Laminate; 2-1/4" elliptical molded urethane front and rear (long) edges; 1-1/4" rigid Poly edge on side (short) edges (ME2)

SPECIFICATIONS

Worksurfaces

Standard worksurface tops are nominal 1-1/4" overall thickness with .030" thick high-pressure laminate top surface and .028 phenolic backer, (bottom surface). Density of the core in standard tops is 45 lb/cu ft. particleboard, M3 grade. Available with 2mm (74P), Self Edge (64E) or Molded Urethane (ME2) edges.

Flipping/Nesting Table Frame

The framework for table support and flipping/nesting operation consists of 30mm X 50,mm X 3mm thick wall, steel tubing with 4mm thick formed steel support hubs welded to the tubes for mounting the legs. A 3mm formed steel table support bracket is attached to the beam and hub structure using a 10mm diameter steel pivot pin. #12X 1-3/4" Phillips wood screws attach the framework brackets to the worksurface. A 9.9mm steel hex rod connects the latch mechanism and is connected to a nylon release paddle on either end of the table base. The table latch release handle is actuated by squeezing the paddle on either end to the underside of the worksurface. Pulling upward, raises the worksurface for nesting storage. To lower the table for use from the upright storage position, grasp the top center of the worksurface edge and lower the surface to and allow the latches to engage once the surface is down. All hinge pins for the flipping mechanism are zinc plated steel. Hinge pin spaces are molded nylon. The framework is shipped separately, ready to be assembled to the worksurface and legs.

Leg Assembly Flipping/Nesting Table

The leg assembly consists of one right-hand leg and one left-hand leg. There are three leg widths. One width fits 18" wide tables. One width fits 24" and 30" wide tables. One width fits 36" wide tables. Standard leg height is 29" high, Counter leg height is 36" high, Cafe leg height is 42" high. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 4mm thick steel pivot plate welded to it. The feet consist of two 4mm thick blades welded to the leg tube, and the blade covers are Zinc die cast attached with self-tapping metal screws. The Leg assemblies are bolted to the table frame structure using two M12 X 25mm flat head bolts. Leg assemblies ship with blade covers installed but casters or Glides need to be installed upon assembly. There is a hardware kit shipped with the base that consists of two covers that must be installed after the leg assembly to prevent access to the pivot mechanism.

Leg Assembly Fixed T-Base

There are three leg widths. One width fits 18" wide tables. One width fits 24" and 30" wide tables. One width fits 36" wide tables. Standard leg height is 29" high, Counter leg height is 36" high, Cafe leg height is 42" high. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5mm thick steel plate welded to it. The feet consist of two 4mm thick blades welded to the leg tube, and the blade covers are Zinc die cast attached with self-tapping metal screws. The Leg assemblies are attached to the worksurface using #12 X 1" screws. Leg assemblies ship with blade covers installed but casters or Glides need to be installed upon assembly.

Leg Assembly Fixed Double T Leg

Some larger fixed leg tables use a Double T or TT style leg. Available standard in one width of 38" to fit 42" and 48" wide tables. Leg height is fixed to provide only 29" high table-top height. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5mm thick steel plate welded to it. The feet consist of two 4mm thick blades welded to two leg tubes separated by a 1"X 2" welded steel cross tube, and the blade covers are Zinc

die cast attached with self-tapping metal screws. The Leg assemblies are attached to the worksurface using #12 X 1" screws. Leg assemblies ship with blade covers installed but casters or Glides need to be installed upon assembly.

Leg Assembly Fixed C-Leg

Some shaped tables use three or four C-Leg style legs. Available standard in one length of 14". Leg height is fixed to provide only 29" high table-top height. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5mm thick steel plate welded to it. The foot consist of one 4mm thick blade welded to the leg tube, and the blade covers are Zinc die cast attached with self-tapping metal screws. The Leg assemblies are attached to the worksurface using #12 X 1" screws. Leg assemblies ship with blade covers installed but casters or Glides need to be installed upon assembly.

Leg Assembly Fixed X-Base

Some Round and Square Shaped tables use X-Base style legs. Available in a Standard 28" X 28" X- Style foot configuration. 29", 36" and 42" table top height configurations are available on various sizes. Leg construction consists of 3" diameter, .07" thick wall steel tubing with a 5mm thick steel plate welded to it. The feet consist of four 4mm thick blades welded to the leg tube, and the blade covers are Zinc die cast attached with self-tapping metal screws. The Leg assemblies are attached to the worksurface using #12 X 1" screws. Leg assemblies ship with blade covers installed but casters or Glides need to be installed upon assembly.

PowerUp® Power/Data Module

Tables are available with 1 or 2 PowerUp power/data modules per table. On tables with 1 module it is located centered within the top length. Modules are spaced 3" from the approach edge on 18" and 24" wide tops, 4" on 30" wide tops, and centered (front to back) on 36" wide tops. Some larger Conference style tables are available with 2 modules. They are located along the centerline of the top (front to back) and approximately 23" to 35" from the edge of the top depending on the top width.
The PowerUp is a UL listed Relocatable Power Tap which mounts flush into the table top. The PowerUp is 3-1/4" wide x 7" long and 2-1/4" tall when opened. It is provided with either a 9 ft. or 15 ft., 3 conductor cord, rated 120VAC, 15A. When open, one duplex power receptacle and two RJ45 data connectors are exposed. The module can be modified to fit various brand jacks.

Villa Module

Tables are available with 1 or 2 Villa modules per table. On tables with 1 module it is located centered within the top length. Modules are spaced 3" from the approach edge on 18" and 24" wide tops, 4" on 30" wide tops, and centered (front to back) on 36" wide tops. Some larger Conference style tables are available with 2 modules. They are located along the centerline of the top (front to back) and approximately 23" to 35" from the edge of the top depending on the top width.
The Villa is a UL listed Relocatable Power Tap which mounts flush into the table top. The Villa is 3-1/2" wide x 6-3/4" long and 2" tall when opened. It is provided with either a 9 ft. or 15 ft., 3 conductor cord, rated 120VAC, 15A. When open, one duplex power receptacle and two RJ45 data connectors are exposed. The module can be modified to fit various brand jacks.

Pirouette® Tables

General Information

Casters and Glides
Each table includes either glides or casters. Each table with casters will include two wheel locking casters. Glides and casters are made of molded nylon and come in two colors. Glides and casters are interchangeable without changing table height. Caster wheels are a minimum of 2.44" (62mm) diameter. Caster wheel treads are medium hard (75 max Shore A) for easy mobility on carpet or hard floors. Glides have a smooth convex bottom surface for mobility. 2 3/4" diameter black nylon glides are optional. Glides have 1" of telescoping height adjustment that adjusts table height from 28 1/2" to 29 1/2". Steel 1/2" threaded stems attach the glides to legs. Casters and glides ship unassembled.

Ganging Mechanism
Built of black, high-strength nylon, the hook and peg combination draws tables together. No tools are required when joining tables. Gangers are self-storing under the table when not in use. Tops are pre-drilled for placement of ganging pegs. Two gangers, six pegs and all mounting screws are included in the kit. One kit per table joint is required. Field installed.

Vertical Leg Wire Management
A color matched extrusion made of aluminum "snaps" to the Pirouette leg managing cables and wires exiting PowerUp® or standard grommets installed on the worksurface top. The extrusion is 12" long. Vertical wire managers are included when power options are ordered.

Under Table Wire Management
The under table wire manager is constructed of 2" x 4-1/2" Velcro hook and loop material with nylon pull tabs. Wire manager is provided with adhesive backing and screws for attachment to the underside of the top. Tops are pre-drilled for locating wire manager, but the manager may be applied in any convenient location. Two or four wire managers are included when power options are ordered. Field installed.

Worksurface Grommet
The grommet is constructed of ABS plastic which mounts flush into the top of the worksurface. One grommet ships per table. It is located in the center of the tops. Grommets have a flip-up receding door and are identical in size to the PowerUp module to allow for retrofitting of PowerUp at a later date. The available opening for power or data cords, when the flip-up door is closed, is 1/2" wide x 5-3/4" long. Open door available space is 2-1/4" x 5-3/4". Field–installed.

Fabric Wrapped Modesty Panel/Wire Management
The modesty panel is constructed of a heat-set, non-woven PET material, pressed into a flexible, durable and dent resistant panel. The panel is fabric wrapped, black only. The panel is hung by 16-gauge steel, powder coated brackets and steel powder-coated hooks that mount to the underside of the worksurface using wood screws. The modesty panel hangs freely when in use or when the table top is in its nested, upright position. The panel has a Velcro fastened pouch on the user side to route and hide cables or wires from electronic equipment to the optional vertical leg wire manager. The modesty panel measures 8-1/2" wide (measured from underside of the worksurface) by the length of the table x 3/4" thick.

Pirouette® Tables
