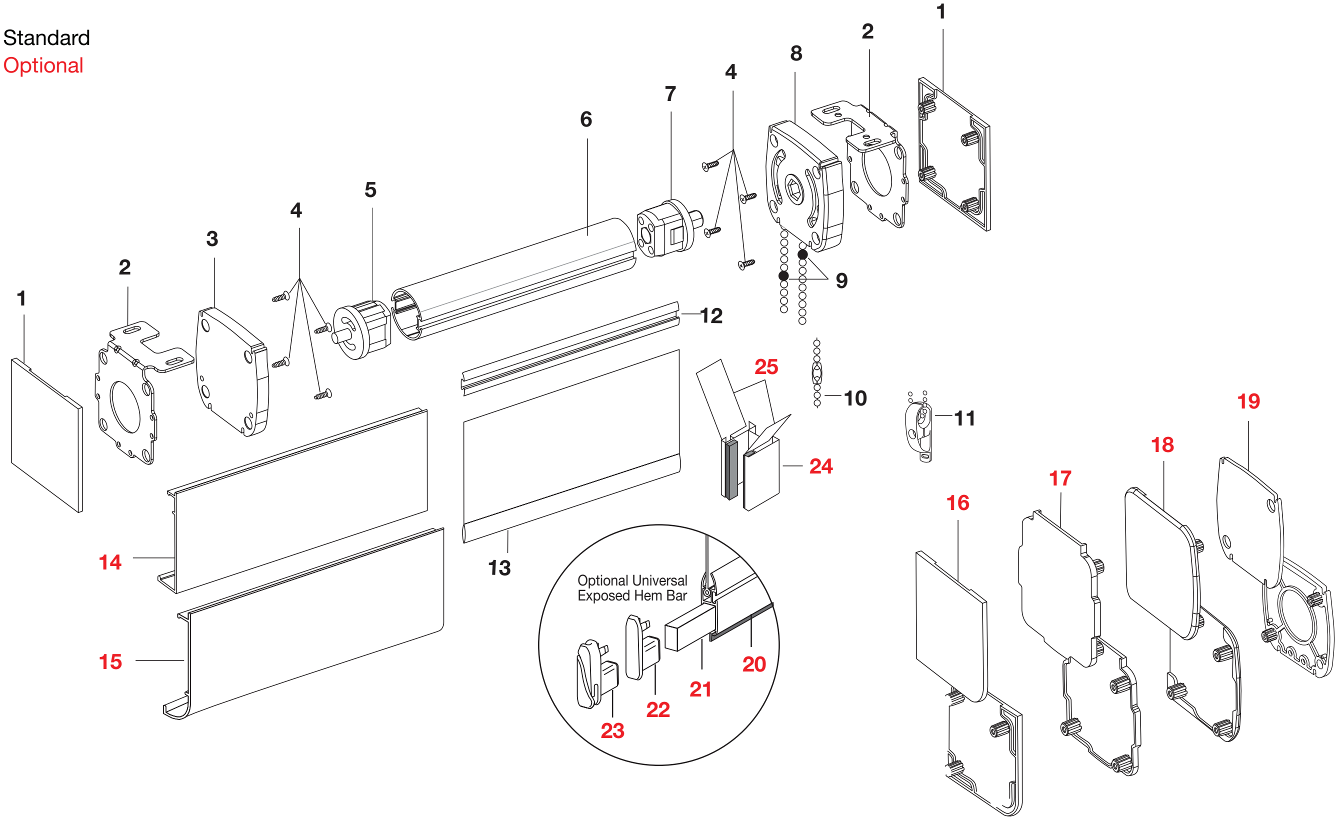
For single band manual shades.

Shade Prices include: One pair of universal UrbanShade brackets, chain, shadecloth with fabric-covered hem bar, SnapLoc® spline and a 1-1/4 in. or 1-3/8 in. SnapLoc tube. Railroaded shadecloths are fabric turned width for height.

Optional accessories include: SnapLoc fascia and chain retainer. Battery Powered Motor option and accessories.

UrbanShade® System

# Standard
# Optional



Note: Please see page A7 for important considerations when ordering shades.
* Not available on UrbanShade Cassette option.

Parts

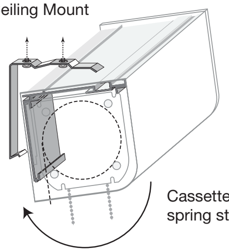
Optional painted SnapLoc® fascia or shadecloth-wrapped SnapLoc® fascia** Available on either battery-powered MotorPak or prefabricated cassette system.

** Shadecloth-wrapped end caps are not available.

Note: Finished I/D width of cassette will be manufactured 1/8 in. narrower than the opening width provided. Finished O/D widths are exact.

Cassette Ceiling and Wall Mount Options

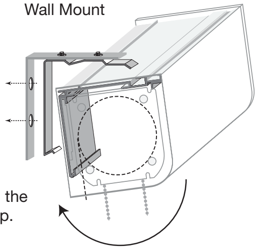
2
Ceiling Mount



Cassette rotates onto the spring steel mount clip.

Standard ceiling mount spring clip
P/N SCFL 3132 ST __

3
Wall Mount



Optional wall angle brackets with spring steel mounting clips
P/N SCFL 3132 ST __

Parts

1. Prefabricated Cassette Shade: Easy to install cassette shade comes with either painted SnapLoc Radius fascia or optional shadecloth-wrapped fascia (shown)*. Shadecloth-wrapped fascia will match shadecloth color/pattern election.

(*Note: shadecloth-wrapped end caps are not available.)

2. White, black, or grey ceiling spring steel mount clips are included with cassette shade.

3. Optional angle wall brackets with spring steel mounting clips are available.

4. Optional shadecloth-wrapped fascia and painted fascia shown with capture end caps. (Note: shadecloth-wrapped end caps are not available.)

5. SnapLoc shade band allows for easy removal and re-attachment of shade bands for occasional cleaning.

6. New single-piece chain retainer.

Notes

- Maximum shade height for the UrbanShade System with cassette option will be less than that indicated on the fabricated shade price pages based on shadecloth selection. Please check with Customer Service or see Online Order Entry System.
- Square fascia and continuous end caps are not available for the cassette option.

Reloadable 12-Volt Lithium

---

* We recommend that the Supplemental 12-volt Lithium Wand be ordered at time of purchase.

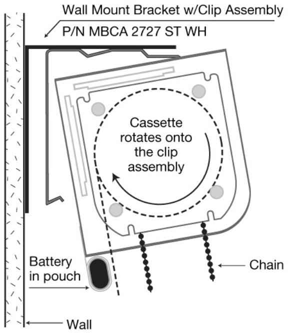
[1] Required to wall mount chain or battery powered cassette.

[2] Allows for wall mount shade to have 1 in. clearance from wall.

[3] Required to wall mount battery powered UrbanShade.

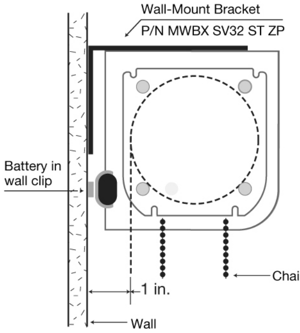
Both Battery- and Chain-Operated References

Cassette Wall Angle w/Clip Assembly [1]



Wall Mount Bracket w/Clip Assembly
P/N MBCA 2727 ST WH
Cassette rotates onto the clip assembly
Battery in pouch
Chain
Wall

Extension Wall-Mount Bracket [2, 3]



Notes

- Eliminate wiring and wall damage.
- Home automation connectivity.
- Long-lasting lithium battery wand.*
- For wall switch faced plates please see page 171.
- The RTS Receiver Module is a necessity for interfacing of the RTS Wall Switch and Transmitters with the Battery Powered Motor.
- We suggest that you order the RTS Receiver Module at the same time as the Wall Switches or Transmitters.
- Somfy® ST30 RS-485 motor requires Power Distribution Panels.

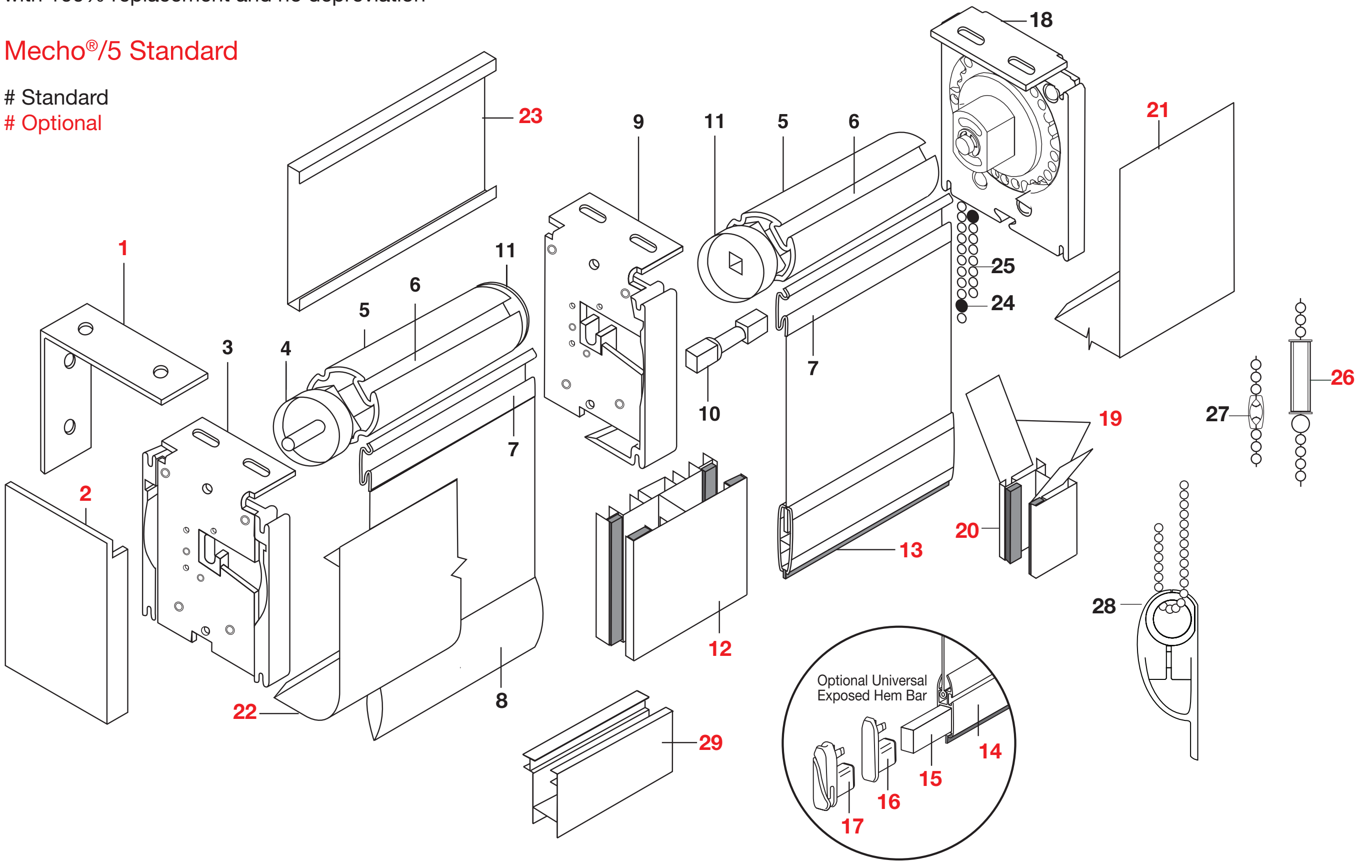
MechoShade® Manual Shade System

MechoShade is the original manual chain-driven heavy-duty hardware system. MechoShade is the only hardware system that provides a Lifetime Limited Warranty* on the new Mecho®/5 system, or a 10-Year Limited Warranty* on the Mecho SlimLine® system, with 100% replacement and no depreviation over the life of the warranty. The Mecho®/5 system is available in four bracket sizes: SlimLine®, Standard (shown below), Pocket Extended and Extended.

For DoubleShades Upgrade, see pages 115-125.

Mecho®/5 Standard

# Standard
# Optional



Note: Please see page A7 for important considerations when ordering shades.

Shade Prices include: One pair of either Mecho®/5 Wide, Mecho®/5 Pocket, Mecho®/5 Extended brackets, or Mecho SlimLine® brackets, with chain, shadecloth with shadecloth-covered hem bar, SnapLoc® spline and appropriate size SnapLoc® tube and a child-safe chain retainer. Railroaded shades have fabric turned width for height. For shades over 10 pounds, the use of the optional LiftAssist® Mechanism® (LAM) is included. Mecho®/5 Wide brackets will be shipped unless SlimLine®, Extended, or Pocket brackets are specifically ordered or otherwise noted.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

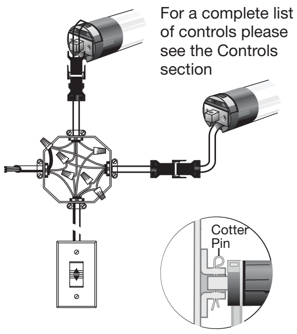
ElectroShade® Motorized Shade System

ElectroShade was the first fully commercial motorized shade system with the motor in the roller tube. And now, with the addition of our embedded technology, ElectroShades are up to 85% quieter than comparable, untreated systems. WhisperShade—the newest generation of the ElectroShade window-covering systems—provides whisper-quiet operation.

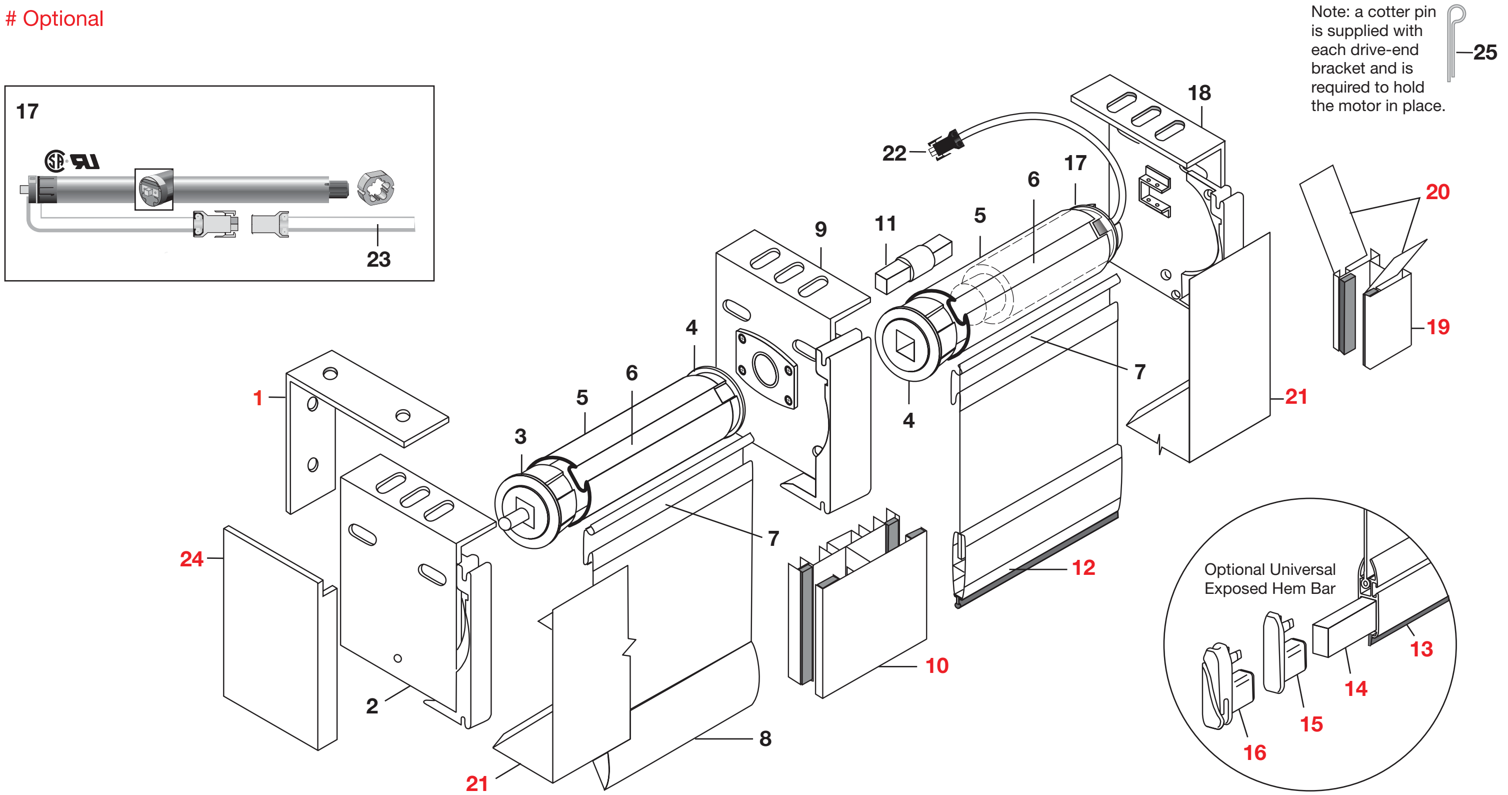
ElectroShades are ideal for conference rooms and other VIP spaces, public spaces, high-bay windows, and atriums, where accessibility is a problem. ElectroShades are available in 40mm and 50mm motor systems in various bracket sizes.

Note: Optional Regular-Roll fascia available for Electro®/2, Whisper/2 and Electro®/3. Optional Reverse-Roll Fascia available for Electro®/3 brackets. No Fascia available for Electro®/1, Whisper/2 or Electro®/3 Pocket brackets.



For a complete list of controls please see the Controls section

# Standard
# Optional



Note: a cotter pin is supplied with each drive-end bracket and is required to hold the motor in place.

For single-band or multi-band manual shades. (Shown: Multi-band Electro®/2.)

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars. Note: “Somfy” and “RTS” are trademarks of Somfy Systems, Inc.

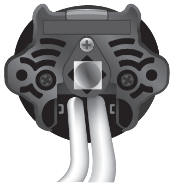
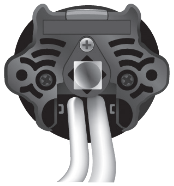
ElectroShade® Motorized Shade System

Motor Upgrade and Features (optional)



WhisperShade® IQ2®

- Two-way communication
- Built-in network and dry-contact control
- Cost-effective, daisy-chained wiring
- Simplified 3rd-party integration
- Repeatable, pinpoint shade positioning
- Quiet and powerful
- 6Nm+
- 50mm Diameter



WhisperShade® ML

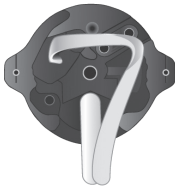
- Cost-effective
- Uses industry-standard wiring
- Operates with line-voltage SPDT or DPDT Switches
- Functions with IQ/MLC2 and other industry-standard shade controllers
- Quiet and powerful
- 6Nm+
- 50mm Diameter

ElectroShade® RTS

- Whisper quiet
- Radio controlled
- Encoder with accurate and repeatable alignment
- Electronic limits set via remote radio transmitter
- 3rd-party control and integration capability via interface (IR, RS-232, and dry contact)
- 6Nm+
- 50mm Diameter

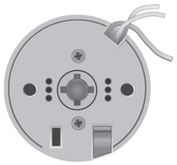
Somfy® RTS

- Whisper quiet
- Radio controlled
- Encoder with accurate and repeatable alignment
- Electronic limits set via remote radio transmitter
- 3rd-party control and integration capability via interface (IR, RS-232, and dry contact)
- 6Nm+
- 50mm Diameter



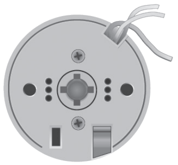
Somfy® ILT

- Whisper quiet
- On-board control
- Encoder with accurate and repeatable alignment
- Electronic limits.
- Direct control from a low-voltage switch
- Built in-dry contact controller
- 3rd-party control and integration
- 4Nm+
- 50mm Diameter



Somfy® ST30

- Whisper quiet
- Low voltage motor
- Available as radio controlled (RTS), dry contact (DCT), or networkable (ILT)
- 6Nm+
- 30mm Diameter



Somfy® ST40

- Whisper quiet
- Low voltage motor
- Available as radio controlled (RTS), dry contact (DCT), or networkable (ILT)
- 6Nm+
- 40mm Diameter

Somfy® ST50

- Whisper quiet
- Control capability via hardwired line voltage switching, IQ/MLC, or SMC
- 6Nm+
- 50mm Diameter

The warranty will be void if:

- The product has been improperly installed or not installed according to MechoSystems, guidelines or specifications.
- MechoSystems written instructions for installation and wiring of electrical connections were not followed.
- The product has been used to perform functions or operated in a manner contrary to its design or otherwise is used in a manner contrary to or in excess of MechoSystems specifications, drawings, or instruction.
- The product is used with electrical accessories or parts, including switches, relays, or other accessory components, that have not been previously approved in writing by MechoSystems.
- Any electrical accessories and other components have been used in disregard to the basic wiring diagram for which they were designed.
- Failure to comply with all MechoSystems written instructions and specifications.
- Repairs made necessary from normal wear of the product or by use of the parts or accessories which are either incompatible with the product or otherwise adversely affect its operation, performance, or durability.
- The product used for non interior applications or otherwise exposed to outdoor environmental conditions.

Notes

DCT= Dry Contact

* Includes RJ45–RJ12 Dongle (Stocking number: ESMC DONG 45 12)

Please note that the motor ranges shown apply for ElectroShades utilizing full fabric widths per band. Additionally, motor capacity will be sufficient to operate shades of greater height, but not necessarily of the full fabric width as mentioned above. Drive and idle end fabric deducts of shades with motors cited on this page may be different than that of shades with standard motors. Please contact tech support for specific answers.

Notes

◈ Electro/3 or DoubleShades® #20 and 21 are NOT available.

◘ Electro®/ 3 Extended.

△ Standard motor and Somfy® ST30 motor available for Electro/3.

◐ These Electro/3 Extended Bracket shade sizes cannot accept SnapLoc® fascia.

⊡ Shades with a width-to-height ratio greater than 1:4 will include stabilizing battens.

⊗ Somfy® ST30 motor not available for Electro/3.

◩ These shades require either Electro/1 Extended or Electro/2 Extended Brackets and cannot use standard Electro/2 Fascia. Be sure to use the Electro/2 Extended Fascia prices.

Electro #20 With or without fascia																156	109	132			
Electro® #21 With fascia																156	200	200			
Without fascia																156	200	200			

Notes:

**Evaluate both the solar and blackout shade band sizes independently, using the appropriate number of battens for each type.
The maximum height will be limited to the lesser height of either the blackout or solar shade band maximum heights.

The number and location of battens and seams may be different for blackout vs. solar shade bands due to differences in fabric width selected.
Actual maximum heights may be greater, but not recommended, and may exceed the maximum number of motor revolutions or other restrictions.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

Sizes are based on the finished shade band size (i.e. tip-to-tip). See chart on the right for allowance for the wrap around the roller tube. Also, please indicate when ordering whether the replacement band is regular-or mini-spline, and whether single-banded or multi-banded. If multibanded, be sure to indicate which shade bands are on the same operator.

Please check with the factory to confirm your required shadecloth is still stocked in the specific weave, color, or openness factor.
Discontinued shadecloth may be available on special order, subject to minimum quantities.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

Sizes are based on the finished shade band size (i.e. tip-to-tip). See chart on the right for allowance for the wrap around the roller tube. Also, please indicate when ordering whether the replacement band is regular-or mini-spline, and whether single-banded or multi-banded. If multibanded, be sure to indicate which shade bands are on the same operator.

Please check with the factory to confirm your required shadecloth is still stocked in the specific weave, color, or openness factor.
Discontinued shadecloth may be available on special order, subject to minimum quantities.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

Notes

WhisperTrac® 1000 System

WhisperTrac 1000 is a cost-effective, quiet drapery-track system. MechoSystem's built-in IQ2® technology enables instant compatibility with a full range of MechoSystems controls. WhisperTrac 1000 seamlessly integrates with 3rd-party automation systems, linking window treatment with a host of A/V, lighting, security, energy conservation, and comfort controls at a lower cost.

WhisperTrac 1000 is ideally suited for residential, home theater, conference room, hospitality, and light commercial applications.

Warranty: 5-year limited warranty on all items subject to the maximum number of operations and MechoSystems. General terms and conditions of sales as stated. MechoSystems will not warranty systems that are installed without our mounting hardware. Warranty is supported only when using WhisperTrac original hardware.

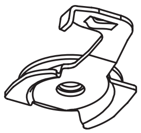
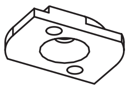
$79.00 each pack.

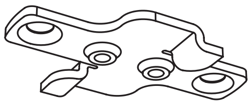
Ceiling mounts



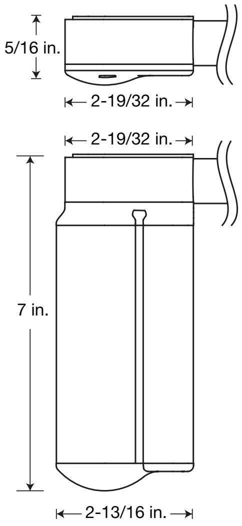
WHTR 6050 49 ZP
Ceiling fixing clamp
(standard), includes washer.
Total drapery weight less
than 55 lbs.
$2.00 each.



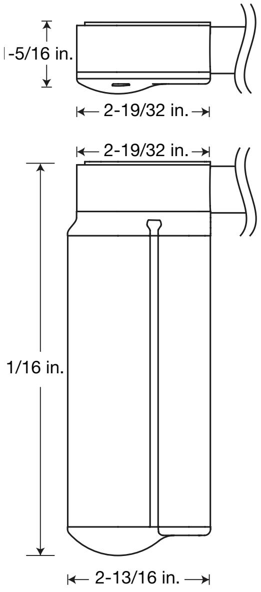
WHTR 6055 20 35
Mounting plate for
recess track.
Color: white.
$40.00 each.



WHTR 6055 10 ZP
Total drapery weight
less than 220 lbs.
Recommended for
extra heavy or curved
applications.
Color: white.
$16.00 each.



6302 20-W US NC
Replacement motor
3032MD
(side dimension)
$854.00 each.



6200 20-W US NC
Replacement motor
3020HD
$1,230.00 each.

Warranty: 5-year limited warranty on all items subject to the maximum number of operations and MechoSystems. General terms and conditions of sales as stated. MechoSystems will not warranty systems that are installed without our mounting hardware. Warranty is supported only when using WhisperTrac original hardware.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

Notes

WhisperTrac® System
European-quality engineering is integrated into this full line of quiet, motorized drapery solutions. The WhisperTrac 3000 series includes two models of motors varying in price, performance and control. All motors feature universal mounting capability, allowing motor placement (right or left) to be determined in the field. WhisperTrac can be operated in tandem for large or heavy drapery requirements.

All WhisperTrac motors can be operated via decorator style compatible switches, 2-button switches, 4-button switches or a 15-channel infrared transmitter.

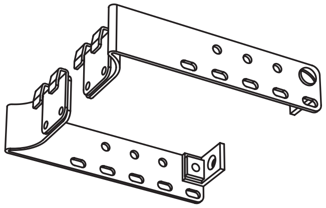
WhisperTrac Systems also have the ability to daisy-chain the motors into a control network or be integrated with third-party lighting or A/V control systems via CanBus, RS485 or RS232 networking technology or dry contact closure.

WhisperTrac motors also integrate with MechoRF® ZigBee for Control4, Somfy® RTS wireless and other third-party control technologies.

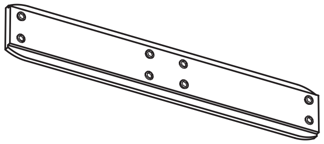
WhisperTrac 3020HD
The 3020HD is a quiet and powerful drapery track system that has a low electricity usage rating and is delivered complete and ready to install. The unit is easily programmable and has five intermediate stop positions that can be accessed through the infrared transmitter.

WhisperTrac® 3000 System Components

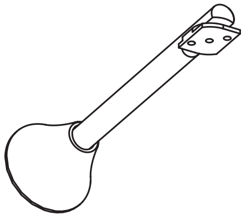
Accessory Pieces



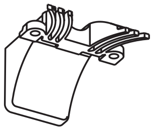
WHTR 6059 RS WH
Wall return set (L&R) 6 in.
For wall and ceiling mounting.
Can be trimmed to a minimum of 3.5 in.
Color: white.
$160.00 a pair.



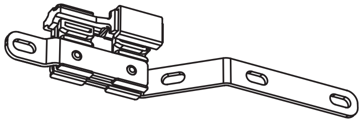
WHTR 6052 00 WH
Internal connecting bridge (splice)
$75.00 each.



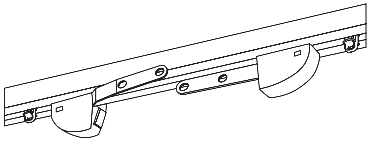
WHTR 6057 EX HW
Extension wall bracket.
Projects from 2.75 in. to 6 in.
$62.00 each.



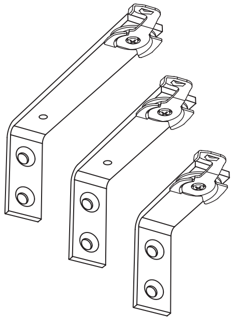
WHTR 6051 WS WH
Wall support bracket, 1.575 in.
$2.00 each.



WHTR 6274 20 LG
Overlap carrier.
$45.00 each.



WHTR 6280 PR S
Manual release master.
$213.00 each.

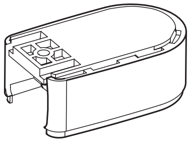


WHTR 2015 10 WH*
Wall bracket, 4 in.
$7.00 each.

WHTR 2015 07 WH*
Wall bracket, 3 in.
$6.00 each.

WHTR 2015 05 WH*
Wall bracket, 2 in.
$5.00 each.

*Note: Price does not include the ceiling clamps (shown), as they are included in the standard package.



WHTR 1000 BD PS
Drive belt pulley.
$25.00 each.

Notes

WhisperTrac 3020HD

- This system can also be assembled as a tandem system for increased weight load capacity (see chart on page 209.) The standard drapery travel speed is 5.9 in./sec. It is fully programmable and customizable by factory.
- Maximum weight capacity for single motor: 132 lbs. based on length and curves.
- Maximum weight capacity for tandem motors: 220 lbs. based on length and curves.

WhisperTrac 3032MD

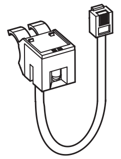
- Conversationally quiet, these low-voltage (24V) electrically-powered drapery track systems are suitable for light and medium weight draperies.
- It requires no pre-wiring and was developed for contemporary living environments. 3032MD can be used in the hotel, education and leisure industries and by people with limited mobility.
- These motors can be daisy-chained into a master control circuit and integrated with lighting and A/V control systems.
- Maximum weight capacity for 3032MD: 88 lbs. subject to length and curves.

Warranty: 5-year limited warranty on all items subject to the maximum number of operations and MechoSystems. General terms and conditions of sales as stated. MechoSystems will not warranty systems that are installed without our mounting hardware. Warranty is supported only when using WhisperTrac original hardware.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

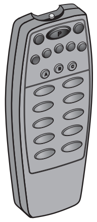
WhisperTrac® 3000 System Components

Accessory Pieces



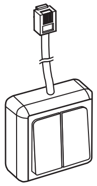
WHTR 6040 21 01*
IR receiver (at least one receiver is required in order to install the WhisperTrac® for MechoRF ZigBee® application.)
$55.00 a pair.

*Note: Also used as a limit setting/programming tool.

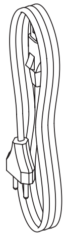


WHTR 6040 11 15*
IR transmitter (at least one transmitter is required in order to install the WhisperTrac® for MechoRF ZigBee® application.)
$135.00 each.

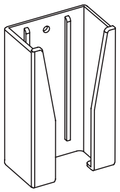
*Note: Installer must have one receiver and one transmitter in order to set limits on the system.



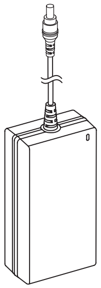
WHTR 1001 TECA
Limit setting switch for nonMechoRF ZigBee applications.
$81.00 each.



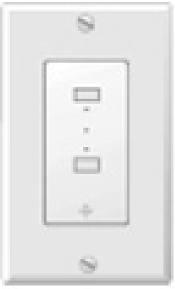
WHTR 1200 PO LE
Power lead, 12 ft.
$22.00 each.



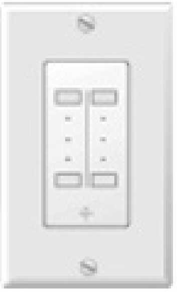
WHTR 1151 WA HO
Transformer wall holster.
$83.00 each.



WHTR 1100 TRY 24
Single 24V transformer.
$426.00 each.



IMLC DS02 WH WH
IQ 2-button single-station switch.
$113 each for a pack of 6.
$140 each broken pkg.



IMLC DS22 WH WH
IQ 2+2 button dual-station switch.
$143 each for a pack of 6.
$180 each broken pkg.

Notes

WhisperTrac 3020HD

- This system can also be assembled as a tandem system for increased weight load capacity (see chart on page 209.) The standard drapery travel speed is 5.9 in./sec. It is fully programmable and customizable by factory.
- Maximum weight capacity for single motor: 132 lbs. based on length and curves.
- Maximum weight capacity for tandem motors: 220 lbs. based on length and curves.

WhisperTrac 3032MD

- Conversationally quiet, these low-voltage (24V) electrically-powered drapery track systems are suitable for light and medium weight draperies.
- It requires no pre-wiring and was developed for contemporary living environments. 3032MD can be used in the hotel, education and leisure industries and by people with limited mobility.

2 curves(Tandem)					110	132	154	176	176	176	176	176	132	132	132	132	132	132
1 large curve*	22	44	66	88	99	99	99	99	99	99	99	99						
1 large curve (Tandem)					110	132	154	176	176	176	176	176	132	132	132	132	132	132

Medium Duty 3032 MD System with Standard Glider WHTR 4010 10 WH

lbs. — Width (ft.)

	3	7	10	13	16	19.6	23	26	30	32.8
Straight	22	44	66	88	88	88	88	88	88	88
1 curve	22	44	66	66	66	66	66	66	66	66
2 curves	22	44	44	44	44	44	44	44	44	44
Large curve	22	44	44	44	44	44	44	44	44	44

Tandem = Dual motor unit.
Curve= Tight 8 in. radius bend between 10–90 degrees.
Large curve= Continuous radius bend.

3020HD and 3032MD
Example to determine appropriate glider:

Drapery: 75 lbs., track length: 10ft.
75 lbs. ÷ [10 ft. x 3(gliders per ft.) = 30 gliders.
75 lbs. ÷ 30 gliders = 2.5 lbs. per carrier.

Because the weight load per glider is greater than the maximum weight allowed on the standard glider (2.2 lbs.), please upgrade to the stronger WHTR 4030 WH PL roller carrier.

If total drapery weight is above 55 lbs., use the heavy duty ceiling plate WHTR 6055 10 ZP.

3020HD, 3032MD, and WT 1000
The drapery should not be in contact with the underside of the drapery track.

Notes

- 3020HD and 3032MD tables indicate the maximum total drapery weight when using standard glider WHTR 0410 10 WH. This allows three gliders per foot, each with a maximum carrying weight of 2.2 lbs per glider.
- The maximum carrying weight for the upgraded WHTR 4030 WH PL roller carrier: 3.3 lbs. per carrier (table not shown).
- Tandem motor configuation is not available in the 3032MD system or 1000 model (for tandem configuation use 3020HD System).
- Additional shipping and crating charges may apply to tracks that are curved in the center.
- Weight loads stated are for draperies hung completely below the track.
- If draperies are mounted to cover the track, we cannot warranty the system and/or performance characteristics.
- All systems can be operated via RF, RTS®, IR, ZigBee® Dry Contact, wall switches, and/or third-party control systems.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

Notes

- Ripplefold and Accordia-fold are registered trademarks of Kirsch.

Series 1000 Options:

- Optional 6 channel remote control (RF): $89
- All tracks above 18 ft. require a splice (included in price.)
- Any non-standard splice will be charged at $10 each.
- Ripplefold or Accordia-fold above 18 ft. must be split-draw.
- Roller carriers for pinch pleat are standard on all WhisperTrac 1000 series.

Series 3000 Options:

- For standard single 45° or 90° curve, add $156.
- For two standard 45° or 90° curve, add $312.
- Ripplefold or Accordion-fold above 21 ft. must be split-draw.
- For non-standard large, multiple or complex curves, call MechoSystems Customer Service.

* Price includes tandem motor (3020HD only). Please contact the MechoSystems Estimating Department for a custom quotation and template or required sketch.

Additional crating charges may apply to tracks that are curved in the center.

Remote transmitter (IR): $134.

IR Receiver: $55.

Additional parts and options available (see page 168–177.)

WhisperTrac® Series 1000 and 3000

Notes

The fabricated WhisperTrac 1000 System includes:

- White epoxy-coated track with standard pinch-pleat roller carriers (3 per ft.)
- Motor
- Transformer
- Power cable
- Transformer wall holster
- Ceiling-mount swivel brackets (every 2 ft. on center spacing with anchor and screw)
- Spliced track if greater than 18 ft.
- Operating instructions

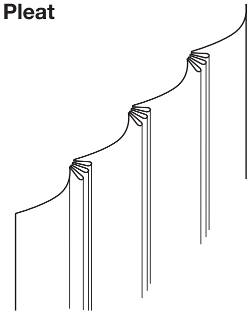
Note: The WhisperTrac 1000 requires no setting of any limits, therefore no additional setting tools are required.

The fabricated WhisperTrac 3000 System includes:

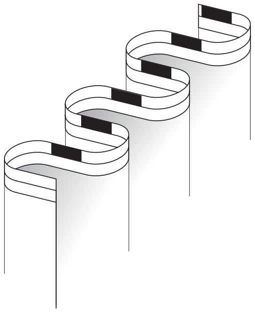
- White epoxy-coated track with standard pinch- pleat gliders (3 per ft.)
- Motor
- Transformer
- Power cable
- Transformer wall holster
- Ceiling-mount swivel brackets (every 2 ft. on center spacing with anchor and screw)
- Motor-masking hooks
- Spliced track if greater than 23 ft.
- Operating instructions

Note: The IR remote and IR receiver are required for setting the stop when using MechoRF® ZigBee® interface. A two-button paddle switch can be used to set the stops for non-ZigBee installations. These must be ordered separately.

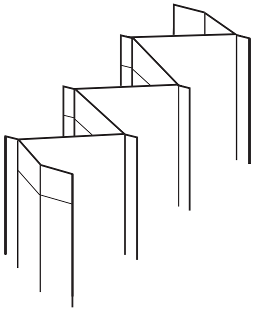
Pinch Pleat



Ripplefold®



Accordia-fold®



Notes:

Pinch Pleat

Standard tracks come equipped with carriers for pinch pleats.

Ripplefold®

Upgrade available in 60, 80, 100, and 120% fullnesses.

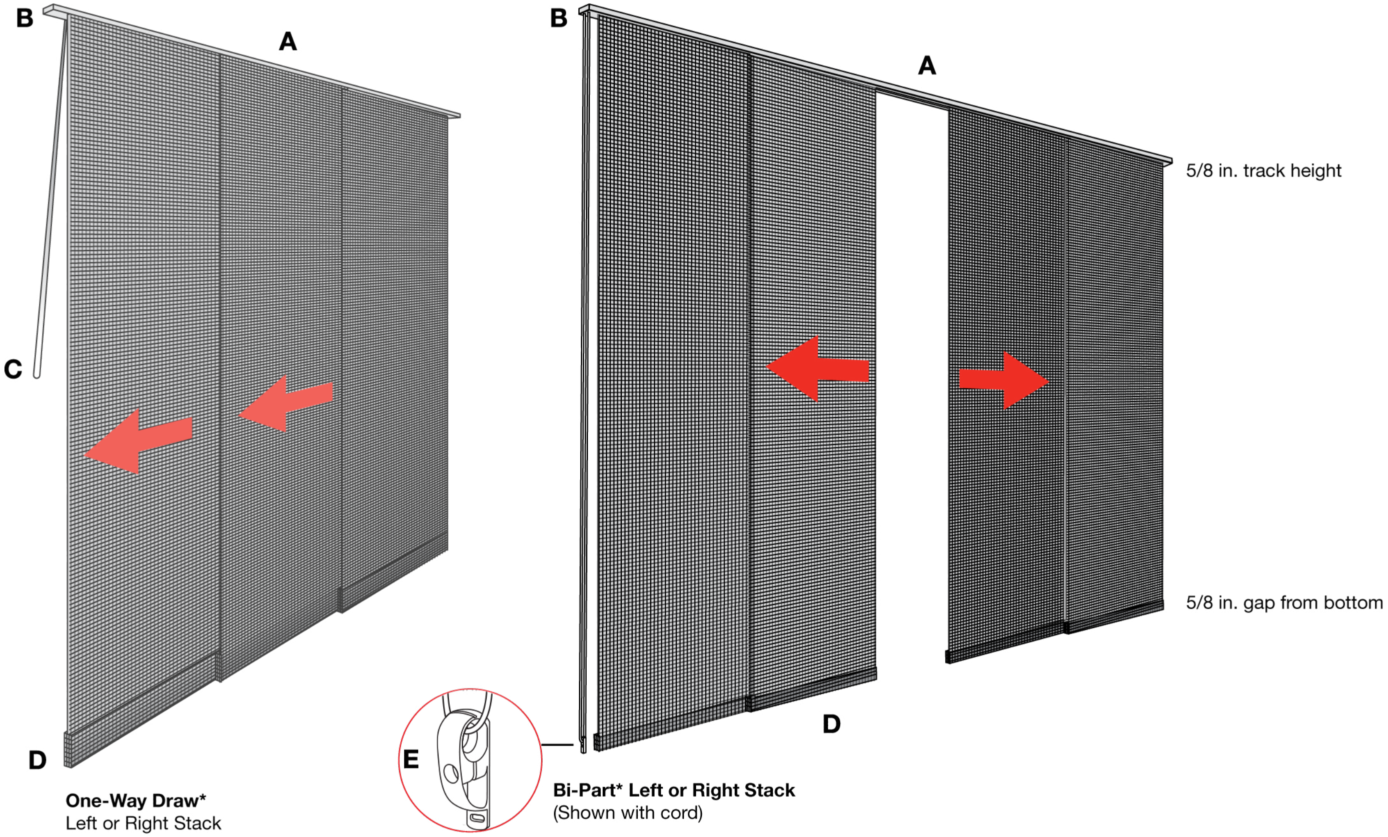
Accordia-fold®

Available with 7-1/2, 8-1/2, and 10 in. spacing between snaps. Use the 80% Ripplefold prices for all Accordia-fold pricing.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

MechoShade® PanelTrac® Shade and Room Divider

Optional Panel-Matching Valance Available



One-Way Draw*
Left or Right Stack
(Shown with wand)

Bi-Part* Left or Right Stack
(Shown with cord)

Track Dimensions

Description	Width (in.)	Height (in.)	Clear Wand Lengths (in.)	Cord Control Lengths
2-Channel	1-1/2	5/8	20 30 40 50 60	4 in. short of Panel length (for tension)
3-Channel	2-3/16	5/8		
4-Channel	2-15/16	5/8		
5-Channel	3-5/8	5/8		

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

Notes

Available as:

- One-Way Draw, Left or Right Controller Option
- Bi-Part

Standard Features Include:

A. Extruded Aluminum Headrail, Powder Coated Paint Finish

B. Injection Molded Plastic End Caps

C. Clear Wand or Cord Control Options (Wand is standard)

D. Heat Welded and Sealed Hem Bar

E. Shown: New single-piece chain retainer GEN3 PCLP KT CL

* Controllers available with standard wand or optional cord control.

** Shadecloth-wrapped end caps are not available.

Warranty

5-Year Limited Warranty on Hardware Components to be free of manufacturing defects in factory materials or workmanship for 5 years from date of shipping.

Shadecloths on the associated MechoShade brand systems are warranted to be free of manufacturing defects in factory materials or workmanship for the specified warranty period.

Notes

Pricing Instructions:
For shades between sizes, always round up to the next shade height and width.

- Custom panel widths available: Max. 60 in.
- Height and width measurements shown are based on opening size.
- Controllers available in standard Clear-Hand Wand or optional Cord.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

Components and Accessories

Room-Darkening Channels - Full Lengths Only (Includes Base and Brush)

Name/Description	Prod. Code	Stock Number	Color	Packaging Minimum Quantity	Unit Price	Broken Pkg. Price
Insert Guide - For Room Darkening Channel	401	USGR K624 AL _ _	BK/QB/WH/ML	10 Sets (4 pcs. per set)	$16	$21
Mecho® Single Channel 1-5/16 in. wide	401	MBOC 1321 AL _ _	BK/CA/QB/WH	7 Lengths @21 ft. ea.	89	124
Mecho/Electro ® Double Channel 2-5/8 in. wide	401	MBOC 2521 AL _ _	BK/CA/QB/WH	7 Lengths @21 ft. ea.	170	243
Electro Single Channel 2-1/2 in. wide	401	EBOC 2421 AL _ _	BK/CA/QB/WH	7 Lengths @21 ft. ea.	126	183
Electro Double Channel 5 in. wide	401	EBOC 5021 AL _ _	BK/CA/QB/WH	7 Lengths @21 ft. ea.	257	368

Color Reference: WH=White, CA=Clear Anodized, BK=Black, QB=Quaker Bronze, ML=Mill

MechoShade and UrbanShade Room Darkening Channel Recommendations (per shade band):

A. 1-5/16 in. Mecho Single Side Channel at Drive or Idle-end Brackets
With Battens: Up to a max. width of 10 ft. and/or a max. height of 8 ft.
Without Battens: Up to a max. width of 7 ft. and/or a max. height of 8 ft.
Where conditions exceed the above, use D—2-1/2 in. ElectroShade Single Channel.

B. 2-5/8 in. Mecho Double Channel used with Drive or Idle-end Brackets
Without Battens: Up to a max. width of 7 ft. and/or a max height of 8 ft.
Where conditions exceed the above, use E—5 in. ElectroShade Double Channel.

C. 2-5/8 in. Mecho Double Channel at Center Support Brackets
With Battens: Up to a max. width of 10 ft. and/or a max. height of 15 ft.
Without Battens: Up to a max. width of 7 ft. and/or a max height of 15 ft.
Where conditions exceed the above, use F—5 in. ElectroShade Double Channel.

ElectroShade® Room Darkening Channel Recommendations (per shade band):

D. 2-1/2 in. Electro Single Side channel at Drive or Idle-end Brackets*
With or without Battens: Up to a max. width of 15 ft. and/or max. height of 21 ft.

E. 5 in. Electro Double Channel used with Drive or Idle-end Brackets*
With or without Battens: Up to a max. width of 15 ft. and/or max. height of 21 ft.

F. 5 in. Electro Double Channel at Center Support Brackets*
With or without Battens: Up to a max. width of 15 ft. and/or max. height of 21 ft.

Special Field Conditions Only*

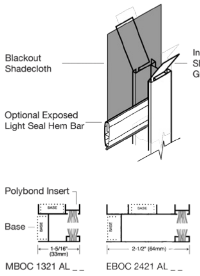
2-5/8 in. Mecho/Electro Double Channel at Center Support Brackets:
With Battens: Up to a max. width of 15 ft. and/or max. height of 21 ft.
Without Battens: Up to a max. width of 10 ft. and/or a max height of 15 ft.

* Where conditions exceed the above, call the factory.

Notes

Overall band limitations are either 15 ft. in width, or 21 ft. in height, or the maximum sizes in the Fabricated Shade Price List, whichever is less. When evaluating a multi-banded shade, the widest shade band shall dictate the channels for all the shades. Sufficient Room Return Air is required inside the line of shades to eliminate changes in air pressure when doors are opened or closed. Battens may be needed in order to retain shades in the side channel. Side channels have not been designed to resist the increased negative and/or positive air pressure (example: when doors are opened or closed). Channels are assumed installed vertical position (90 degrees to horizontal).

Side Channels with Guides for Single Channel Drive-end and Idle-end Applications



Double Channels with Guides Applications Between Shades

Electrical Notes

The ElectroShade® system has been designed, developed, and fabricated to be a totally integrated unit and is furnished by the manufacturer, MechoShade Systems, Inc., with a warranty, which provides that all components (motor, shadecloth, electrical controls, and override circuits) have been designed and tested as a compatible integrated system.

The basic control configuration is up and down of one or two ElectroShades. For control of three or more motors from a single switch or for mid-window shade alignment at the touch of a button, a low-voltage controller such as the IQ/MLC2® is required. All assemblies meet the listing requirements of UL 325 and CSA 22.2 no. 427.

All wiring must be precisely in accordance with MechoShade Systems, Inc. ElectroShade standards and wiring diagrams, or warranties will be voided.

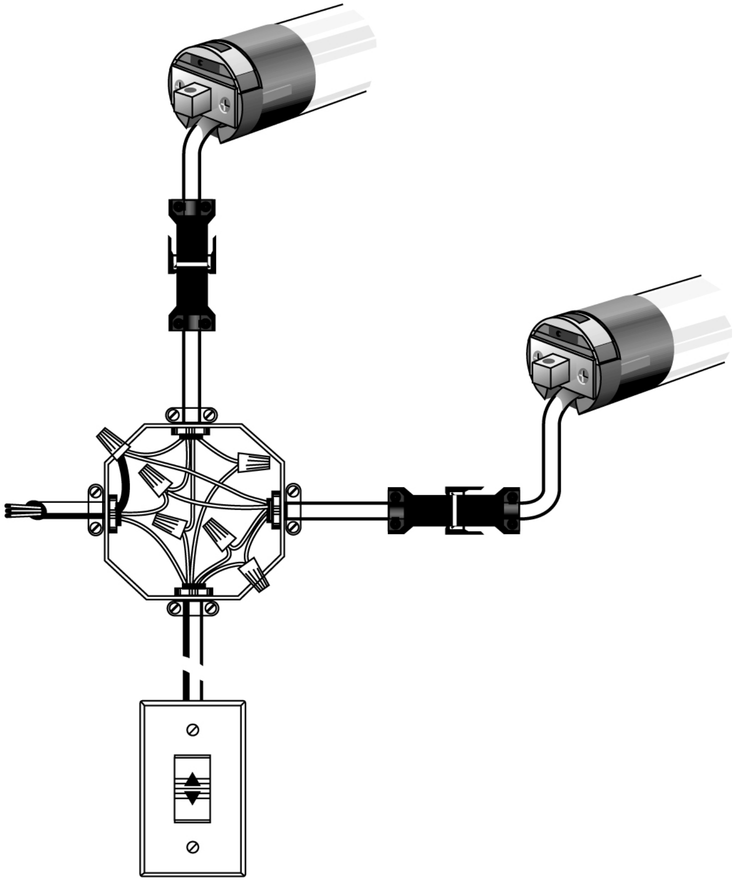
All wiring must be accomplished by a licensed electrical contractor in accordance with appropriate electrical codes and regulations.

All wiring must conform to:

- Any applicable MechoSystems' ElectroShade standards.
- Any MechoSystems' released wiring diagrams.
- The National Electric code (NEC) and any applicable local codes.

Before installing this product, obtain detailed electrical information on the specific control system from the Controls Section of the MechoSystems Technical Binder and any client-approved shop drawings created for the project.

- Standard Motors must not be wired in parallel or in series.
- Power requirements: 120VAC, 60 Hz, ±10%, 0.6 to 3.8 amps
- Contains internal, mechanical or electronic, upper and lower limit switches.
- Are bi-directional with a reversing capacitor.
- Motors are asynchronous with variations from their rated RPM and the shades will not always align without the use of specific alignment-logic controls such as the IQ/MLC2, which overcome this issue.
- Switches must be used as shown on the ElectroShade Standards and Wiring Diagrams.



See mechosystems.com/electricalnotes for the latest information.

The warranty will be void if:

- The product has been improperly installed or not installed according to MechoSystems' guidelines or specifications.
- MechoSystems' written instructions for installation and wiring of electrical connections were not followed.
- The product has been used to perform functions or operated in a manner contrary to its design, or otherwise is used in a manner contrary to or in excess of MechoSystems' specifications, drawings, or instructions.
- The product is used with electrical accessories or parts, including switches, relays, or other accessory components, that have not been previously approved in writing by MechoSystems.
- Any electrical accessories and other components have been used in disregard to the basic wiring diagram for which they were designed.
- Failure to comply with all MechoSystems' written instructions and specifications.
- Repairs made necessary from normal wear of the product or by use of the parts, or accessories, which are either incompatible with the product, or otherwise adversely affect its operation, performance, or durability.
- The product used for non-interior applications or otherwise exposed to outdoor environmental conditions.

General Terms and Conditions of Sale/Warranty

Interior Product Use

I. ACCEPTANCE OF ORDERS

All Buyers' Orders must include a Buyer's Purchase Order and a MechoShade Systems, Inc. (MSS) Order Form, and be signed by the Buyer. MSS is not bound by any terms listed on the Buyer's Order Form that are in variance with MSS's General Terms and Conditions of Sale/Warranty (hereafter "Terms and Conditions" or "Agreement"). Upon receiving MSS's Order Acknowledgment, the Buyer is considered to have accepted the Order as written and has agreed to MSS's Terms and Conditions. No Order, quotation, or Acknowledgment and no provisions of MSS's Terms and Conditions shall be subject to change in any respect, except as may be expressly agreed to in writing by an authorized officer of MSS. Failure of MSS to object to provisions contained in any Purchase Order or other communication from the Buyer in conflict or inconsistent with MSS's Terms and Conditions (including without limitations, penalty clauses, liability, or labor charges) shall not be construed as a waiver of these Terms and Conditions, nor an acceptance of any such conflicting or inconsistent provisions.

The Terms and Conditions herein constitute the entire Agreement between MSS and the Buyer. No other representations or warranties shall be binding against MSS. In no event shall MSS be responsible or liable for any special, direct, or consequential damages rising out of this Agreement with the Buyer. In no event shall MSS be responsible for costs for labor, the installation, reinstallation, or removal of MSS parts or components, access to the work, including, but not limited to, travel to and from the site, ladders, rigging, or scaffolding of any type. These Terms and Conditions do not constitute a franchise or establish an agency relationship and do not grant a trademark or any other expressed or implied license.

An Order is accepted as being complete only after receipt of all of the following, and is subject to acceptance by an officer of MSS ("MSS Order Acknowledgment"):

1) A signed Purchase Order reflecting quantity, price, all details, and, if required, final dimensions for fabrication.
2) A deposit, if required.
3) Credit approval.
4) Approved drawings and seam and/or batten diagrams, if applicable.
4.1) Approved shop drawings, if applicable.
5) The Buyer is required to provide all necessary details, specifications, and information to MSS for the proper fabrication of the Buyer's Order.
6) Shop drawings are provided upon request and at the cost of the Buyer. The minimum charge for shop drawings, architectural or electrical (A/E), is four (4) man-hours charged at the then-current rate. Note, any revision outside of the scope and responsibility will be subject to review and additional charges, the minimum being four (4) man-hours charged at the then-current rate.
6.1) A/E shop drawings are prepared for the Buyer. It is the Buyer's responsibility to verify that the scope of the shop drawings are consistent with the Buyer's contract and scope of work, and consistent with the jobsite conditions.
6.2) MSS Price List orders do not include the cost for reviewing or preparing shop drawings.
6.3) Special contract projects submitted to MSS for pricing will include an allowance for shop drawings, which allowance shall be clearly identified.

II. PRICES

Prices are for materials and/or fabricated products only, ex-works MSS factory, and do not include shipping, installation, or shop drawings, unless otherwise indicated, or any federal, state, or local taxes. Prices and specifications are subject to change without notice. Written quotations expire 90 days from the date of the quotation, unless otherwise specified. In the event that the Buyer requests to postpone the delivery date of a previously accepted Order, MSS on its sole discretion reserves the right to fabricate, bill, and hold. Payment is due in accordance with sale terms, shipped or unshipped. If MSS agrees in writing to a postponed delivery date, the price that applies to this Order shall be the price in effect on the postponed shipping date.

III. ORDER CHANGE POLICY

MSS routinely provides a printed (faxed or emailed) Order Acknowledgment for every order we enter. This is provided to our customers to offer an opportunity to correct any errors or omissions in instructions for the related customer requirement. Changes to an order received and acknowledged shall be reviewed for cost and delivery impact, if any. If the customer requests a change, a new order date is required due to the interruption in processing the order. The new order date is implemented upon receipt of the qualifying information which will then allow for proceeding with the order. A change in part of an order will affect the delivery date of the entire order.

a. If the order is to be completed "as is", it will be returned to the production floor and will be manufactured as close to the original "promise" date as possible. The number of hold delay days shall be added to the original proposal delivery date, plus the number of days it was held up for processing the change request.

b. If the order is to be changed, we will edit the order and the order lead time will be reset as if this were a new order being entered with the current standard lead time for the products in question.

c. If fabric or special materials for a large/impact order are required and are purchased by MSS and the Buyer later cancels the order or changes the specifications or size of the order, the Buyer shall be held responsible for the additional cost of the fabric, special materials purchased, or inventory costs. A restocking or fabrication charge may be applied to the order.

In the event a customer requests changes to their orders and/or files claims for incorrect-sized product on a more than usual frequency, MSS may, at our option, implement an "Acknowledge and Hold" process, requiring the dealer in question to confirm receipt and acceptance of our Order Acknowledgment prior to releasing to production. (This may delay the order lead time by the time-length lapse between our Order Acknowledgment and the dealer's confirmation of acceptance.)

IV. CANCELLATION

All Orders, including for shop drawings, are custom in nature and cannot be cancelled by the Buyer. In the event of cancellation, the shop drawing work shall cease. The billing for the work to the date of cancellation will be provided at the current rate.

In the event MSS agrees in writing by an authorized officer to the cancellation of an order prior to commencement of shop drawings and/or fabrication, said Order shall be subject to a minimum 25 – 50% cancellation and/or restocking charge. Special-order and non-standard items shall be paid in full at quoted price. Engineering, design, and development charges may apply. In the event the Order has been entered for fabrication, an evaluation of the costs to the company shall be made. Such costs, overhead, and profit shall be charged to the Buyer.

V. TERMS OF PAYMENT

Terms of payment are the net amount, payable within 30 days. A 1.5% per month interest fee may be charged for late payment, as specified in MSS's Order Acknowledgment and in MSS's Invoice, regardless of terms indicated in the Buyer's Order Form or other documents.

Outstanding balances unpaid on the due dates shall be subject to payment of an interest fee until paid at the maximum legally permissible rate of interest in the state having jurisdiction of the transaction. In the event of substantial changes in the financial condition of the Buyer, including but not limited to bankruptcy, change of ownership, or change in credit rating, MSS reserves the right to cancel the Purchase Order and/or MSS Order Acknowledgment without liability for damages to the Buyer, and/or change of credit terms to the company, and/or request a deposit or full payment in advance.

A change in stock ownership of the company effects credit and shall require submitting for credit approval as a new company.

VI. DELIVERY

MSS will use best efforts to ship within the committed timeframe. The start date for delivery commitment shall be the date of receipt of all dimensions and approvals. All shipments are Point of Shipment, ex-works, freight-collect, or prepaid-and-charge as determined by MSS. MSS shall specify Point of Shipment on its MSS Order Acknowledgment, and MSS shall select billing, routing, and the method of transportation if not specified on Buyer's Purchase Order.

Claims for lost or damaged shipments shall be reported immediately to both the carrier and MSS. The company ordering and contracting for the shipping is required to file all claims. Annotations shall be placed on all delivery receipts signed by the Buyer. Packaging shall be retained for inspection. The Buyer shall inspect the merchandise upon delivery and in the event defects or damages are noticed, both the carrier and MSS shall be immediately contacted by telephone. If the carrier fails to send an inspector within five (5) days, a request shall be made in writing to the carrier and MSS confirming the telephone request for an inspection. Should the Buyer, in the first instance, fail to properly file a claim with the carrier, substantiated in accordance with its rules and within its time limit, any possibility of claim for defect against MSS is waived. Removal of the product and/or original packaging prior to MSS and insurance inspection without written approval from MSS and/or the insurer may, at MSS and insurer's option, cancel all warranties and invalidate claims

General Terms and Conditions of Sale/Warranty (continued)

Interior Product Use

to MSS and/or the insurer.

VII. SHIPPING DELAYS

Unless otherwise specified by MSS, shipping dates provided by MSS at the request of the Buyer are approximate; deviation from estimated shipping schedules shall not entail penalties or damages, nor shall it be an acceptable ground for cancellation of the Order.

MSS shall not be responsible for any loss or damages to the Buyer (or any Third Party) occasioned by the non-performance of any of MSS's obligations under the contract when due to any cause beyond MSS's reasonable control, including, without limitations, an act of God, an act or omission of the Buyer, an embargo or other governmental act, delays in transportation, or an inability to obtain the necessary labor, material, or manufacturing facilities.

VIII. WARRANTY

MSS Warranty is for the use of MSS's products for interior use only and is not warranted for exterior use or installation unless specifically indicated by, but not limited to, MSS's published information, its website, Order Acknowledgment, and/or published literature.

Please see MSS's Terms and Conditions for any additional information. The Terms and Conditions between the Buyer and MSS constitute the entire agreement between MSS and the Buyer and MSS and the Buyer's customers. No other representations or warranties shall be binding against MSS.

MSS warrants to the original Buyer and those Transferees specifically authorized herein that its products are free of manufacturing defects in factory materials or workmanship for the following specified warranty periods:

Hardware, accessories, and shadecloth:

MSS Warranty is for the range of standard size shades as indicated in MSS's published Price List or website.

MSS does not extend its Warranty to a dealer or similar entity who brokers the product to another dealer or similar entity. There is no restriction on the transfer of the Warranty to the main, general or interior contractor, or owner, in accordance with their interest when provided by the original Buyer from MSS.

MSS Warranty applies to MSS products fabricated by MechoShade Systems, Inc. Lifetime Limited Warranty is defined to be the life of the project for which it was originally purchased, not to exceed 25 years from the date of shipment for the specified products only. Warranty for unnamed hardware and fabrics shall not exceed 10 years from date of shipment. Warranty for unnamed electronics shall not exceed five (5) years.

All warranties shall be from date of shipment, within the published standard fabricated size shades only. All shades larger than MSS's published shade sizes in any one direction are deemed to be Monumental shades and/or High-Bay shades if mounted 20 ft. (6.09m) or more from the finished floor.

Products:

- Mecho®/5 and ElectroShade® hardware with ThermoVeil®, EuroVeil®, EuroTwill®, Equinox, Midnite®, and Classic Blackout shadecloths – 25 years.
- EcoVeil® – 10 years with MSS hardware, fabricated by MSS.
- MirroFilm® – Five (5) years with MSS hardware, fabricated by MSS.
- Customer's Own Material (COM) is not warrantied.
- Unnamed MSS fabrics – 10 years, fabricated by MSS.
- COM fabrics are not warrantied.
- The bead chain in all manual systems is a fail-safe component and is not included in any MSS Warranty.
- Mecho SlimLine® – 10 years.
- Mecho SlimLine and UrbanShade® hardware with ThermoVeil, EuroVeil, EuroTwill, Equinox, Midnite, and Classic Blackout shadecloths – 10 years.
- MagnaShade® – 10 years with specifically approved MSS shadecloths, fabricated by MSS. No other shadecloths are warrantied.
- The MagnaShade System requires cleaning of the cradle at least once (1) each year to clear it of particulate that may accumulate over time.
- MagnaShade hardware provided by others – 10 years.
- MagnaShade shade-band fabrication by others is not warranted by MSS.

Controls, Electrical, Electronic Accessories, and Motors:

- Five (5) years from date of shipment.
- MSS reserves the right to provide refurbished replacement motors and electronics under warranty which shall be warrantied to the end of the term of the original purchase warranty.

Software/Automated Systems:

- MSS Automation hardware warranty shall be the manufacturer's warranty and shall pass through to the Buyer.
- Electronic components are warrantied to be free of manufacturing defects for five (5) years.
- Software is warrantied against material defects.
- Software modified for a specific project may have project-specific warranties.
- SolarTrac® fine-tuning requires IP access during normal MSS business hours (E.S.T./E.D.S.T.).
- SolarTrac Infinity: Fine-tuning online commences after a project's substantial completion for a six (6) month solar-solstice period, from December 21 – June 21 or June 21 – December 21.
- SolarTrac 50: Fine-tuning online commences after a project's substantial completion for a three (3) month period commencing upon the date of substantial completion.
- SolarTrac/12-SunDialer®: one (1) month period of fine-tuning commencing upon date of occupancy.
- SolarTrac and System Training: In order for the MSS Warranty to be in full force and effect, the owner and/or user shall provide appropriately educated staff for an end-to-end commissioning/training period of two (2) full days for certification and operation of MSS Automated and Control Systems from the motors to the central server, and one (1) full day for education on the operation SolarTrac for the warranty to be in full force and effect for the operating system.
- Service and maintenance of the computer hardware is the responsibility of the Buyer/User.
- MSS recommends annual service and review of the hardware and connectivity of all motorized, High-Bay and Monumental shades for the MSS Warranty to be in full force and effect.
- MSS recommends a multi-year software service agreement to keep the Warranty in full force and effect. All in accordance with MSS's Terms and Conditions.

The MSS Limited Warranties are exclusive and in lieu of all other warranties, whether written, oral, or implied (including any implied warranty of merchantability, fitness for a particular purpose, or otherwise).

Monumental shades are defined to be all shades where any one dimension of the shade is larger than MSS's published list of fabricated shade sizes or 20 ft. (6.09m), whichever is greater. High-Bay shades are deemed to be all shades mounted 20 ft. (6.09m) or more from the floor.

The MSS Warranty for Monumental/High-Bay shades shall be limited to 10 years for hardware and shadecloth, five (5) years for motors and electronics. If any part of a MSS product (except for images or artwork on shadecloths) is found in the reasonable judgment of MSS to be defective in factory materials or workmanship during the above-prescribed warranty periods, MSS will repair or replace the defective part at its option. Repair or replacement under this Warranty does not include shipping, labor or costs for installation, reinstallation, removal of MSS products, parts, or components.
This Warranty extends only to the original Buyer for MSS products installed by an authorized MSS dealer representative. MSS shall be promptly notified of all complaints or claimed product defects, with sufficient time for MSS to inspect the product on site or at the dealer's facility. Removal of the product and/or original packaging prior to MSS and insurance inspection, without written approval from MSS and/or the insurer, may, at MSS and insurer's option, cancel all warranties and invalidate claims to MSS and/or the insurer.

Exterior Shades:

Shades mounted to the exterior and/or exposed to outdoor environmental conditions are excluded from this warranty and will be subject to a specific warranty that may be written for the specific project.

This Warranty does not apply if any of the following exclusions exist:

- The product has been subject to misuse, abuse, neglect, negligence, accident, or has been operated in any way contrary to MSS's operating instructions or specifications.
- Damages or conditions have resulted from improper cleaning, maintenance, care, or repair of the product.
- The product has been improperly installed or not installed according to MSS's guidelines or specifications.
- MSS's written instructions for wiring components, installation, or wiring of electrical connections were not followed.
- The product has been used to perform functions or has been operated in a manner contrary to its design or otherwise has been used in a manner contrary to or in excess of MSS's specifications, drawings, or instructions.
- The product has been used with electrical accessories or parts (such as switches, relays, or other accessory components) that have not been previously approved in writing by the MSS Engineering Department.
- If any electrical accessories and/or other components

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

General Terms and Conditions of Sale/Warranty (continued)

Interior Product Use

have been used in disregard to the basic wiring diagram for which they were designed.

- Failure to comply with all of MSS's written instructions and specifications.
- Repairs are made necessary from normal wear of the product or by use of parts or accessories which are either incompatible with the product or otherwise adversely affect its operation, performance, or durability.
- Claims for Subsequent Failure: In the event of a claim of faulty products installed or not installed, the Buyer shall promptly notify MSS and provide access to the work and claimed faulty product. MSS reserves the right to remove and repair and/or replace at its unilateral discretion. The Buyer is not authorized to provide services of any kind and charge back to MSS without written approval from an authorized officer of MSS. MSS has final right of refusal.
- The product is used for non-interior applications or otherwise exposed to outdoor environmental conditions. MSS requires that the Buyer license or own the right to reproduce all images or artwork, photographs, and other intellectual property provided by the Buyer, its agents, or customers. The Buyer shall indemnify, defend, and hold harmless MSS, its imaging supplier, and their employees and officers against any claims or actions for alleged or actual copyright or trademark infringement or any other claims resulting from reproduction of the images or artwork in any form or any other use of the images or artwork by the Buyer, MSS, its imaging supplier, or other Third Parties.

THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, WHETHER WRITTEN, ORAL, OR IMPLIED (INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR OTHERWISE). MSS SPECIFICALLY DISCLAIMS ALL OTHER EXPRESS OR IMPLIED WARRANTIES, INCLUDING MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR OTHERWISE IN THEIR ENTIRETY. MSS'S OBLIGATION UNDER THIS WARRANTY IS STRICTLY AND EXCLUSIVELY LIMITED TO THE REPAIR OR REPLACEMENT OF DEFECTIVE PARTS AS HEREIN DESCRIBED, AND MSS DOES NOT ASSUME (OR AUTHORIZE ANYONE TO ASSUME FOR MSS) ANY OTHER OBLIGATION, WHETHER WRITTEN, ORAL, OR IMPLIED. NOTWITHSTANDING ANY OTHER REPRESENTATIONS OR AGREEMENTS BY ANY PARTY OR NON-PARTY, WHETHER WRITTEN, ORAL, OR IMPLIED.

MSS ASSUMES NO RESPONSIBILITY AND SHALL NOT BE LIABLE TO THE ORIGINAL BUYER OR ANY OTHER PARTY OR NON-PARTY FOR ANY PERSONAL INJURY, LOSS, OR DAMAGE, WHETHER DIRECT, LIQUIDATED, INCIDENTAL, OR CONSEQUENTIAL, INCLUDING BUT NOT LIMITED TO THE LABOR OR COSTS RELATED TO THE ACCESS TO THE WORK, REPLACEMENT OF A DEFECTIVE PRODUCT OR PARTS OR INSTALLATION, REINSTALLATION, OR REMOVAL OF SUCH PRODUCT OR PARTS, EXPENSE OF RETURNING A PRODUCT OR PART TO MSS OR ITS AUTHORIZED DEALER OR THE EXPENSE OF DELIVERING IT BACK TO THE ORIGINAL BUYER, LOSS OR DAMAGE TO PERSONAL OR REAL PROPERTY, LOSS OF REVENUE, LOSS OF THE USE OF THE PRODUCT, LOSS OF TIME, OR INCONVENIENCE.

This Warranty gives the original Buyer and those Tranferees specifically authorized herein specific legal rights, and the original Buyer may also have other rights, which vary from state to state. All costs related to installation and reinstallation of the MSS equipment covered by this Warranty are not the responsibility of MSS. MSS will not be responsible for any consequential or liquidated damages during or following the installation procedures, regardless of agreements required by or made by others. Before using, the Buyer and/or the ultimate user shall determine that the product is suitable for the intended application, and user assumes all risks and liability in connection therewith. Product specifications can be obtained by contacting MSS or an authorized MSS dealer.

This Warranty may only be changed or modified with the express, written consent of a MSS corporate officer so authorized. Any removals, modifications, or changes to the system due to changes in the tenant occupancy must be reviewed and approved by MSS and the work performed by an authorized MSS representative pursuant to a valid, written contract dealer-representative agreement with MSS. If the Buyer resells any MSS products, it shall include all of the Terms and provisions of this Warranty in such resale.

MSS's responsibility to any such Third Party shall be no greater than MSS's responsibility under the Warranty to the original Buyer.

IX. RETURNS

No returns will be accepted without prior written authorization by MSS. All returns must be accompanied by a Return Authorization Number, issued by MSS and are subject to a minimum 25 – 50% restocking charge. All unauthorized returns will be refused. The return shipment is to be freight prepaid by the Buyer, and under no circumstances shall the Buyer deduct the value of the returned merchandise from any remittance due.

X. TITLE

Risk of loss on all products shall pass to the Buyer at the ex-works, Point of Shipment. However, MSS shall retain a security interest in the products until fully paid and the Buyer agrees to perform all acts which may be necessary to perfect and assure the security interest in such equipment by MSS. In the event that MSS wishes to file a security interest in the products, pursuant to the Uniform Commercial Code, the Buyer authorizes MSS to file such financing statements without the Buyer's signature.

XI. DEFAULT

In the event of Buyer's default in payment for the products purchased hereunder upon the Terms and Conditions agreed upon with MSS, to the extent permissible under New York State Law, the Buyer shall be responsible for all reasonable costs and expenses, including reasonable attorneys' fees, incurred by MSS in collecting any sums owed by the Buyer, and MSS shall not be obligated to make any further deliveries to the Buyer.

XII. SUBSTITUTES

MSS may furnish substitutes for materials not obtainable because of priorities or regulations established by governmental authorities, or because of a non-availability vof materials from suppliers, provided such substitutions will not affect the technical soundness of the product or its performance.

MSS policy is of continuous improvement for its products which requires the latest improvement be utilized without notice to the Buyer.

XIII. ERRORS

Typographical or clerical errors in price lists, quotations, specifications, printed documents or publications, Orders, or Acknowledgments are subject to change and/or correction, and may be changed without notice.

XIV. DIMENSIONS

The dimensions and measurements in MSS printed documents are approximate at the date of publication and may be superseded thereafter. The Buyer should consult the factory before utilizing such information. All specifications shall be subject to change without notice

XV. WAIVER

The failure of MSS to seek redress for any breach or violation of, or to insist upon the strict performance of, any covenant or condition of this Agreement, shall not operate as a waiver of any subsequent breach or violation. The receipt by MSS of any payment, with knowledge of the breach of any covenant of this Agreement, shall be deemed to have been waived by MSS unless such waiver be in writing signed by MSS.

XVI. APPLICABLE LAW

The laws of the State of New York shall govern the interpretation of the provisions of this Agreement.

XVII. ARBITRATION

In the event of a dispute, resolution shall be through binding arbitration in New York, New York, or Phoenix, Arizona, under the national or international rules of the American Arbitration Association, with one (1) arbitrator. In the event the claim is $200,000 or more, three (3) arbitrators shall be selected by the parties. All arbitration costs shall be shared by the parties.

Specifications (including colors) subject to change without notice. Prices shown in U.S. dollars.

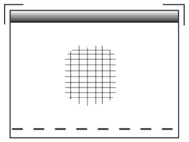
Important Considerations When Ordering

MechoShades®, ElectroShades®, or UrbanShade® Systems

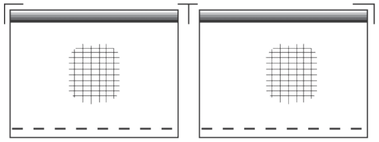
Single- or Multi-Banded

Shades may be either single-banded (operating with one drive chain or motor), or multi-banded (operating with up to four bands on a single motor).

Single Band



Multi Band

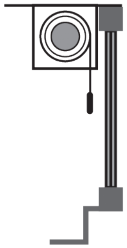


(Two or more shade bands on one operator MechoShades® or ElectroShades®)

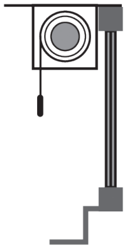
Regular Roll or Reverse Rolls

Shades may be either Regular Roll where shades roll down off the roll towards the window, or Reverse Roll where shades roll down off the roll toward you, the user.

Regular Roll



Reverse Roll

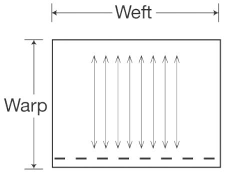


Non-Railroaded or Railroaded

Non-Railroaded shades are shades where the width of the window is less than the width of the shadecloth, and the height of shade runs vertically on the shadecloth.

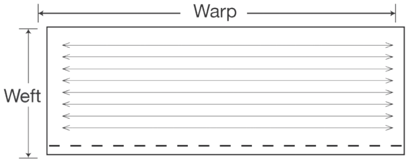
Railroaded shades are shades where the width of the window is greater than the width of the shadecloth, and the height of the shadecloth is rotated horizontally and trimmed to the width of the shade. Several Railroaded pieces of shadecloth are then joined together with either a seam joint or a batten joint to form a single band.

Non-Railroaded



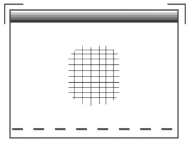
(Shadecloth used normally)

Railroaded (Landscape)



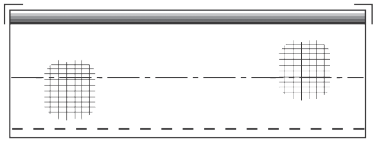
(Shadecloth used width-for-height)

Single width



(No seams)

Multi width (Landscape)



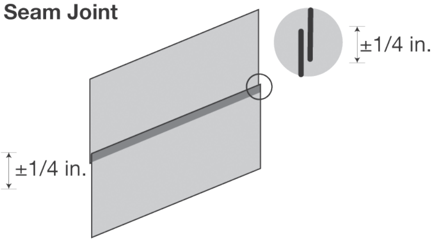
(A shade band with two or more widths joined with a seam or batten)

Seam Joints or Batten Joints

A Seam Joint is a 1/4 in. welded overlap of two shadecloth pieces. Shades over 84 in. wide require additional stabilization, in the form of a Batten Joint, to prevent the edges from curling. A Batten Joint has a 2 in. welded overlap with concealed stabilizers.

For 96 in. wide Non-Railroaded fabrics, seams will be used unless width-to-height ratio exceeds 4:1.

Seam Joint



Batten Joint
