700 Series® Lateral Files and Storage

General Information

GENERAL INFORMATION

KI 700 Series lateral files are designed on a 1 1/2" module to provide an unparalleled degree of internal flexibility. Interior components are available 3", 6", 7 1/2", 9", 10 1/2", 12", 13 1/2" and 15" high. These components are designed to efficiently accommodate virtually any filing and storage requirement.

To assure KI files are compatible with panel systems, desks or custom architectural details, cabinets are available in 18 different heights.

Preconfigured Units

To simplify the specification process, KI offers preconfigured files and storage cabinets in the most popular sizes with the most popular internal components. These units are assembled using standard components. Lateral files and storage cabinets can be field-retrofitted and updated by specifying componentry from the Custom-Built section of this price list. This does not include current series units.

Height

Lateral files and storage cabinets are available in 40 standard heights. Heights include 1/8" allowance for leveling glides fully recessed.

Depth

All lateral files and storage cabinets are 18" deep.

Width

Lateral files and storage cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions

Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES Basic Shell

Shell common to lateral file and storage cabinet units. Uprights punched to accept interior components on 1 1/2" centers. Uprights and top and bottom reinforcements are welded into rigid "boxframe." Constructed of 18- and 20-gauge steel.

Seamless back and top with reinforced corners.

Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Doors/Drawers

Drawer fronts, 20-gauge steel with full-width flush inset pull and label holder or flat front with exterior pulls and no label holder. Fronts are screw-mounted to roll-out shelves to build drawers.

Roll-out shelf body, 22-gauge steel slotted on 1 1/2" centers to accept dividers. Leading edge formed to provide pull; center section offset for additional strength. Shelf ends, 19-gauge steel, notched to accept hanging folder bars. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions.

Components have been tested to accept loads of 125 lbs. This exceeds ANSI/BIFMA X5.9-2004 standards for lateral files when recommended counterbalance weight is installed.

Hinged door, 20-gauge steel, double-wall construction. Door swing is limited to 110° to prevent contact with adjacent cabinet and full height vertical flush inset pull.

Shelves

Blank shelf, 22-gauge steel, formed 7/8" thick on front and back edges. End Tab Shelf, 22-gauge steel shelf and back, 18-gauge sides. Shelf offset along width to increase strength. Slotted on 1" increments to accept plate dividers

Preconfigured lateral files meet or exceed ANSI/BIFMA X5.9-2004 standards.

Receding Door

20-gauge steel with full-width flush inset pull and label holder. Equipped with sound absorber. Doors have guiding mechanism fitted with nylon glides to prevent metal-to-metal contact and ensure effortless operation. The diagrams on the following page identify various shelf and drawer combinations and related height clearances behind a receding door. The diagrams show typical use. Additional interior options can be installed behind a receding door.

Note: Dimensions have been taken from the front raised edge of the roll-out shelf

Accessories

Plate dividers, 18-gauge steel, notched to lock into shelf. Folder bars, 30" & 36" (14-gauge steel); 42" (12-gauge steel), offset to maximize strength.

Suspended binder frames are constructed of 14- to 18-gauge steel. Screw-mounted to cabinet. Can be used behind 13 1/2" and 15" receding doors and hinged storage cabinet doors.

Adjustable Glides

Lateral files and storage cabinets are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench, or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Interlock

All cabinets are equipped with an interlock safety mechanism. This mechanism reduces the possibility of cabinet tipover by permitting only one drawer to be opened at a time. With some unique combinations an individual drawer may not be controlled by the interlock. In these instances a caution label will be affixed to the drawer body.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs a unique key is required. This key is the extractor (core removal) key and can be found in the accessories section of this price book. Contact Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-numbered locks.

Example: 30 plugs:
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process

enhances top coat bonding.

Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Special Paint Finishes

All special colors, including other manufacturers' standard finishes, are available subject to the following conditions.

- Two steel color chips (minimum 2.5" x 3.5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
- All solid, single-pass nonstandard colors are available at no upcharge, but may be subject to extended lead-times. Colors that are deemed to be metallic, hi-chromatic, textured or require multiple passes, are subject to upcharges. Orders will not be processed until a color match is approve. Written confirmation must accompany the order.

INSTALLATION

Caution Labels

Caution- and safety-related information is contained on a peel-off label affixed to the front of the cabinet. This label is to be removed by the customer.

Caution: Information is also permanently affixed to the left side of the top drawer. Both labels contain important installation and loading information.

Installation Information

Complete instructions on the proper installation and use of KI files are provided in each file shipped. The instructions refer to correct methods of leveling, ganging and loading. Counterbalance weights should be installed in all single freestanding files.

Field Reconfiguration

As needs change, KI lateral files and storage cabinets can readily be field-changed; however, this process should be undertaken by a qualified service technician.

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature.

How to Build a Model Number

Example: Preconfigured 700 Series Lateral Files & Multimedia Storage

S7L	36	480	4D	BL	CBW50	334FBK
S7L	Product name	700 Series Lateral File				
36	Width	36" wide				
480	Interior height (nominal)	48" high				
4D	Type of unit	4 high, 4 drawer				
BL	Color code	Black				
CBW50	Optional	50# Counterbalance weight				
334FBK	Optional	Front-to-back filing bars				

Each internal component has a corresponding character:

D	Drawer with side-to-side folder bars
R	Receding door, rollout shelf with side-to-side folder bars
E	End tab shelf with plate dividers
HD	Hinged door cabinet with blank shelves
HX	Hinged door cupboard without shelves
OVHD	Overfile storage cabinet

The 334 model number for accessories indicates the item may be used in all cabinet widths.

NOTE: The unit must SPECIFY optional CBW and accessories as INSTALLED or they will be shipped separately.

700 Series® Curve Lateral Files and Storage

General Information

GENERAL INFORMATION

KI CURVE lateral files are designed on a 1½" module to provide an unparalleled degree of internal flexibility. Interior components are available in 3", 6", 7½", 9", 10½", 12", 13½" and 15" high. Clean stylish looks, flexible aesthetics and durability allow Curve to work in private offices and open plan environments. With a gentle curved frame and contoured drawer pulls Curve creates a timeless design element.

Flexible aesthetic and flexible format. Curve allows you to design from the inside out, fitting the media to the appropriate lateral, pedestal, cupboard, bookcase and combination File/Locker unit.

Heavy-gauge steel construction and welded internal box frame provide structural integrity. Multi-extension suspensions provide smooth operation. KI's unique patented interlock/anti-tilt mechanism, with automatic restaging, prevents the opening of more than one drawer at a time. Curve enhances security with its key possibilities.

Preconfigured Units

To simplify the specification process, KI offers preconfigured files and storage cabinets in the most popular sizes with the most popular internal components. These units are assembled using standard components.

Height

Lateral files and storage cabinets are available in 14 standard heights. Heights include ½" allowance for leveling glides fully recessed.

Depth

Lateral files and storage cabinets are 18" deep. Curve combination locker/file units are available in both 18" and 24" depths.

Width

Lateral files and storage cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions

Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Shell common to lateral file and storage cabinet units. Uprights punched to accept interior components on 1½" centers. Uprights and top and bottom reinforcements are welded to create a rigid box frame. Constructed of 18 -and 20-gauge steel. Seamless back and top.

Illustrated shell heights include ½" for adjustable glide in recessed position.

Doors/Drawers

Drawer fronts, 20-gauge steel with full-width contoured curved pull. Fronts are screw-mounted to roll-out shelves to build drawers. Roll-out shelf body, 20-gauge steel slotted on 1½" centers to accept dividers. Shelf ends, 18-gauge steel, notched to accept hanging folder bars. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions.

Components have been tested to accept loads of 125 lbs. exceeding ANSI/BIFMA X5.9-2004 standards for lateral files.

Hinged door, 20-gauge steel, double-wall construction. Door swing is limited to 95° to prevent contact with adjacent cabinet.

Shelves

Blank shelf, 22-gauge steel, formed 1" thick on front and back edges. End Tab Shelf, 22-gauge steel shelf and back, 20-gauge sides. Shelf offset along width to increase strength. Slotted on 1" increments to accept plate dividers.

Preconfigured lateral files meet or exceed ANSI/BIFMA X5.9-2004 standards when recommended counterbalance weight is installed.

Receding Door

20-gauge steel with steel full-width contoured curve pull. Equipped with sound absorber. Doors have guiding mechanism fitted with nylon glides to prevent metal-to-metal contact and ensure effortless operation.

The diagrams on the following page identify various shelf and drawer combinations and related height clearances behind a receding door. The diagrams illustrate typical use. Additional interior options can be installed behind a receding door.

Note: Dimensions have been taken from the front raised edge of the roll-out shelf.

Accessories

Plate dividers, 18-gauge steel, notched to lock into shelf. Folder bars, 30" & 36" (14-gauge steel); 42" (12-gauge steel), offset to maximize strength.

Suspended binder frames are constructed of 1/2" to 18-gauge steel. Screw-mounted to cabinet uprights. Fit in multi-media cabinets and behind receding doors.

Adjustable Glides

Lateral files and storage cabinets are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a ¼", hex socket wrench, or from outside the cabinet using a ⅞" wrench. Standard glides provide ¾" adjustment; longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Interlock

All cabinets are equipped with an interlock safety mechanism. This mechanism reduces the possibility of cabinet tipover by permitting only one drawer to be opened at a time. With some unique combinations an individual drawer may not be controlled by the interlock. In these instances a caution label will be affixed to the drawer body.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs a unique key is required. This key is the extractor (core removal) key and can be found in the accessories section of this price book. Contact Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-numbered locks.

Example:

30 plugs:
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding. The wet coat application is either alkyd or acrylic paint finish. The powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Special Paint Finishes

All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

1. Two steel color chips (minimum 2.5" x 3.5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.

2. All solid, single-pass nonstandard colors are available at no upcharge, but may be subject to extended leadtimes. Colors that are deemed to be metallic, hi-chromatic, textured or require multiple passes, are subject to upcharges. Orders will not be processed until a color match is approved.

Written confirmation must accompany the order.

INSTALLATION

Caution Labels

Caution- and safety-related information is contained on a peel-off label affixed to the front of the cabinet. This label is to be removed by the customer.

Caution: Information is also permanently affixed to the left side of the top drawer.

Both labels contain important installation and loading information.

Installation Information

Complete instructions on the proper installation and use of KI files are provided in each file shipped. The instructions refer to correct methods of leveling, ganging and loading. Counterbalance weights should be installed in all single freestanding files.

Field Reconfiguration

As needs change, KI lateral files and storage cabinets can readily be field-changed; however, this process should be undertaken by a qualified service technician.

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature.

How to Build a Model Number

Example: Preconfigured 700 Series Curve Lateral Files & Multimedia Storage

S7CL	36	480	4D	BL	CBW50	334FBK
S7CL	Product name	700 Series Curve Lateral File				
36	Width	36" wide				
480	Interior height (nominal)	48" high				
4D	Type of unit	4 high, 4 drawer				
BL	Color code	Black				
CBW50	Optional	50# Counterbalance weight				
334FBK	Optional	Front-to-back filing bars				

Each internal component has a corresponding character:

D Drawer with side-to-side folder bars
R Receding door, rollout shelf with side-to-side folder bars
E End tab shelf with plate dividers
HD Hinged door cabinet with blank shelves
HX Hinged door cupboard without shelves
OVHD Overfile storage cabinet

The 334 model number for accessories indicates the item may be used in all cabinet widths.
NOTE: The unit must SPECIFY optional CBW and accessories as INSTALLED or they will be shipped separately.

700 Series® OF Lateral Files/Storage Cabinets

General Information

GENERAL INFORMATION

KI 700 Series OF lateral files are designed on the same 1½" upright module as standard 700 Series products. Only 10½" and 12" drawer fronts are illustrated. Other drawer front options, including 6", 7½", 9", 13½" and 15" heights are available on a special order basis. Please contact KI Customer Service for details and pricing.

Only four cabinet heights are illustrated. A total of 40 cabinet heights are available to suit virtually any height requirement. Additional cabinet heights are available on a special order basis. Please contact KI Customer Service for details and pricing.

Height

Lateral files and storage cabinets are available in four standard heights. Heights include 7½" allowance for leveling glides fully recessed.

Depth

All lateral files and storage cabinets are 187/8" deep. This dimension includes the allowance for drawer front thickness.

Standard KI laminate and wood fronts plus the gap between the cabinet and the front equals 7/8". Cabinets with fronts are 187/8" deep.

Width

Lateral files and storage cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions

Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Shell common to lateral file and storage cabinet units. Uprights punched to accept interior components on 1½" centers. Uprights and top and bottom reinforcements are welded into rigid "boxframe." Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners.

Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Drawer Bodies

Rollout drawer body, 20-gauge steel slotted to accept hanging folder bars. Each drawer leading edge and center section offset to provide additional strength.

Drawer body ends, 18-gauge steel notched to accept hanging folder bars. Each drawer body is equipped with two heavy-duty, three section steel-ball bearing suspension arms. Components have been tested to accept loads of 125 lbs. This exceeds ANSI/BIFMA X5.9-2004 standards for lateral files when recommended counterbalance weights are installed.

Fronts: When specified without fronts, drawers come standard with hardware to mount fronts to drawer bodies. Mounting hardware can be specified for delivery prior to product delivery. Contact Customer Service for details. When specified with fronts, fronts are particleboard core with either wood veneer or plastic laminate finish. Fronts are nominally 3/4" thick.

Front Specifications: To assist in the manufacturing of custom fronts, refer to specification section. This section provides illustrations detailing recommended dimensions and hole locations.

Shelves

Blank shelf, 22-gauge steel, formed 1" thick on front and back edges. End Tab Shelf, 22-gauge steel shelf and back, 20-gauge sides. Shelf offset along width to increase strength. Slotted on 1" increments to accept plate dividers.

Lateral files meet or exceed ANSI/BIFMA X5.9-2004 standards.

Accessories

Plate dividers, 18-gauge steel, notched to lock into shelf. They are not designed to be installed in 10½" drawers.

Folder bars, 14-gauge steel, offset to maximize strength.

Adjustable Glides

Lateral files and storage cabinets are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench, or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall cabinet heights include 1/8" allowance for the glide in its recessed position.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs a unique key is required. This key is the extractor (core removal) key and can be found in the accessories section of this price book. Contact Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-numbered locks.

Example: 30 plugs:
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding. The wet coat application is either alkyd or acrylic paint finish. The powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Model Numbering System								
Each character in the basic model number corresponds to a specific unit feature.								
How to Build a Model Number								
Example: 700 Series Optional Front Lateral Files – Flush Top Optional Picks								
S7LF	30	240	2D	L1	BL	RCY	CBW50	334FBK
S7LF	Product name	700 Series Lateral File, Flush Top						
30	Width	30" wide						
240	Interior height (nominal)	24" high						
2D	Type of unit	2 high, 2 drawer						
W1	Drawer front style	Wood, center pull						
BL	Color code	Black						
RCY	Veneer finish	Cherry veneer finish						
CBW50	Optional	50# Counterbalance weight						
334FBK	Optional	Front-to-back filing bars						
Each internal component has a corresponding character:								
S7LF	Lateral flush top							
W1	Wood, center pull							
D	Drawer with side-to-side folder bars							
The 334 model number for accessories indicates the item may be used in all cabinet widths.								
NOTE: The unit must SPECIFY optional CBW and accessories as INSTALLED or they will be shipped separately.								

Model Numbering System								
Each character in the basic model number corresponds to a specific unit feature.								
How to Build a Model Number								
Example: 700 Series Optional Front Lateral Files – Extended Top Optional Picks								
S7LE	30	240	2D	L1	BL	LGE	CBW50	334FBK
S7LE	Product name	700 Series Lateral File, Extended Top						
30	Width	30" wide						
240	Interior height (nominal)	24" high						
2D	Type of unit	2 high, 2 drawer						
L1	Drawer front style	Laminate, center pull						
BL	Color code	Black						
LGE	Laminate finish	Grey laminate						
CBW50	Optional	50# Counterbalance weight						
334FBK	Optional	Front-to-back filing bars						
Each internal component has a corresponding character:								
S7LE	Lateral extended top							
L1	Laminate, center pull							
D	Drawer with side-to-side folder bars							
The 334 model number for accessories indicates the item may be used in all cabinet widths.								
NOTE: The unit must SPECIFY optional CBW and accessories as INSTALLED or they will be shipped separately.								

700 Series® OF Lateral Files/Storage Cabinets

General Information

Nonstock Plastic Laminate Surfaces

Additional laminates are available but may be subject to additional lead time. Other special laminates require an up-charge and additional lead time. Contact KI.

INSTALLATION

Drawer Fronts

Installed front units designed for the customer come fully assembled and ready to accept drawer fronts. Drawer fronts are mounted with six screws, two per side and two at the bottom. Complete custom drawer front dimensioning can be found on page 66.

Caution Labels

Caution - and safety - related information is contained on a peel-off label affixed to the front of the cabinet. This label is to be removed by the customer.

Caution information is also permanently affixed to the left side of the top drawer. Both labels contain important installation and loading information.

Installation Information

Complete instructions on the proper installation and use of KI files are provided in each file shipped.

The instructions refer to correct methods of leveling, ganging and loading.

Counterbalance weights should be installed in all single freestanding files.

Field Reconfiguration

As needs change, KI lateral files and storage cabinets can readily be field-changed; however, this process should be undertaken by a qualified service technician.

The information outlined below should be used to communicate critical dimensions for various drawer fronts. Larger drawings are available for specific size fronts. Contact Customer Service for availability.

The KI product is designed for 3/4" thick fronts. Thinner or thicker file fronts can be

adapted to flush top product only. Please be aware that on fronts with thickness different from 3/4" the lock barrel will protrude from or be recessed into the filler rail by the dimension the fronts differ from 3/4".

On extended top product, the top rail is not required. It is integral to the shell construction,

and is painted the color of the cabinet. KI center pulls are available for installation on custom fronts. **Note:** the drawings on this page do not provide allowance for KI drawer pulls. Drawings are available for fronts with an allowance for KI drawer pulls.

The hardware necessary for mounting the drawer fronts will vary depending on the material used. The parts supplied by KI are for use when mounting medium or high-density particle or fiberboard core fronts.

700 Series® Custom-Built Lateral Files

General Information

GENERAL INFORMATION

To meet specific filing requirements, 700 Series lateral file and storage cabinet units can be created from an unparalleled selection of cabinet sizes and specialized interior options. The section includes shells and corresponding drawers, receding doors, storage cabinets and legal/letter and EDP interiors.

Cabinet shells are available in three widths and 40 standard heights. Shells are notched in 1/2" increments to accept a wide variety of interior options. Interior options range from 3", 6", 7 1/2", 9" and 10 1/2" drawers through 12", 13 1/2" and 15" drawers and receding doors. Cupboards are also available in numerous heights. Various shelves and computer media storage accessories may be specified behind storage cabinet doors and receding doors.

Height

Lateral files and storage cabinets are available in 40 standard heights. Heights include 1/8" allowance for leveling glides fully recessed.

Depth

All lateral files and storage cabinets are 18" deep.

Width

Lateral files and storage cabinets are available in three standard widths: 30", 36" and 42".

Drawer Dimensions

Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Shell common to lateral file and storage cabinet

units. Uprights punched to accept interior components on 1 1/2" centers. Uprights and top and bottom reinforcements are welded into rigid "boxframe." Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners.

Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Doors/Drawers

Drawer fronts, 20-gauge steel with full-width flush inset pull and label holder. Fronts are screw-mounted to roll-out shelves to build drawers. Roll-out shelf body, 22-gauge steel slotted on 1 1/2" centers to accept dividers. Leading edge formed to provide handle; center section offset for additional strength. Shelf ends, 19-gauge steel, notched to accept hanging folder bars. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions.

Note: Drawers have been tested to accept loads of 125 lbs. This exceeds ANSI/BIFMA X5.9-2004

standards for lateral files when recommended counterbalance weight is installed. Hinged door, 20-gauge steel, double-wall construction. Door swing is limited to 110° to prevent contact with adjacent cabinet, and self-closing hinges and full height vertical flush inset pull.

Shelves

Blank shelf, 22-gauge steel, formed 7/8" thick on front and back edges. End Tab Shelf, 20-gauge steel shelf and back, 18-gauge sides. Shelf offset along width to increase strength. Slotted on 1" increments to accept plate dividers.

Lateral files meet or exceed ANSI/BIFMA X5.4-2009 standards.

Receding Door

20-gauge steel with full-width flush inset pull and label holder. Equipped with sound absorber. Doors have guiding mechanism fitted with nylon glides to prevent metal-to-metal contact and ensure effortless operation. The diagrams on the following page identify various shelf and drawer combinations & related height clearances behind a receding door. The diagrams illustrate typical use. Additional interior options can be installed behind a receding door. **Note:** Dimensions have been taken from the front raised edge of the rollout shelf.

Note: Receding doors cannot be installed directly below a drawer.

Accessories

Plate dividers, 18-gauge steel, notched to lock into shelf. Folder bars, 30" & 36" (14-gauge steel); 42" (12-gauge steel), offset to maximize strength. Suspended binder frames are constructed of 14- to 18-gauge steel. Screw-mounted to cabinet. Can be used behind 13 1/2" and 15" receding doors and hinged storage cabinet doors.

Adjustable Glides

Lateral files and storage cabinets are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench, or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Interlock

All cabinets are equipped with an interlock safety mechanism. This mechanism reduces the possibility of cabinet tipover by permitting only one drawer to be opened at a time. With some unique combinations an individual drawer may not be controlled by the interlock. In these instances a caution label will be affixed to the drawer body.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs a unique key is required. This key is the extractor (core removal) key and can be found in the accessories section of this price book. Contact Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-numbered locks.

Example: 30 plugs:
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding.

Powder coat application is a jighbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated. Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces

Special Paint Finishes

All special colors, including other manufacturers' standard finishes, are available subject to the following conditions.

- Two steel color chips (minimum 2.5" x 3.5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
- All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended lead times. Order will not be processed until color match is approved. Written confirmation must accompany order.

Nonstock Plastic Laminate Surfaces

Additional laminates are available but may be subject to additional lead time. Other special laminates require an upcharge and additional lead time. Contact KI.

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature.

How to Build a Model Number

Example: 700 Series Custom Built Lateral Files

S7L	36	555	BL	Insert drawer options here	CBW50	Optional Picks	33412DV
-----	----	-----	----	----------------------------	-------	----------------	---------

S7L	Product name	700 Series Shell				
36	Width	36" wide				
555	Interior height (nominal)	55 1/2" high				
BL	Color code	Custom Built Black				
CBW50	Optional	50# Counterbalance weight				
33412DV	Optional	12" Front-to-back filing bars				

Each internal component has a corresponding character:

D	Drawer with no interiors
DA	Drawer with FBA folder bars
DE	Drawer with FBE folder bars
R	Receding door
RS	Receding door, rollout shelf
RSA	Receding door, rollout shelf with FBA folder bars
RSE	Receding door, rollout shelf with FBE folder bars
RED	Receding door, end tab shelf with dividers
S	Rollout shelf
BS	Blank shelf
ES	End tab shelf
SS	Slotted shelf
CR	Coat rod

Models are built from the TOP TO THE BOTTOM.

The 334 model number for accessories indicates the item may be used in all cabinet widths.

NOTE: The unit must SPECIFY optional CBW and accessories as INSTALLED or they will be shipped separately.

700 Series® Custom-Built Lateral Files

General Information

TERMINOLOGY

BIFMA. "Business and Institutional Furniture Manufacturer's Association" set minimum standards by which contract furniture manufacturers measure the performance of their products.

Clear Filing Height. The available, unobstructed storage space in a drawer or on a shelf.

Counterbalance Weight. A weight affixed into the inside back of the file to minimize the possibility of the cabinet tipping over when a fully loaded drawer is opened.

"Double Bit" Lock. A lock plug with metal wafers or "bits" on opposing sides of the channel in which the key fits. The corresponding key has teeth on both sides of its blade. The double bit system provides greater security and a wider variety of keying options when compared to single bit locks.

End Tab Filing. Describes storage materials which have the identification tab at the short end of the file folder. The tab is seen from the side, not the top, of the folder.

Tie Bar. Used to complete the available filing height when no insert is required or where no insert is available to complete the remaining height. Required on 5 and 6-high cabinets. (Perpendicular to the width of the cabinet).

Folder Bars. The heavy gauge steel bars that fit into a drawer to suspend hanging folders and computer print-out binders. Available for side-to-side (across the width of the cabinet) and front-to-back filing.

Ganging. Describes the bolting together of cabinets when installed side by side. Enhances safety.

Glides. Adjustable large footed bolts that screw into the four bottom corners of all lateral files, cupboards, and pedestals; adjusts the level and height of a cabinet.

Interlock. A safety mechanism installed in all lateral files. Prevents opening more than one drawer at a time. Minimizes the possibility of the cabinet tipping over.

Lock Plug. The removable center portion of the lock. With a special key, lock plugs can be removed to allow for customer keying configurations after the lateral files or pedestals have been installed.

Posting Shelf. A horizontal extendible worksurface that can fit into a 1½" opening of a lateral file, in place of a tie bar.

Receding Door. Sometimes called a "flipper door"; the door opens by lifting it at the bottom and sliding it into the file on a horizontal plane.

Suspensions. Sometimes called "glides;" the ball bearing support mechanism on which a rollout shelf or drawer operates.

"X" High. (ie. 2 high, 3 high, etc.) The nominal height of a unity measured in 12-inch increments.

CUSTOM UNIT EXAMPLES

Requirement: 30-inch wide cabinet with binder storage in top two openings and legal file storage in bottom two openings. Maximum height, 57".

Unit Height	x	Qty	=	Insert Height	Description	Model No.	Price	x	Qty	=	Extended Price
56 ⁹ / ₃₂ "		1		52 ¹ / ₂ " max.	Shell, 5 high	S7L/30525	\$547		1		\$547
15"		2		30"	Receding door	S7L/30150R	134		2		268
		2			Blank shelf	S7L/30BS	83		2		166
10 ¹ / ₂ "		1		10 ¹ / ₂ "	Drawer w/folder bars	S7L/30105DA	242		1		242
12"		1		12"	Drawer w/folder bars	S7L/30120DA	242		1		242
Total insert height: 52 ¹ / ₂ "							Total Price:		\$1465		

Color code:

Requirement: 36-inch wide cabinet with miscellaneous stationery storage in top opening, letter file storage in middle opening, and 14 x 11" EDP file storage in bottom opening.

Unit Height	x	Qty	=	Insert Height	Description	Model No.	Price	x	Qty	=	Extended Price
33 ¹ / ₈ "		1		30" max.	Shell, 3 high	S7L/36300	\$489		1		\$489
6"		1		6"	Drawer	S7L/36060D	232		1		232
10 ¹ / ₂ "		1		10 ¹ / ₂ "	Drawer w/folder bars	S7L/36105DA	276		1		276
13 ¹ / ₂ "		1		13 ¹ / ₂ "	Drawer for EDP	S7L/36135DE	346		1		346
Total insert height: 30"							Total Price:		\$1343		

Color code:

Requirement: 42-inch wide cabinet with hanging WrightLine 14 x 11" EDP printout storage in top opening, multiple summary report storage in second opening, and EDP print-out storage in bottom two openings.

Unit Height	x	Qty	=	Insert Height	Description	Model No.	Price	x	Qty	=	Extended Price
65 ⁹ / ₃₂ "		1		60" max.	Shell, 5 high	S7L/42615	\$814		1		\$814
15"		2		30"	Receding door	S7L/42150R	167		2		334
		1			WrightLine	S7L/42WLD	116		1		116
		1			Blank shelf	S7L/42BS	83		1		83
15"		2		30"	Drawer for EDP	S7L/42150DE	402		2		804
Total insert height: 60"							Total Price:		\$2151		

Color code:

Note: Structural Filler Shelf

All 42" wide units taller than 65⁹/₃₂" require a 1½" structural tie bar shelf nominally located between 25½" and 36" from the top of the cabinet based on configuration.

700 Series® Custom-Built Lateral Files

General Information

HOW TO ORDER A CUSTOM UNIT

1. Specify the appropriate shell height and width.
2. Specify the required number of internal components from the TOP to the BOTTOM of the shell.
3. Be certain the dimensions of the components add up to match the available interior shell height.
4. A 1 1/2" tie bar/tie bar shelf is required on all shells 65 9/32" and over and must be specified. Optimally located between 12" from top and 24" from bottom of unit.
5. All units over 65 9/32" and 42" wide have a structural filler shelf located nominally 25 1/2" - 39" from the top of the cabinet.
6. Specify interior options directly below the component in which they are required.
7. Specify color code.

General Guidelines

- Use this worksheet when specifying components to help build a unit and ensure that all components are in the proper sequence.
- Specify the interior components from the top to the bottom of the cabinet.
- Be sure that the internal components add up to the interior space available in the basic shell.
- In units 65 9/32" and higher be sure to specify 1 1/2" tie bar/tie bar shelf following case specific rules.
- Locking tie bar may be substituted for tie bar in units without structural filler shelves.
- Counterbalance weights are recommended for all free standing units.

Note: Hinged cupboard door inserts include 1 1/2" tie bar shelf, additional tie bar not required.

Guidelines for Ordering Components

- Receding doors are recommended when the top of the component is above eye level or approximately 50" from the floor.
- The quantity of rollout components specified behind a receding door is limited only by the interior component height.
- Rollout components should not be specified in openings above eye level.
- In most instances, interior accessories are not included with components and must be specified separately.
- Locks are included in all units.

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note:

- The indicates that a choice is required.
- The absence of the indicates that no choice is required.
- Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select unit color.
Refer to color addendum at ki.com or KI Fabrics & Finishes binder.
- C** Select counterbalance weight.
CBW - With Counterbalance
NOCBW - No Counterbalance
See pricing column for counterbalance weight upcharge.
- D** Select key option.
KA - Key alike
KS - Key standard
NLC - No lock core

INFORMATION

Height

All dimensions shown include 1/8" allowance for glides in recessed position.

Weights

700 Series® Bookcases

General Information

GENERAL INFORMATION

KI 700 Series Bookcases have been designed to optimally store standard three-ring binders on **all** shelves. Shelves are adjustable on 1" increments to accommodate other media storage needs.

The units described on the following pages are to suit the most common storage requirements. Other bookcase sizes can be built to suit specific needs.

Contact KI Customer Service for details.

Height

Bookcases are available in several standard heights. Non-standard heights will be considered on a special order basis, contact KI Customer Service for details. Heights include 1/8" allowance for leveling glides fully recessed.

Depth

Bookcases are available in two standard depths: 12" and 15".

Width

All bookcases are 30" and 36" wide.

Shelf Clearance

Refer to height and depth clearance dimensions.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Shells are unique to bookcases, featuring a flush inner liner. The liner is punched to accept shelf brackets on 1" increments, starting approximately 8" from the bottom of the cabinet and terminating approximately 8" from the top of the cabinet. The liners, top and bottom reinforcements are welded into a rigid box frame. The shell is constructed from 18- and 20-gauge steel, with multiple strategically located offsets to maximize strength. The back is seamless. All corners are reinforced. Illustrated shell heights include 1/8" for adjustable glide in recessed position.

Shelves

Shelves are constructed using 22-gauge steel, formed 7/8" thick on the leading and trailing edges to enhance strength.

Adjustable Glides

Bookcases are supplied with four adjustable glides. The glides can be adjusted from inside the bookcase using a 1/4" hex socket wrench, or from outside the bookcase using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall bookcase heights include the glide in its recessed position.

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding.

Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Special Paint Finishes

All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

- Two steel color chips (minimum 2.5" x 3.5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
- All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended lead times. Order will not be processed until color match is approved. Written confirmation must accompany order.

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature.

Note: Dimensions shown above are with shelves located to provide for storage of three-ring binders. Shelves are easily adjustable on 1" increments. Dimensions will vary according.

700 Series® Curve Bookcases

General Information

GENERAL INFORMATION

KI 700 Series Curve Bookcases have been designed to optimally store standard three-ring binders on all shelves. Shelves are adjustable on 1" increments to accommodate other media storage needs.

The units described on the following pages are to suit the most common storage requirements. Other bookcase sizes can be built to suit specific needs. Contact KI Customer Service for details.

Height

Bookcases are available in several standard heights. Non-standard heights will be considered on a special order basis, contact KI Customer Service for details. Heights include 1/8" allowance for leveling glides fully recessed.

Depth

Bookcases are available in two standard depths: 12" and 15".

Width

All bookcases are 30" and 36" wide.

Shelf Clearance

Refer to height and depth clearance dimensions.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Shells are unique to bookcases, featuring a flush inner liner. The liner is punched to accept shelf brackets on 1" increments, starting approximately 8" from the bottom of the cabinet and terminating approximately 8" from the top of the cabinet. The liners, top and

bottom reinforcements are welded into a rigid box frame. The shell is constructed from 18- and 20-gauge steel, with multiple strategically located offsets to maximize strength. The back is seamless. All corners are reinforced.

Illustrated shell heights include 7/8" for adjustable glide in recessed position.

Shelves

Shelves are constructed using 22-gauge steel, formed 1/8" thick on the leading and trailing edges to enhance strength.

Adjustable Glides

Bookcases are supplied with four adjustable glides. The glides can be adjusted from inside the bookcase using a 1/4" hex socket wrench, or from outside the bookcase using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall bookcase heights include the glide in its recessed position.

Standard Paint Finishes

All KI products are chemically etched prior to painting. This process enhances top coat bonding. The top coat is a high solids modified polyester enamel. The enamel is baked on to provide a scratch-and stain-resistant surface.

All inside and outside shell and drawer front surfaces are painted with the same specified paint color.

Interior components and accessories are Dark Tone. Mechanical components are black chrome-plated.

Powder coated/enamel finish colors shown in Color Addendum are standard and are available where specifications call for painted surfaces.

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding. The wet coat application is either alkyd or acrylic paint finish. The powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Special Paint Finishes

All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

- Two steel color chips (minimum 3" x 5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
- All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended lead times. Order will not be processed until color match is approved. Written confirmation must accompany order.

700 Series® Pedestals

General Information

GENERAL INFORMATION

KI 700 Series pedestals are available in sizes and drawer combinations to suit any personal storage requirement. Freestanding and mobile units are designed to fit below most work-surfaces. Hanging and worksurface supporting units are sized to fit under KI Systems furniture. A mounting kit is provided with each unit to allow installation under other compatible workstations.

Preconfigured Units

To simplify the specification process, KI offers preconfigured pedestals in the most popular sizes with the most popular internal components. These units are assembled using standard components.

Height

Four pedestal styles are available. Heights include 1/4" allowance for leveling glides fully recessed. Worksurface Supporting: 27 1/8". Freestanding: 22 3/8", 25 7/16". Mobile: 24 11/16", 27 3/8". Hanging: 19 3/16", 22 1/8"

Depth

Products are available in three standard depths: 17 5/8", 21 5/8" and 27 5/8".

Width

All products are 15" wide.

Drawer Dimensions

Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Twenty-gauge steel body with 20-gauge steel top and box frame front and back uprights. Uprights are notched in 3" intervals for drawer suspension mounting.

Drawers

Fronts: Two-piece metal construction. Twenty-two gauge steel outerskin welded to 22-gauge inner liner. With full width inset or overlap front of pedestal.

Three-inch (pencil) drawer: Single wall two-piece construction. Body 22-gauge; back 22-gauge. Operates on two section 3/4 extension ball bearing suspension.

Six-inch (box) drawer; single wall two-piece construction. Body 22-gauge; back 22-gauge. Operates on two-section 3/4 extension ball-bearing suspension.

Twelve-inch (file): Single wall, two-piece construction. Front liner 20-gauge; body 22-gauge. Mounted on full extension slide arm suspensions. Flat front with exterior pulls. Drawer fronts

Adjustable Glides

Freestanding and floor supporting pedestals include four glides, adjustable from outside the cabinet. Standard glides provide 1" adjustment.

Counterbalance

Counterbalance weight is standard in all mobile units and is recommended in all freestanding units.

Caster Kit

Consists of four twin-wheel hooded casters. Front two casters are locking; rear two casters are non-locking. Counterbalance weight included in all mobile units.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This

information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs a unique key is required. This key is the extractor (core removal) key and can be found in the accessories section of this price book. Contact Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-numbered locks.

Example: 30 plugs:
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding.

Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Special Paint Finishes

All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

1. Two steel color chips (minimum 2.5" x 3.5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
2. All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended color match is approved. Written confirmation must accompany order.

Field Reconfiguration

As needs change, KI pedestals can readily be field-changed; however, this process should be undertaken by a qualified service technician.

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature.

How to Build a Model Number

Example: 700 Series Pedestals

Optional Picks

700 Series® Curve Pedestals

General Information

GENERAL INFORMATION

KI Curve pedestal files are available in sizes and drawer combinations to suit any personal storage requirements. Freestanding and mobile units are designed to fit below most worksurfaces. Hanging and worksurface supporting units are sized to fit under KI systems furniture. A mounting kit is provided with each unit to allow installation under other compatible workstations.

Clean stylish looks, flexible aesthetics and durability allow Curve to work in private offices and open plan environments. With a gentle curved front and contoured drawer pulls, Curve creates a timeless design element.

Flexible aesthetic and flexible format. Curve allows you to design from the inside out, fitting the media to the appropriate lateral, pedestal, cupboard, bookcase and combination unit or locker/file unit.

Heavy-gauge steel construction and welded internal box frame for structural integrity. Multi-extension suspensions provide smooth drawer operation. Curve enhances security with its 994 key possibilities.

Preconfigured Units

To simplify the specification process, KI offers preconfigured pedestals in the most popular sizes with the most popular internal components. These units are assembled using standard components.

Height

Four pedestal styles are available. Heights include 1/4" allowance for leveling glides fully recessed. Refer to the illustrations for the range of height clearance of each.

Depth

Products are available in three standard depths: 17 7/8", 21 5/8" and 27 5/8". Refer to the illustrations for the range height clearance of each.

Width

All products are 15" wide.

Drawer Dimensions

Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

20 gauge steel body with 20-gauge steel top and box frame front and back uprights. Uprights are notched in 3" intervals for drawer suspensions mounting.

Drawers

Fronts: two-piece metal construction. 22-gauge steel outerskin welded to 22-gauge inner liner. With full width contoured curved steel pull. Radius drawer fronts overlap front of pedestal.

Three-inch (pencil) drawer: Single wall two-piece construction. Body 22-gauge; back 22-gauge. Mounted on full extension slide arm suspensions.

Six-inch (box) drawer: single wall, two-piece construction. Front liner 20-gauge; body 22-gauge. Mounted on full extension slide arm suspensions.

Twelve-inch (file); single wall, two-piece construction. Front liner 20-gauge; body 22-gauge. Mounted on full extension slide arm suspensions.

Adjustable Glides

Freestanding and floor supporting pedestals include four glides, adjustable from outside the cabinet. Standard glides provide 1" adjustment.

Counterbalance

Counterbalance weight is included on all mobile units (file/file) that do not use the 5th wheel under the bottom drawer. Counterbalance weight is recommended in all freestanding units.

Caster Kit

Consists of four twin-wheel-hooded casters. Front two casters are locking; rear two casters are non-locking.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. 700 Series® OF Pedestals

General Information

GENERAL INFORMATION

700 Series OF pedestals are illustrated in the most common drawer and size configurations. Other drawer and size combinations are available since the product is designed and manufactured utilizing components from the 700 Series product line. Freestanding and mobile units are designed to fit below most worksurfaces. Hanging and worksurface supporting units are sized to fit under KI Systems furniture. A mounting kit is provided

with each hanging unit and worksurface supporting unit to allow installation under other compatible workstations.

Height

Three pedestal styles are illustrated. Heights include a $\frac{1}{8}$ " allowance for glides or casters.

Depth

Products are available in three standard depths: $17\frac{7}{8}$ ", $21\frac{1}{8}$ " and $27\frac{3}{8}$ ". The dimension includes the allowance for drawer fronts.

Width

All products are 15" wide.

Drawer Dimensions

Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Twenty-gauge steel body with 18- and 20-gauge steel top and box frame front and back uprights. Uprights are notched in 3" intervals for drawer suspension mounting.

Two shell styles are available. One style has a flush top, allowing for the application of a lock rail and thereby providing an entirely custom front facade. The other shell style has an extended top where the $1\frac{1}{8}$ " top extends flush to the front of the pedestal.

Drawers

Six-inch (box) drawer; single wall two-piece construction. Body 22-gauge; back 22-gauge. Operates on two-section $\frac{3}{4}$ " extension ball-bearing suspension.

Twelve-inch (file): Single wall, two-piece construction. Back and body 22-gauge. Mounted on full extension slide arm suspensions.

Fronts: When specified without fronts, drawers come standard with hardware to mount fronts to drawer bodies. Mounting hardware can be specified for delivery prior to product delivery. Contact Customer Service for details. When specified with fronts, fronts are particleboard core with either wood veneer or plastic laminate finish. Fronts are nominally $\frac{3}{4}$ " thick.

Front Specifications: To assist in the manufacturing of custom fronts, refer to the specification section. This section provides illustrations detailing recommended dimensions and hole locations.

Adjustable Glides

Freestanding and floor supporting pedestals include four glides, adjustable from outside the cabinet.

Counterbalance

Counterbalance weight is standard in all mobile units and is recommended in all freestanding units.

Caster Kit

Consists of four twin-wheel hooded casters. Front two casters are locking; rear two casters are non-locking. Counterbalance weight included in all mobile units.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs a unique key is required. This key is the extractor (core removal) key and can be found in the accessories section of this price book. Contact Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-numbered locks.

Example: 30 plugs:
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit, corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding.

Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature. How to Build a Model Number

Example: 700 Series Optional Front Extended Top Pedestals

		Front Option			Front Finish		Optional Picks	
S7PE	15	24	F	FF	X	BL	CBW50	
S7PE	Product name	700 Series Pedestal, Extended Top						
15	Cabinet width	15" wide						
24	Cabinet depth (nominal)	24" depth						
F	Pedestal type	Freestanding						
FF	Drawer type	Two 12" file drawers						
X	Color code	No front						
BL	Front type	Black						
CBW50	Optional	50# Counterbalance weight						
Each pedestal type and accessory has a corresponding character:								
M	Mobile							
H	Hanging/suspended							
F	Freestanding							
W	Worksurface supporting							
P	3" pencil drawer							
B	6" box drawer							
F	12" file drawer							
L1	Laminate front							
X	No Front							
NOTE: The unit must SPECIFY optional CBW as INSTALLED or they will be shipped separately.								

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature. How to Build a Model Number

Example: 700 Series Optional Front Flush Top Pedestals

		Front Option			Front Finish		Optional Picks	
S7PF	15	24	F	FF	W1	BL	RCY	CBW50
S7PF	Product name	700 Series Pedestal, Flush Top						
15	Cabinet width	15" wide						
24	Cabinet depth (nominal)	24" depth						
F	Pedestal type	Freestanding						
FF	Drawer type	Two 12" file drawers						
W1	Front type	Wood front, center pull						
BL	Color code	Black						
RCY	Wood color	Cherry veneer						
CBW50	Optional	50# Counterbalance weight						
Each pedestal type and accessory has a corresponding character:								
M	Mobile							
H	Hanging/suspended							
F	Freestanding							
W	Worksurface supporting							
P	3" pencil drawer							
B	6" box drawer							
F	12" file drawer							
X	No front							
W1	Wood front							
NOTE: The unit must SPECIFY optional CBW as INSTALLED or they will be shipped separately.								

General Information (continued)

Nonstock Plastic Laminate Surfaces

Additional laminates are available but may be subject to additional lead time. Other special laminates require an up-charge and additional lead time. Contact KI.

Special Paint Finishes

All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

1. Two steel color chips (minimum 2.5"x3.5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.

2. All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended lead times. Order will not be processed until color match is approved. Written confirmation must accompany order.

Field Reconfiguration

As needs change, KI pedestals can readily be field-changed; however, this process should be undertaken by a qualified service technician.

Inside Dimensions of Drawers

* including 3/4" thick fronts.

700 Series® OF Pedestals

General Information

The information outlined below should be used to communicate critical dimensions for various drawer fronts. Larger drawings are available for specific size fronts. Contact Customer Service for availability.

The KI product is designed for 3/4" thick fronts. Thinner or thicker file fronts can be adapted to flush top product only. Please be aware that on fronts with thickness different from 3/4" the lock barrel will protrude from or be recessed into the filler rail by the dimension the fronts differ from 3/4".

On extended top product, the top rail is not required. It is integral to the shell construction, and is painted the color of the cabinet. KI center pulls are available for installation on custom fronts. **Note:** the drawings on this page do not provide allowance for KI drawer pulls. Drawings are available for fronts with an allowance for KI drawer pulls.

The hardware necessary for mounting the drawer fronts will vary depending on the material used. The parts supplied by KI are for use when mounting medium or high-density particle or fiberboard core fronts.

Flush Top

Extended Top

15" Filler Rail

(For flush top applications only)

6 x 15" Pedestal Front

12 x 15" Pedestal Front

700 Series[®] OF Pedestals

General Information

Fabric

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.

700 Series® Vertical Files

General Information

GENERAL INFORMATION

KI vertical files are designed on a 11" module. To assure KI files are compatible with panel systems, desks or custom architectural details, cabinets are available in 4 different heights.

Height

Vertical files are available in 4 standard heights. Heights include $\frac{1}{8}$ " allowance for leveling glides fully recessed.

Depth

All products are 27 $\frac{5}{8}$ " deep.

Width

Cabinets are available in two standard widths: 15" and 18".

Drawer Dimensions

Refer to the illustrations for the range of drawer sizes and the height clearance of each.

CONSTRUCTION AND STANDARD FEATURES

Basic Shell

Uprights and top and bottom reinforcements are welded into rigid "boxframe." Constructed of 18- and 20-gauge steel. Seamless back and top with reinforced corners. 5-drawer cabinets also feature a welded tie bar midway in the shell.

Illustrated shell heights include $\frac{1}{8}$ " for adjustable glide in recessed position.

Doors/Drawers

Drawer fronts, 20-gauge steel double wall with full-width flush inset pull and label holder. Fronts are screw-mounted to shelves to build drawers. Shelf body, 20-gauge steel. Each roll-out shelf equipped with two heavy-duty, three-section, ball-bearing suspensions. Components have been tested to accept loads of 75 lbs.

Adjustable Glides

Cabinets are supplied with two adjustable glides. The glides can be adjusted from inside the cabinet using a $\frac{1}{4}$ " hex socket wrench, or from outside the cabinet using a $\frac{7}{16}$ " wrench. Standard glides provide $\frac{3}{4}$ " adjustment; longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Locks

Locks are standard on all units. The lock is a high-security double-bit type. The double-bit lock offers superior security when compared to a single-bit lock. Units are standard with random keys in a range of 994 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed. Please see the accessories section of this price book for order information on master keys, extractor (core-removal) keys, key blanks, cut keys, and core and key sets.

All locks have removable and interchangeable plugs. This feature provides for onsite custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs a unique key is required. This key is the extractor (core removal) key and can be found in the accessories section of this price book. Contact Customer Service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key-numbered locks.

Example: 30 plugs:
3 keyed alike
10 keyed alike
17 keyed alike

Commercial Pack

This is the standard pack that KI offers on all files and storage products. This consists of a plastic poly bag placed over the unit,

corrugated top and bottom cap, corner blocking and stretch wrap to keep the packaging intact.

Standard Paint Finishes

All KI products are iron phosphate treated prior to painting. This process enhances top coat bonding.

Powder coat application is a highbred epoxy. The paint is baked on to provide a scratch and stain resistant surface.

All inside and outside shell and front surfaces are painted with the same specified paint color. Interior components and accessories are painted a black finish. Mechanical components are black plated.

Powder coated/enamel finish colors shown in Color Addendums are standard and are available where specifications call for painted surfaces.

Special Paint Finishes

All special colors, including other manufacturers' standard enamel finishes, are available subject to the following conditions.

- Two steel color chips (minimum 2.5" x 3.5") are requested for color matching purposes. Paper samples are acceptable, however, a reasonable tolerance must be allowed when comparing the two variations.
- All nonstandard colors are available at no additional charge (excluding hi-chromatic colors), but may be subject to extended lead times. Order will not be processed until color match is approved. Written confirmation must accompany order.

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature.

How to Build a Model Number

Example: 700 Series Vertical Files

						Optional Picks
S7V	15	30	3D	CF	BL	CBW50
S7V	Product name	700 Series Vertical File				
15	Width	15" wide, letter size				
30	Depth (nominal)	30" depth				
3D	Number of drawers	3 drawers				
CF	Equipped with	Compressor follower (as opposed to folder bars)				
BL	Color code	Black				
Each internal component has a corresponding character:						
D	11" file drawer					
CF	Compressor follower					
FB	Folder bar					
NOTE: Must SPECIFY either CF or FB for each unit.
