Minutes

1) **New Course Proposal – Marketing 1 (Denise Johnson-Kaul)**	Reviewed and discussed new course proposal. This will be an introductory course in our CTE business department. This course will offer the opportunity of articulation with Solano Community College for students to receive college credit with completion of assignments.	Survey was given to students to find out if there was an interest in this course and the survey indicated students would be very interested in a Marketing Course.
2) **Health Course**	Continued our discussion of possibly moving our Health course to the freshman year and what courses would be offered as one semester to follow up to health.	Update on courses for next year: Adulting is approved for grades 11/12. Two Intro Courses on Ethnic Studies were approved. All three will be available for students to choose with their course selection in February.
3) **Site Goals - Current and 22-23**	This year our focus has been to reconnect students to learning, focus on mental health, welcoming students fully back to campus.	We talked about our goal to establish positive school community/togetherness. Rallies- are they for all school or optional at lunch. Our population outgrew our gym; causing rallies to be optional since our entire school population cannot fit in the gym at once.
